review provides a robust study companion for the American Board of Neurological Surgery ABNS primary examination. The text includes an impressive number of questions with concise and well delineated explanations. Suitable for thorough board preparation, the question and answer format enables busy neurosurgical residents to efficiently practice review and improve upon their comprehension. In addition to all the fundamental disciplines that are relevant to the practice of neurosurgery, this edition encompasses the latest advances in the field including endovascular approaches, minimally invasive spinal surgery techniques, and genetics. The diverse and challenging questions encourage the acquisition of factual knowledge and application of logic. This is the definitive ABNS study book because it most closely mimics the written board examination format. Key Highlights: Multiple choice Q/A format provides highly effective study tool. Questions organized randomly, thereby simulating the written examination. Short explanations provide readers with a clear understanding of the correct answers. This is a must-have primer that will help neurosurgeons and neurosurgical residents study and pass the rigorous written board exam. Board-certified neurosurgeons will also find it a handy and useful resource to prepare for MOC examinations or to brush up on clinical know-how.

Neurology David J. Anschel, 2003-08-22 Prepare Early Score Higher Completely revised and small enough to fit in a lab coat pocket. Neurology PreTest Self Assessment and Review 5e features 500 questions including 200 new in clinical vignette format with answers and explanations. All questions are reviewed by recent USMLE Step 2 test takers.

MCQs in Medicine Debra King, 2012-12-06 Academic geriatricians are always looking for an improved objective quantifiable measure of biological ageing in humans to replace that unphysiological and arbitrary scale years survived. The MCQ may be the nearest we have come yet to achieving this Holy Grail. An individual's facility with the setting and answering of MCQs separates the medical generations more surely than years. I am only grateful I was educated in a less rigorous but perhaps more gentlemanly era. If one appeared before an examiner neatly dressed with clean finger nails and the examination scripts were literate essays written in fountain pen, then you were in or so it seemed. For the past 20 years we have been evolving towards much more objective and rigorous assessment of knowledge and understanding of medicine of both undergraduate and postgraduate students. This process has been exemplified by the evolution of what is now the seemingly ubiquitous MCQ. When initially presented as objective and quantifiable measures of clinical knowledge, MCQs were the subject of scorn: how could they assess the art of medicine, the grey areas of clinical decision making. However, they very rapidly overcame this antediluvian scepticism and I believe they have had an effect well beyond the limited area of competence measurement. They have induced or at the very least contributed to a shift towards a more rigorous, dare one say more scientific approach to clinical medicine.

Questions And Answers In Neuro-ophthalmology: A Case-based Approach Andrew G Lee, Nagham Al Zubidi, Arielle Spitze, Sushma Yalamanchili, 2014-07-11. The book presents the most common problems seen in neuro-ophthalmology in a case-based learning format that provides rapid access and is easy to read. The user-friendly format guides and stimulates the reader to identify the distinctive symptoms in the main complaint and history to define the differentiating signs on neuro-ophthalmic exam and to describe the key laboratory or neuroimaging in specific entities. It also challenges the reader to ask additional questions of themselves and others by providing an initial set of questions and answers on specific neuro-ophthalmologic topics. The questions chosen are meant to simulate real-world questions in the clinic; the answers given serve to provide both the rationale for the correct answer and the explanations or reasons for the incorrect but plausible answers that might distract or mislead a clinician in specific neuro-ophthalmic cases.

Thieme Test Prep for the USMLE®: Medical Neuroscience Q&A Manas Das, Lee A. Baugh, 2018-12-12. Ensure readiness for the USMLE or any other high-stakes exam covering neuroscience. Thieme Test Prep for the USMLE Medical Neuroscience by Manas Das and Lee Baugh fills a void in available board prep materials with its focus on neuroscience. Readers will learn to recall, analyze, integrate, and apply biochemical and molecular biological knowledge to solve clinical problems. Key Highlights: Approximately 520 USMLE-style multiple-choice questions on neuroscience, classified as easy, moderate, and difficult, with detailed explanations. Questions cover clinical neurology as well as basics of neuroscience such as development, structure, and function. Chapters are organized based on neuroanatomical structure and systems from the spinal cord to the autonomic nervous system. Neuroimaging section and final exam chapter are invaluable tools for students to utilize before the boards. Questions begin with a clinical vignette and approximately 35% are image-based, mirroring the USMLE format. This essential resource will help you assess your knowledge and fully prepare for the USMLE Step 1 or COMLEX Level 1 exam. Be prepared for your
