MCQ Selftest Companion to Lee's Synopsis of Anaesthesia G. B. Rushman, N. J. H. Davies, 1995 This companion volume to Lee's Synopsis of Anaesthesia has been developed to enable the reader to check how much of the factual information from the Synopsis has been retained This does not of course cover the whole area of anaesthesia contained in the Synopsis which includes much about the art of the subject and the wisdom of many years of experience both of which are difficult to test Nevertheless the area of anaesthesia rests firmly on a database of scientific knowledge Such background knowledge is most easily tested by the MCQ format presented here The questions have been carefully formatted in a friendly way to help develop the reader's knowledge of the subject and are therefore slightly different from exam questions They are designed to augment what you have gleaned from the Synopsis rather than to test in a destructive or competitive sense This little book is unashamedly dedicated to improving the quality of anaesthesia It is also dedicated to helping students of anaesthesia pass exams which has been the long term aim of the Synopsis itself On each question there is the briefest reference to the page of

the Synopsis to which the question refers After each question a brief explanation of the reason for a statement being false is frequently included The answers on the right hand side of the page may be covered up by a card or ruler while the statement is assessed and then checked against the reader's views **1,000 Practice MTF MCQs for the Primary and Final FRCA** Hozefa Ebrahim, Michael Clarke, Hussein Khambalia, 2019-01-10 A single comprehensive text covering all the MCQs required to prepare for both the Primary and Final FRCA exams *British Book News* British Council, 1992 Includes no 53a British wartime books for young people *MCQs in Regional Anaesthesia and Pain Therapy* Herman Sehmbi, 2017-06-30
