Philosophical Letters: or, modest Reflections upon some Opinions in Natural Philosophy Duchess of Margaret Cavendish Newcastle, 2019-12-05 In Philosophical Letters or Modest Reflections

upon some Opinions in Natural Philosophy Duchess of Margaret Cavendish Newcastle presents a fascinating exploration of early modern scientific thought through a series of letters that blend personal reflection with rigorous philosophical inquiry. Known for her innovative and often provocative style, Cavendish weaves her arguments with vivid imagery and a conversational tone, challenging the prevailing views of her contemporaries. Positioned at the intersection of the early feminist movement and burgeoning natural philosophy, her work engages with key topics such as atomism, the nature of matter, and the role of women in science, revealing her unique perspective as a woman innovator in a predominantly male sphere of intellectual discourse. A remarkable figure of the 17th century, Margaret Cavendish was an accomplished writer, philosopher, and scientist, deeply influenced by her upbringing and her social context. Living in an era of scientific revolution, she often faced gender-based biases which fueled her resolve to contribute to philosophical dialogues. Her nobility afforded her access to intellectual circles, yet she often countered the skepticism aimed at women in science with unapologetic eloquence and bold claims to knowledge, establishing herself as a credible voice in the discourse. *Philosophical Letters* is a must-read for anyone interested in the development of scientific thought and the emergence of women in intellectual history. The letters not only illuminate Cavendish's distinctive viewpoints but also encourage readers to reflect on the intersections of gender, philosophy, and science. This work is essential for scholars, students, and avid readers seeking to understand the depth of Cavendish's thought and the broader cultural shifts of her time.

Rousseau Timothy O'Hagan, 2003-09-02 Timothy O'Hagan investigates Jean Jacques Rousseau's writings concerning the formation of humanity of the individual and of the citizen in his three master works: the *Discourse on the Origin of Inequality among Men*, *Emile*, and the *Social Contract*. He explores Rousseau's reflections on the sexes, language, and religion. O'Hagan gives Rousseau's arguments a close and sympathetic reading. He writes as a philosopher, not a historian, yet he never loses sight of the cultural context of Rousseau's work.

New Being Kenan B. Osborne, 2013-11-21 The following study on Tillich's theology is based on a doctoral dissertation presented to the Ludwig Maximilian University at Munich in December 1967. Tillich's theology, however, is not a simple structure to analyze since it is so systematically interrelated. Certainly, every major area of his theological system involves all other major areas, and even the minor areas have complex ramifications to the total system itself. The following pages, therefore, can only be construed as one among many viewpoints of his system. Tillich's theological structure might be compared to a painting or some other work of art; one must view it now from this direction, now from that, in order to appreciate the total effect. Certain points should, however, be mentioned here. First of all, a key notion in this system is essentialization. This concept rounds off and completes Tillich's entire work. Unfortunately, Tillich himself did not write extensively on this topic, nor did he actually correlate it to the beginning and middle of his system, although it expresses the final telos of his entire theological work. I have drawn out of the *Systematic Theology* as much as possible on the subject of essentialization and have tried to analyze it in light of other key concepts in his system.
