Unconscious Bias in Schools Tracey A. Benson,Sarah Edith Fiarman,2019 In Unconscious Bias in Schools two seasoned educators describe the phenomenon of unconscious racial bias and how it negatively affects the work of educators and students in schools Regardless of the amount of effort time and resources education leaders put into improving the academic achievement of students of color the authors write if unconscious racial bias is overlooked improvement efforts may never achieve their highest potential In order to address this bias the authors argue educators must first be aware of the

racialized context in which we live Through personal anecdotes and real life scenarios *Unconscious Bias in Schools* provides education leaders with an essential roadmap for addressing these issues directly The authors draw on the literature on change management leadership critical race theory and racial identity development as well as the growing research on unconscious bias in a variety of fields to provide guidance for creating the conditions necessary to do this work awareness trust and a learner s stance Benson and Fiarman also outline specific steps toward normalizing conversations about race reducing the influence of bias on decision making building empathic relationships and developing a system of accountability All too often conversations about race become mired in questions of attitude or intention But I m not a racist This book shows how information about unconscious bias can help shift conversations among educators to a more productive collegial approach that has the potential to disrupt the patterns of perception that perpetuate racism and institutional injustice Tracey A Benson is an assistant professor of educational leadership at the University of North Carolina at Charlotte Sarah E Fiarman is the director of leadership development for EL Education and a former public school teacher principal and lecturer at Harvard Graduate School of Education *How to Design and Evaluate Research in Education* Jack R. Fraenkel, Norman E. Wallen, 2005-04 *How to Design and Evaluate Research in Education* provides a comprehensive introduction to educational research Step by step analysis of real research studies provides students with practical examples of how to prepare their work and read that of others End of chapter problem sheets comprehensive coverage of data analysis and information on how to prepare research proposals and reports make it appropriate both for courses that focus on doing research and for those that stress how to read and understand research *Everyday Mathematics: Teacher's lesson guide v. 1* [v.3] *Teacher's lesson guide v. 2* ,2004
