## Quest For Valid Economics:

Economics of Good and Evil Tomas Sedlacek, 2011-07-01 Tomas Sedlacek has shaken the study of economics as few ever have. Named one of the Young Guns and one of the five hot minds in economics by the Yale Economic Review, he serves on the National Economic Council in Prague where his provocative writing has achieved bestseller status. How has he done it? By arguing a simple almost heretical proposition: economics is ultimately about good and evil. In *The Economics of Good and Evil*, Sedlacek radically rethinks his field, challenging our assumptions about the world. Economics is touted as a science, a value-free mathematical inquiry, he writes, but it's actually a cultural phenomenon, a product of our civilization. It began within philosophy. Adam Smith himself not only wrote *The Wealth of Nations* but also *The Theory of Moral Sentiments*, and economics, as Sedlacek shows, is woven out of history, myth, religion, and ethics. Even the most sophisticated mathematical model Sedlacek writes is de facto a story, a parable, our effort to rationally grasp the world around us. Economics not only describes the world but establishes normative standards, identifying ideal conditions. Science, he claims, is a system of beliefs to which we are committed. To grasp the beliefs underlying economics, he breaks out of the field's confines with a tour de force exploration of economic thinking broadly defined over the millennia. He ranges from the epic of Gilgamesh and the Old Testament to the emergence of Christianity, from Descartes and Adam Smith to the consumerism in *Fight Club*. Throughout, he asks searching meta-economic questions: What is the meaning and the point of economics? Can we do ethically all that we can do technically? Does it pay to be good? Placing the wisdom of philosophers and poets over strict mathematical models of human behavior, Sedlacek's groundbreaking work promises to change the way we calculate economic value. *Quest for Valid Economics* Howard Byington Holroyd, 1982 *Heinrich Pesch on Solidarist Economics* Heinrich Pesch, 1998 Heinrich Pesch's *Solidarist Economics* presents excerpts from *Lehrbuch der Nationalökonomie* written by Pesch and probably the longest economics textbook ever written in English for the first time. This five-volume work appeared in several editions in German between 1905 and 1926. With this text, Pesch created one of the few original economics works in which he proposed the solidarist system of human work in juxtaposition to individualistic capitalism and collectivistic socialism, both of which he critiqued and opposed. Through this proposal, he also introduced a social philosophy, solidarism. The translator provides some of the most representative excerpts to demonstrate the nucleus of what the German Jesuit scholar attempted to accomplish in his textbook. His ideas prominently impacted the Roman Catholic Church's social teachings from 1931 through the present teachings of Pope John Paul II. **Economic Methodology and Freedom to Choose (Routledge Revivals)** Patrick O'Sullivan, 2012-07-26 First published in 1987, Professor O'Sullivan's work provides an in-depth philosophical examination of the foundations of method in Economics and other human sciences. The argument is unabashedly dialectical in the great Socratic-Platonic tradition, and the reissue will be very welcome to all students of methodology, in particular those students of economic methodology seeking a refreshing alternative to yet more mathematical game playing. In an age dominated and

perhaps to an extent perplexed by an ultimately non committal postmodernism the book provides a root and branch critique of the epistemological relativism which must lie at the root of the whole post modernist approach and in reasserting the fundamental importance not only for the methods of science but also for European civilisation of the pursuit of truth it takes a stance which is very much against the tide of the times A heterodox perspective is also provided and defended in detail regarding the real nature of economic methodology whereby it is shown that Economics epitomises a teleological mode of explanation which is significantly different from the efficient causal modes of explanation of the natural sciences In fact Economics is the ultimate subjectivist interpretative discipline in the methodological sense of Max Weber and Alfred Schutz a fact which has only been recognised and welcomed in the Austrian school of Economics

**Liberalism and the Philosophy of Economics** Tsutomu Hashimoto, 2022-09-15 Drawing on recent work in the contemporary philosophy of economics this book presents new ideas on liberalism including the concept of growth oriented liberalism Since the end of the Cold War questions and definitions of liberalism have moved from the sphere of political systems the socialism versus liberalism debates to the sphere of ethics what it means to live in a liberal society The chapters in this work trace the trajectory of the concept of liberalism in the philosophy of economics by exploring the ideological implications of the methodological debate between socialism and liberalism the idea of liberty as real freedom the ethical implications of Max Weber's methodology on autonomy and liberty and new typological theories of ideologies in the context of contemporary economic ethics This book marks a significant contribution to the literature on liberalism in the philosophy of economics and economic methodology and is highly recommended for readers who seek updated ideas on liberal society in its ethical and philosophical contexts

**The Nobel Factor** Avner Offer, Gabriel Söderberg, 2019-11-19 Economic theory may be speculative but its impact is powerful and real Since the 1970s it has been closely associated with a sweeping change around the world the market turn This is what Avner Offer and Gabriel Soderberg call the rise of market liberalism a movement that seeking to replace social democracy holds up buying and selling as the norm for human relations and society Our confidence in markets comes from economics and our confidence in economics is underpinned by the Nobel Prize in Economics which was first awarded in 1969 Was it a coincidence that the market turn and the prize began at the same time The Nobel Factor the first book to describe the origins and power of the most important prize in economics explores this and related questions by examining the history of the prize the history of economics since the prize began and the simultaneous struggle between market liberals and social democrats in Sweden Europe and the United States The Nobel Factor tells how the prize created by the Swedish central bank emerged from a conflict between central bank orthodoxy and social democracy The aim was to use the halo of the Nobel brand to enhance central bank authority and the prestige of market friendly economics in order to influence the future of Sweden and the rest of the developed world And this strategy has worked with sometimes disastrous results for societies striving to cope with the requirements of economic theory and deregulated markets

