Quebec Trois Siecles Darchitecture:

Charles BaillargŽ Christina Cameron, 1989 A fourth generation member of a Quebec City family of artists and architects Charles Baillarg was encouraged by his family in both artistic and intellectual pursuits He was proficient not only as an architect but also as a surveyor engineer mathematician and inventor publishing over 250 books and pamphlets on his many interests Architecture in Transition Kelly Crossman, 1987-11-01 However behind the public face of design architectural life in Canada during the 1880s and 1890s was in turmoil The Canadian public had lost confidence in its designers students were forced to study abroad to secure a first class education professional rivalry was unscrupulous architectural competitions a scandal American architects and their architecture were the fashion These things changed but not before the world of the Canadian architect had been turned on its head replaced by one which resembled the world of contemporary architects with professional organisations regulated standards formalised education centred in the universities and the belief that Canadian architecture should reflect local climates culture and geography Kelly Crossman provides the first analysis of this period Beginning with a review of the architectural milieu in Toronto and Montreal in the 1880s he traces the rise of professionalism as an idea and architectural nationalism as a goal His analysis is more a history of architectural ideas than a survey of forms It places the architecture of these years in an historical and ideological context demonstrating that it developed with its own logic in response to national and international factors During the two decades after 1885 Canadian architects grappled with problems whose long term implications they could not have foreseen the role of the architect in industrialised society the need to accommodate and integrate applied science and the need to express their own and their country s personality in architectural form By the beginning of this century they had begun to find their own voice The story of this process will be of interest not just to students and scholars but to anyone interested in the development of Canada and its architecture Canadian Reference Sources Mary E. Bond, Martine M. Caron, 1996 This bibliography cites those Canadian and foreign reference sources that describe Canadian people institutions organizations publications art literature languages and history It lists books of a general nature as well as works in the disciplines of history and the humanities These large divisions are then broken down by subject genre type of document and province or territory Titles of national provincial territorial or regional interest are included in every subject area when available The contents of the book are indexed four ways by name title French subject and English subject And to facilitate browsing the major reference books those dealing with more than one subject or a large geographical region are also cross referenced Two entries have been created for each bilingual document in order to provide access and bibliographical descriptions in both of Canada s official languages Entries for unilingual works include citation in the language of the publication and a bilingual annotation The annotations are descriptive and provide information on the content arrangements and indexing of works the availability of non print formats previous editions and title changes and related works Canadian Reference Sources will be an

Drawing on Architecture Jordan Kauffman, 2019-03-19 How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In Drawing on Architecture Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history Drawing on interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change **The Oxford Dictionary of Architecture** James Stevens Curl, Susan Wilson, 2015-02-26 Containing over 6 000 entries from Aalto to Zwinger and written in a clear and concise style this authoritative dictionary covers architectural history in detail from ancient times to the present day It also includes concise biographies of hundreds of architects from history excluding living persons from Sir Francis Bacon and Imhotep to Liang Ssu ch eng and Francis Inigo Thomas The text is complemented by over 260 beautiful and meticulous line drawings labelled cross sections and diagrams These include precise drawings of typical building features making it easy for readers to identify particular period styles This third edition of The Oxford Dictionary of Architecture has been extensively revised and expanded with over 900 new entries including hundreds of definitions of garden and landscape terms such as Baroque garden floral clock hortus conclusus and Zen garden design Each entry is followed by a mini bibliography with suggestions for further reading The full bibliography to the first edition previously only available online has also been fully updated and expanded and incorporated into this new edition This is an essential work of reference for anyone with an

