Quest History Meaning In Religion:

The Quest: History and Meaning in Religion Mircea Eliade, 1971 The Quest: History and Meaning in Religion Mircea Eliade, 1969 Examines the study of comparative religions and certain themes common to different religious experiences and beliefs The author writes for the intelligent general reader in the hope of developing an awareness of the place of the history of religion in secularized society **The Quest: History and Meaning in Religion**, 1975 Hermeneutics, Politics, and the History of Religions Christian K. Wedemeyer, Wendy Doniger, 2010 This volume comprises papers presented at a conference marking the 50th anniversary of Joachim Wach's death and the centennial of Mircea Eliade's birth Its purpose is to reconsider both the problematic separate legacies of these two major twentieth century historians of religions and the bearing of these two legacies upon each other Shortly after Wach's death in 1955 Eliade succeeded him as the premiere historian of religions at the University of Chicago As a result the two have been associated with each other in many people's minds as the successive leaders of the so called Chicago School in the history of religions In fact as this volume makes clear there never was a monolithic Chicago School Although Wach reportedly referred to Eliade as the most astute historian of religions of the day the two never met and their approaches to the study of religions differed significantly Several dominant issues run through the essays collected here the relationship between the two men's writings and their lives and in Eliade's case the relationship between his political commitments and his writings in fiction history of religions and autobiography Both men's contributions to the field continue to provoke controversy and debate and this volume sheds new light on these controversies and what they reveal about these two scholars legacies *Structure and Creativity in Religion* Douglas Allen, 2019-05-20 No detailed description available for Structure and Creativity in Religion **History and Belief** Robert Eric Frykenberg, 1996 In this study of the relationship between history and belief the author shows how our underlying commitments whether religious or ideological determine which events we find significant enough to remember as history yet how those same beliefs distort our understandings of events leaving them incomplete and contingent *In Search of the Sacred* Clinton Bennett, 1996-01-01 This text traces the growth and development of two related disciplines anthropology and the study of religions Locating these disciplines within the intellectual climate of the 19th century the study considers the contributions of scholars such as James George Frazer F Max Muller Emile Durkheim Mary Douglas and Clifford Geertz within an historical framework The author argues that both anthropologists and students of religion have abandoned an objective approach in favour of personal engagement with their subjects replacing observation with conversation monologue with dialogue a text based with people based approach He reveals how each discipline has influenced the other both in terms of methodology and by the provision of data The book also explores the criticism levelled at both disciplines that they have aided colonial domination of the developing world Oxford Textbook of Spirituality in Healthcare Mark Cobb, Christina Puchalski, Bruce Rumbold, 2012-08-09 The relationship between spirituality and healthcare is historical intellectual and

practical and it has now emerged as a significant field in health research healthcare policy and clinical practice and training Understanding health and wellbeing requires addressing spiritual and existential issues and healthcare is therefore challenged to respond to the ways spirituality is experienced and expressed in illness suffering healing and loss If healthcare has compassionate regard for the humanity of those it serves it is faced with questions about how it understands and interprets spirituality what resources it should make available and how these are organised and the ways in which spirituality shapes and informs the purpose and practice of healthcare These questions are the basis for this resource which presents a coherent field of enquiry discussion and debate that is interdisciplinary international and vibrant There is a growing corpus of articles in medical and healthcare journals on spirituality in addition to a wide range of literature but there has been no attempt so far to publish a standard text on this subject Spirituality in Healthcare is an authoritative reference on the subject providing unequalled coverage critical depth and an integrated source of key topics Divided into six sections including practice research policy and training the project brings together international contributions from scholars in the field to provide a unique and stimulating resource