**Research Handbook on Austrian**

**Law and Economics** Todd J. Zywicki, Peter J. Boettke, 2017-12-29 The original contributions to the Research Handbook provide an introduction to the application of Austrian economics to law The book begins with chapters on the methodology of law and economics Further chapters discuss key concepts in Austrian economics dynamic competitive processes spontaneous order subjective value entrepreneurship and the limited nature of individual knowledge as they relate to topics in evolutionary law social rules self governance dispute resolution and basic law torts antitrust civil procedure business and family law

**F. A. Hayek** Peter J. Boettke, 2018-09-05 This book explores the life and work of Austrian British economist political economist and social philosopher Friedrich Hayek Set within a context of the recent financial crisis alongside the renewed interest in Hayek and the Hayek Keynes debate the book introduces the main themes of Hayek's thought These include the division of knowledge the importance of rules the problems with planning and economic management and the role of constitutional constraints in enabling the emergence of unplanned order in the market by limiting the perverse incentives and distortions in information often associated with political discretion Key to understanding Hayek's development as a thinker is his emphasis on the knowledge problem that economic decision makers face and how alternative institutional arrangements either hinder or assist them in overcoming that epistemic dilemma Hayek saw order emerging from individual action and responsibility under the appropriate institutional order that itself emerges from actors discovering new and better ways to coordinate their behavior This book will be of interest to all those keen to gain a deeper understanding of this great 20th century thinker in economics

**The Complacent Class** Tyler Cowen, 2017-02-28 Examines the trend of Americans away from the traditionally mobile risk accepting and adaptable tendencies that defined them for much of recent history and toward stagnation and comfort and how this development has the potential to make future changes more disruptive Publisher's description

**The Quest for Cosmic Justice** Thomas Sowell, 2001-06-30 This book is about the great moral issues underlying many of the headline making political controversies of our times It is not a comforting book but a book about disturbing and dangerous trends The Quest for Cosmic Justice shows how confused conceptions of justice end up promoting injustice how confused conceptions of equality end up promoting inequality and how the tyranny of social visions prevents many people from confronting the actual consequences of their own beliefs and policies Those consequences include the steady and dangerous erosion of fundamental principles of freedom amounting to a quiet repeal of the American revolution The Quest for Cosmic Justice is the summation of a lifetime of study and thought about where we as a society are headed and why we need to change course before we do irretrievable damage

[New Dictionary of Christian Ethics & Pastoral Theology](#) David J. Atkinson, David F. Field, Arthur F. Holmes, Oliver O'Donovan, 2013-11-21 Encompassing a wide range of topics from the timely health care and business ethics to the traditional atonement suffering and the kingdom of God this work features an easy to use reference system and eighteen articles that introduce readers to key themes in moral pastoral and practical theology Edited by David J Atkinson and David F Field with consulting editors Arthur Holmes and Oliver O

Donovan     The Elusive Quest for Growth William R. Easterly, 2002-08-02 Why economists attempts to help poorer countries improve their economic well being have failed Since the end of World War II economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America Attempted remedies have included providing foreign aid investing in machines fostering education controlling population growth and making aid loans as well as forgiving those loans on condition of reforms None of these solutions has delivered as promised The problem is not the failure of economics William Easterly argues but the failure to apply economic principles to practical policy work In this book Easterly shows how these solutions all violate the basic principle of economics that people private individuals and businesses government officials even aid donors respond to incentives Easterly first discusses the importance of growth He then analyzes the development solutions that have failed Finally he suggests alternative approaches to the problem Written in an accessible at times irreverent style Easterly s book combines modern growth theory with anecdotes from his fieldwork for the World Bank     The Economics of Thomas Robert Malthus Samuel Hollander, 1997-01-01 Hollander investigates the relation of Malthusian economics to that of the other great classicists particularly Smith Ricardo J B Say and the French physiocrats He redefines our common perception of Malthus s method and character     **Resurgence** ,2005     **Quest for True Humanity** Mosibudi Mangena, 1996     The American economic review ,1922     *Essays on the Methodology and Discourse of Economics* Warren J. Samuels, 1992-06-18 Contains a collection of articles on economics as a system of discourse and on certain epistemological problems of economics The treatment of both topics centres on the role of often implicit assumptions as to whose interests count in reaching conclusions especially as to policy     **The Methodology of Economic Thought** Marc Reed Tool, Warren J. Samuels, 1989-01-01 This collection of articles taken from the Journal of Economic Issues offers both a fresh perspective and a persuasive diagnosis on economic methodology It simultaneously presents institutional economists approaches to economic inquiry and policy as well as a running critique of conceptual flaw and inadequacies of the traditional orthodox neoclassical approach that dominates college curriculums and media     **The Reform of EC Competition Law** Ioannis Kokkoris, Ioannis Lianos, 2010-01-01 This book represents a fresh approach to EC competition law one that is of singular value in grappling with the huge economic challenges we face today As a critical analysis of the law and options available to European competition authorities and legal practitioners in the field it stands without peer It will be greatly welcomed by lawyers policymakers and other interested professionals in Europe and throughout the world     **Dynamic Economic Systems** John M. Blatt, 2019-07-29 The bicentenary of The Wealth of Nations has passed and so has the centenary of the neoclassical revolution in economics Yet the present state of dynamic economic theory leaves very much to be desired and appears to show little sign of significant improvement in the near future Structured into 5 main topics the main purpose of Dynamic Economics Systems is to present arguments for this contention and to start developing the tools which are needed to make progress in understanding truly

dynamic economic systems First published in 2000
