learn from this amazing democratic process Honeybees make decisions collectively and democratically Every year faced with  
the life or death problem of choosing and traveling to a new home honeybees stake everything on a process that includes  
collective fact finding vigorous debate and consensus building In fact as world renowned animal behaviorist Thomas Seeley  
reveals these incredible insects have much to teach us when it comes to collective wisdom and effective decision making A  
remarkable and richly illustrated account of scientific discovery Honeybee Democracy brings together for the first time  
decades of Seeley s pioneering research to tell the amazing story of house hunting and democratic debate among the  
honeybees In the late spring and early summer as a bee colony becomes overcrowded a third of the hive stays behind and  
rears a new queen while a swarm of thousands departs with the old queen to produce a daughter colony Seeley describes  
how these bees evaluate potential nest sites advertise their discoveries to one another engage in open deliberation choose a  
final site and navigate together as a swirling cloud of bees to their new home Seeley investigates how evolution has honed  
the decision making methods of honeybees over millions of years and he considers similarities between the ways that bee  
swarms and primate brains process information He concludes that what works well for bees can also work well for people  
any decision making group should consist of individuals with shared interests and mutual respect a leader s influence should  
be minimized debate should be relied upon diverse solutions should be sought and the majority should be counted on for a  
dependable resolution An impressive exploration of animal behavior Honeybee Democracy shows that decision making  
groups whether honeybee or human can be smarter than even the smartest individuals in them      The World History of

*Queen of the Sun* Taggart Siegel, 2012-12-17 In Autumn 2006 an unnerving phenomenon hit the United States honeybees  
were mysteriously disappearing from hives across the nation with beekeepers reporting losses of between 30 and 90 per cent  
of their entire colonies The problem soon spread to parts of Europe and even Asia earning the name Colony Collapse  
Disorder To this day nobody is absolutely sure why it is happening and what the exact causes are However in 1923 Rudolf
