Quest 4 Speed:

Traveling at the Speed of Thought Daniel Kennefick, 2007-04-15 Since Einstein first described them nearly a century ago gravitational waves have been the subject of more sustained controversy than perhaps any other phenomenon in physics These as yet undetected fluctuations in the shape of space time were first predicted by Einstein's general theory of relativity but only now at the dawn of the twenty first century are we on the brink of finally observing them Daniel Kennefick's landmark book takes readers through the theoretical controversies and thorny debates that raged around the subject of gravitational waves after the publication of Einstein's theory The previously untold story of how we arrived at a settled theory of gravitational waves includes a stellar cast from the front ranks of twentieth century physics including Richard Feynman Hermann Bondi John Wheeler Kip Thorne and Einstein himself who on two occasions avowed that gravitational waves do not exist changing his mind both times The book derives its title from a famously skeptical comment made by Arthur Stanley Eddington in 1922 namely that gravitational waves propagate at the speed of thought Kennefick uses the title metaphorically to contrast the individual brilliance of each of the physicists grappling with gravitational wave theory against the frustratingly slow progression of the field as a whole Accessibly written and impeccably researched this book sheds new light on the trials and conflicts that have led to the extraordinary position in which we find ourselves today poised to bring the story of gravitational waves full circle by directly confirming their existence for the very first time *Functional Training for Athletes at All Levels* James C. Railroad Nation Carlos Arnaldo Schwantes, 2025-05-15 From passenger tickets wall calendars and advertising posters to train orders and bills of lading railroads have left a colorful paper trail across America In *Railroad Nation* historian Carlos Arnaldo Schwantes examines a fascinating array of these materials showcasing the railroad industry's incredible variety of eye catching illustrations to enliven their timetables and promotional brochures Schwantes traces the evolution of railroad commercial art from drab black and white broadsides and text only advertisements that the early railroads placed in local newspapers to the riotous range of color graphics in the early twentieth century when the visual appeal of public timetables and their thousands of different brochures enticed settlers to create farms ranches and towns alongside newly laid tracks *Railroad Nation* offers readers an unparalleled look at the ephemera of the railroad industry highlighting the vibrant history of railroading in America through its rich tapestry of visual materials

Washing the Brain □ Metaphor and Hidden Ideology Andrew Goatly, 2007-01-17 Contemporary metaphor theory has recently begun to address the relation between metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared with e g the construal of cause and effect in the Algonquin language Blackfoot Moreover event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful Furthermore the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes Hume Smith Malthus and Darwin These metaphorical concepts support neo Darwinian and neo conservative ideologies apparent at the beginning of the 21st century ideologies underpinning our social and environmental crises The conclusion therefore recommends skepticism of metaphor's reductionist tendencies
