A Better Way to Build Michael R. Adamson, 2013 While architects have been the subject of many scholarly studies we know very little about the companies that built the structures they designed This book is a study in business history as well as civil engineering and construction management It details the contributions that Charles J Pankow a 1947 graduate of Purdue University and his firm have made as builders of large often concrete commercial structures since the company's foundation in 1963 In particular it uses selected projects as case studies to analyze and explain how the company innovated at the project level The company has been recognized as a pioneer in design build a methodology that involves the construction company in the development of structures and substitutes negotiated contracts for the bidding of architects plans The Pankow companies also developed automated construction technologies that helped keep projects on time and within budget The book includes dozens of photographs of buildings under construction from the company's archive and other sources At the same time the author analyzes and evaluates the strategic decision making of the firm through 2004 the year in which the founder died While Charles Pankow figures prominently in the narrative the book also describes how others within the firm adapted the business so that the company could survive a commercial market that changed significantly as a result of the recession of the 1990s Extending beyond the scope of most business biographies this book is a study in industry innovation and the power of corporate culture as well as the story of one particular company and the individuals who created it **Design Professional and Construction Manager Law** Stephen A. examines all the pertinent cases and statutes with expert analysis by the state's top construction attorneys along with practical insights, warnings and advice culled from years of experience. Highlights include extensive discussion of the newly enacted Terrorism Risk Insurance Act of 2002, burden of proof under the Eicheleay formula, pending legislation in New York that would permit a new form of business entity that would be known as design professional service corporation, efforts by Governor Pataki to repeal the Wick's Law, pending state legislation that would render design-build contracts void unless the licensed engineer or architect is specifically identified in the contract and such licensee's practice is independent of the contracting party's business, pending state legislation that would increase the threshold for public works contracts, latest cases concerning who may file a lien, what items are alienable when liens can be filed, liens filed against condominiums, lien foreclosure actions, a new section regarding assignee of construction contracts.
