P. Wong, 2013-06-19 The first edition of The Human Quest for Meaning was a major publication on the empirical research of meaning in life and its vital role in well being resilience and psychotherapy This new edition continues that quest and seeks to answer the questions what is the meaning of life How do we explain what constitutes meaningful relationships work and living The answers as the eminent scholars and practitioners who contributed to this text find are neither simple nor straightforward While seeking to clarify subjective vs objective meaning in 21 new and 7 revised chapters the authors also address the differences in cultural contexts and identify 8 different sources of meaning as well as at least 6 different stages in the process of the search for meaning They also address different perspectives including positive psychology self determination integrative narrative and relational perspectives to ensure that readers obtain the most thorough information possible Mental health practitioners will find the numerous meaning centered interventions such as the PURE and ABCDE methods highly useful in their own work with facilitating healing and personal growth in their clients The Human Quest for Meaning represents a bold new vision for the

**The Politics of Self-Determination** Volker Prott,2016-09-08 The Politics of Self Determination examines the territorial restructuring of Europe between 1917 and 1923 when a radically new and highly fragile peace order was established It opens with an exploration of the peace planning efforts of Great Britain France and the United States in the final phase of the First World War It then provides an in depth view on the practice of Allied border drawing at the Paris Peace Conference of 1919 focussing on a new factor in foreign policymaking academic experts employed by the three Allied states to aid in peace planning and border drawing This examination of the international level is juxtaposed with two case studies of disputed regions where the newly drawn borders caused ethnic violence albeit with different results the return of Alsace Lorraine to France in 1918 19 and the Greek Turkish War between 1919 and 1922 A final chapter investigates the approach of the League of Nations to territorial revisionism and minority rights thereby assessing the chances and dangers of the Paris peace order over the course of the 1920s and 1930s Volker Prott argues that at both the international and the local levels the temptation of violence drove key actors to simplify the acclaimed principle of national self determination and use ethnic definitions of national identity While the Allies thus hoped to avoid uncomfortable decisions and painstaking efforts to establish an elusive popular will local elites administrations and paramilitary leaders soon used ethnic notions of identity to mobilise popular support under the guise of international legitimacy Henceforth national self determination ceased to be a tool of peace making and instead became an ideology of violent resistance

**Self-determination in Health Care** Dr Leroy C. Edozien,2015-07-28 This book proposes an alternative to the consent model which is currently at the heart of patient self determination and which is shown here to have fundamental flaws that constrain its effectiveness The proposed model is a property model in which the patient s bodily integrity is protected from unauthorised invasion and their legitimate expectation to be provided with the relevant information to make an informed decision is taken to be a proprietary right This model enables the courts to overcome the requirement to prove causation in consent cases and offers a complementary approach to patient self determination

*Autonomy of Migration?* Stephan Scheel, 2019-03-20 Examining how migrants appropriate mobility in the context of biometric border controls this volume mobilises new analytics and empirics in the debates about the politics of migration and provides an analytically effective and politically significant tool for the study of contemporary migration Drawing from the tension between the EU's attempt to achieve watertight border controls by means of biometric technologies and migrants' persistence to move to and live in the EU the volume pursues two interrelated objectives first it studies the encounters between migrants and the Visa Information System VIS one of the largest biometric databases in the world from the perspective of mobility in order to investigate how migrants appropriate mobility via Schengen visa within and against this biometric border regime Second it addresses criticisms of autonomy of migration in order to develop it as a viable approach for border migration and critical security studies Hence the book is driven by two interrelated research questions what does the assertion of moments of autonomy of migration refer to in the context of border regimes that use biometrics to turn migrants' bodies into a means of mobility control And how do migrants appropriate mobility via Schengen visa within and against biometric border regimes This book will be of great interest to scholars in border migration and critical security studies as well as researchers engaged in citizenship studies surveillance studies political theory critical IR theory and international political sociology

**Struggles for Self-Determination** Josiah Brownell, 2021-12-02 Katanga Rhodesia Transkei and Bophuthatswana four African countries that though existing in a literal sense were in each case considered by the international community to be a component part of a larger sovereign state through which all official communications and interactions were still conducted This book is concerned with the intertwined histories of these four right wing secessionist states in Southern Africa as they fought for but ultimately failed to win sovereign recognition Along the way Katanga Rhodesia Transkei and Bophuthatswana each invented new national symbols and traditions created all the trappings of independent statehood and each proclaimed that their movements were legitimate expressions of national self determination Josiah Brownell provides a unique comparison between these states viewed together as a common reaction to decolonization and the triumph of anticolonial African nationalism Describing the ideological stakes of their struggles for sovereignty Brownell explores the international political controversies that their drives for independence initiated inside and outside Africa By combining their stories this book draws out the relationships between the emergence of these four pseudo states and the fragility of the entire postcolonial African state structure

*The Quest for Self Determination* Christopher Atang, 2007-01-01 Called Unto Liberty! Colin H. Williams, 1994 This book examines the implications of language related conflict and of nationalist mobilisation and analyses the appeal of national liberty for people whose national culture is itself challenged by structural and political changes in the global economy

**Restructuring Relations** Rauna Kuokkanen, 2019-03-01 Adopted in 2007 the UN Declaration on the Rights of Indigenous Peoples establishes self determination including free prior and informed consent as a foundational right and principle Self determination both

individual and collective is among the most important and pressing issues for Indigenous women worldwide Yet Indigenous women's interests have been overlooked in the formulation of Indigenous self government and existing studies of Indigenous self government largely ignore issues of gender As such the current literature on Indigenous governance conceals patriarchal structures and power that create barriers for women to resources and participation in Indigenous societies Drawing on Indigenous and feminist political and legal theory as well as extensive participant interviews in Canada Greenland and Scandinavia this book argues that the current rights discourse and focus on Indigenous state relations is too limited in scope to convey the full meaning of self determination for Indigenous peoples The book conceptualizes self determination as a foundational value informed by the norm of integrity and suggests that Indigenous self determination cannot be achieved without restructuring all relations of domination nor can it be secured in the absence of gender justice As a foundational value self determination seeks to restructure all relations of domination not only hegemonic relations with the state Importantly it challenges the opposition between self determination and gender created and maintained by international law Indigenous political discourse and Indigenous institutions Restructuring relations of domination further entails examining the gender regimes present in existing Indigenous self government institutions interrogating the relationship between Indigenous self determination and gender violence and considering future visions of Indigenous self determination such as rematriation of Indigenous governance and an independent statehood

other claim making groups in a society Quantitative analysis of the primary data from the European Survey of Ethnopolitical Groups ESEPG and qualitative case studies confirm that although some ethnopolitical groups have presented their issues in the international arena the domestic realm is still the main locus for ethnopolitical contention to occur Saliency resources domestic and international opportunity structures affect ethnopolitical groups international engagement This book is an essential volume for anyone interested in ethnic mobilization social movements and transnationalization
