Victor Azarya,Anneke Breedveld,Han van Dijk,Mirjam de Bruijn,2021-10-11 This book brings together the work of a number of leading specialists of the Fulbe Fulani Peul the largest and most widespread group of pastoralists in West Africa The collection deals with a wide variety of subjects ranging from ethnicity and identity ecology and politics and social transformation and takes us to such diverse settings across the African continent as urban Nigeria dryland West and Central Mali the Aadamaawa plateau in Cameroon the Guinean highlands the Ivorian savannah the Central Sudan Northern Benin and the Senegal valley This volume shows that the Fulbe are a fascinating example for the comparative study of social change and ecological and cultural adaptation by discussing contemporary changes in Fulbe society and the amazing variety of settings in which they are able to survive Common Ground Geneviève Massard-Guilbaud,Stephen Mosley,2010-10-12 Today s environmental problems climate change loss of biodiversity polluted air land and water all have their origins to a greater or lesser extent in how we have lived played and worked At a time when societies are confronted with the often dramatic consequences of past choices made in the fields of energy technology industry agriculture urbanisation and consumption we need a history that casts more light on the ways in which unsustainable human nature relationships came into being This means forging stronger connections between social and environmental history Common Ground opens up a

dialogue between two sub disciplines that to date have remained largely parallel endeavours bringing together both established and younger scholars from both fields to explore how people's everyday lives have connected to their environments and with what effects The book is organised in six sections leisure and environment nature and conservation environmental conflicts folk and scientific knowledge environmental disasters and energy industry and urban infrastructure By exploring the complex interplay between people's day to day activities and ecological change especially the values beliefs and environmental experiences of ordinary men and women we can better understand our past relationships with nature and perhaps make more informed planning and policy choices in the future **Capital Cities/Les Capitales** John H.
