Que Es El Sida Y Como Prevenirlo:

Consejos Para Su Salud, Como Protegerse Contra El SIDA, January 1999, (SPANISH) ,1999 HIV/AIDS in South Africa
Chris Jennings,2012 Few people realize that the familiar HIV AIDS global statistics are actually estimates For example UNAIDS estimated that the Republic of South Africa had 140 000 HIV AIDS deaths in 1997 However after tabulating all deaths for 1997 the Republic of South Africa attributed only 6 635 deaths to HIV AIDS Such discrepancies are rarely noted The Republic of South Africa RSA stands as the exemplar of these discrepancies and is reputed to have the world s largest AIDS epidemic with an estimated 5 6 million people living with HIV AIDS PLWH in 2008 Such PLWH estimates as with the estimates of HIV AIDS deaths are highly questionable The reasons behind these discrepancies are clarified by describing two common misunderstandings of HIV infection that contribute to poor mathematical modeling outcomes Unfortunately the health authorities in the Republic of South Africa grant more validity to computer generated estimates than to their own empirical death counts The author discusses why these modeled estimates and the HIV sero prevalence surveys upon which they are based are simply implausible Presented with full references are raw numerical data on the tabulated number of HIV AIDS deaths in the RSA the number of AIDS cases detected by RSA disease surveillance systems UNAIDS WHO estimates for AIDS deaths in the RSA and UNAIDS WHO estimates for the number of people living with HIV AIDS in the RSA The total cumulative HIV AIDS cases in the United States and Africa are also presented for comparison and to place the African and RSA data within appropriate epidemiological context Overall these data span from 1981 to 2009 Altogether these data plus additional information detailing the nature of HIV infection and heterosexual HIV transmission rates explain why the hyperbolic mathematical estimates and HIV antibody test surveys the primary sources of HIV AIDS data in Africa are simply implausible

Peterson, Ralph J. DiClemente, 2012-12-06 In the nearly two decades since the HIV pandemic began the rapid expansion of behavioral research on HIV prevention has prompted a crucial need for a sourcebook more advanced than an introductory textbook and broader and more readily accessible than a review periodical The Handbook of HIV Prevention is intended as the first attempt to meet this need The current state of affairs led us to edit a book that would represent the major areas of HIV behavioral research at a level appropriate for graduate students and experienced researchers in public health medicine nursing education and the social and behavioral sciences In addition we expect that the handbook will be useful in advanced undergraduate courses and as a reference book for health care professionals Our plans to assemble the Handbook began in the fall of 1996 when we prepared a tentative outline of chapters and invited a large number of distinguished researchers in the field to be the authors of various chapters We received an overwhelmingly favorable response from potential authors to our letters of invitation After considerable effort by both the contributors and the editors the volume was completed in 1999 when all chapters went to press *CUIDADOS INTENSIVOS RESPIRATOR, IOS PARA ENFERMERIA A.* TORRES, 2000-12-19