interest in architectural and garden history With clear descriptions providing in depth analysis it is invaluable for students professional architects art historians and anyone interested in architecture and garden design and provides a fascinating wealth of information for the general reader **Canadian History: Beginnings to Confederation** Martin Brook Taylor,Doug Owrap,1994-01-01 In these two volumes which replace the Reader s Guide to Canadian History experts provide a select and critical guide to historical writing about pre and post Confederation Canada with an emphasis on the most recent scholarship Cover **Building Regulations and Urban Form, 1200-1900** Terry R. Slater,Sandra M.G. Pinto,2017-09-20 Towns are complicated places It is therefore not surprising that from the beginnings of urban development towns and town life have been regulated Whether the basis of regulation was imposed or agreed ultimately it was necessary to have a law based system to ensure that disagreements could be arbitrated upon and rules obeyed The literature on urban regulation is dispersed about a large number of academic specialisms However for the most part the interest in urban regulation is peripheral to some other core study and consequently there are few texts which bring these detailed studies together This book provides perspectives across the period between the high medieval and the end of the nineteenth century and across a geographical breadth of European countries from Scandinavia to the southern fringes of the Mediterranean and from Turkey to Portugal It also looks at the way in which urban regulation was transferred and adapted to the colonial empires of two of those nations *French Fortresses in North America 1535-1763* René Chartrand,2013-03-20 Following the discovery of America by Columbus in 1492 European colonists brought their system of fortification to the New World in an attempt to ensure their safety and consolidate their conquests French and British explorers came later to North America and thus the establishment of their sizeable settlements only got under way during the 17th century The inhabitants of New France built elaborate fortifications to protect their towns and cities This book provides a detailed examination of the defenses of four of them Qu bec Montr al and Louisbourg in Canada and New Orleans in Louisiana *Art Apart* Marcia R. Pointon,1994 A History of Canadian Architecture Harold Kalman,1994 *Historical Atlas of Canada: From the beginning to 1800* Donald P. (Peter) Kerr,1987-01-01 Uses maps to illustrate the development of Canada from the last ice sheet to the end of the eighteenth century Canada Michelangelo Sabatino,Rhodri Windsor Liscombe,2016-11-15 Canada is a country of massive size of diverse geographical features and an equally diverse population all features that are magnificently reflected in its architecture In this book Rhodri Windsor Liscombe and Michelangelo Sabatino offer a richly informative history of Canadian architecture that celebrates and explores the country s many contributions to the spread of architectural modernity in the Americas A distinct Canadian design attitude coalesced during the twentieth century one informed by a liberal hybrid and pragmatic mindset intent less upon the dogma of architectural language and more on thinking about the formation of inclusive spaces and places Taking a fresh perspective on design production they map the unfolding of architectural modernity across the country from the completion of the transcontinental railway in the late 1880s

through to the present Along the way they discuss architecture within the broader contexts of political industrial and sociocultural evolution the urban suburban expansion and new building technologies Examining the works of architects and firms such as ARCOPEric Arthur Ernest Cormier Brigitte Shim and Howard Sutcliffe this book brings Canadian architecture chronologically and thematically to life

The Making of the Nations and Cultures of the New World Gérard Bouchard,2008 Between the sixteenth and nineteenth centuries the Americas Australia and New Zealand emerged as nations Through conquest and violent appropriation European immigrants settled these lands and soon developed a sense of belonging most potently expressed in identity memory and the belief in utopias Many of these new collectivities or founding nations succeeded in breaking their colonial links to achieve political and cultural emancipation from their European mother country The Making of the Nations and Cultures of the New World explores the question of how a culture a collective imaginary is born Gérard Bouchard compares the historical itineraries of New World collectivities which were driven by a dream of freedom and sovereignty and finds major differences as well as striking commonalities in their formation and evolution He also considers the myths and discursive strategies devised by the elites to unite and mobilize very diversified populations The first English translation of *Genèse des nations et cultures du Nouveau Monde* winner of a Governor General's Literary Award in 2000 this acclaimed book provides important insights for contemporary nations in crisis

Montreal in Evolution Jean-Claude Marsan,1990 Montreal in Evolution presents the rich and complex history of Montreal's architectural and environmental development from the first fort of Ville Marie to the skyscrapers of today It also examines the forces which shaped the city during the past three hundred and fifty years

Montreal, City of Spires Clarence Epstein,2012-03-19T00:00:00-04:00 Of the fifty religious buildings discussed in this book only a precious few remain standing despite the fact that Montreal boasts one of the largest and most eclectic groupings of Georgian and Victorian structures of any city in North America Following the British conquest of New France in 1759 a remarkable series of transformations took place in the small Catholic trading town of Montreal Given the diversity of settlers forced to live side by side the new church buildings that were to rise became strategic public spaces meeting places as well as power bases It was no wonder that by the time Mark Twain toured Canada's first metropolis

in the 1880s he found that one could not throw a brick in the place without breaking a church window By addressing the social religious and architectural issues surrounding these colonial era structures it will become apparent that Montreal was at once a shining jewel in England s imperial crown a chief outpost of Catholicism in the New World as well as the British North American headquarters for more than a dozen independent congregations **Canadian Modern Architecture** Elsa Lam, Graham Livesey, 2019-11-19 Royal Architectural Institute of Canada RAIC President s Medal Award multi media representation of architecture Canada s most distinguished architectural critics and scholars offer fresh insights into the country s unique modern and contemporary architecture Beginning with the nation s centennial and Expo 67 in Montreal this fifty year retrospective covers the defining of national institutions and movements How Canadian architects interpreted major external trends Regional and indigenous architectural tendencies The influence of architects in Canada s three largest cities Toronto Montreal and Vancouver Co published with Canadian Architect this comprehensive reference book is extensively illustrated and includes fifteen specially commissioned essays
