Question Of Artificial Intelligence Philosophical And Sociological Perspectives:

The Question of Artificial Intelligence Brian P. Bloomfield,2018-05-15 Originally published in 1987 when Artificial Intelligence AI was one of the most hotly debated subjects of the moment there was widespread feeling that it was a field whose time had come that intelligent machines lay just around the corner Moreover with the onset of the revolution in information technology and the proclamation from all corners that we were moving into an information society developments in AI and advanced computing were seen in many countries as having both strategic and economic importance Yet aside from the glare of publicity that tends to surround new scientific ideas or technologies it must be remembered that AI was a relative newcomer among the sciences that it had often been the subject of bitter controversy and that though it had been promising to create intelligent machines for some 40 years prior to publication many believe that it had actually displayed very little substantive progress With this background in mind the aim of this collection of essays was to take a novel look at AI Rather than following the path of old well trodden arguments about definitions of intelligence or the status of computer chess programs the objective was to bring new perspectives to the subject in order to present it in a different light Indeed instead of simply adding to the endless wrangling for and against AI the source of such divisions is made a topic for analysis in its own right Drawing on ideas from the philosophy and sociology of scientific knowledge this collection therefore broke new ground Moreover although a great deal had been written about the social and cultural impact of AI little had been said of the culture of AI scientists themselves including their discourse and style of thought as well as the choices judgements negotiations and competitive struggles for resources that had shaped the genesis and development of the paradigmatic structure of their discipline at the time Yet sociologists of science have demonstrated that the analysis of factors such as these is a necessary part of understanding the development of scientific knowledge Hence it was hoped that this collection would help to redress the imbalance and provide a broader and more interesting picture of AI philosophical and sociological perspective in education Dr.M.KUMAR,2023-02-12 Presently he is working as a Principal at E G S Pillay College of education Nagappattinam District He has obtained B Sc degree in Geography and M Sc degree in Geography at Govt College Kumbakonam He completed his B Ed from institute of advanced study in education at saidapet Madras and M Ed degree in educational technology in Bharathidasan University at Tiruchirappalli He completed his M Phil Degree in Geography on Tamil university at Thanjavur He completed Dip VG In Bharathidasan University at Tiruchirappalli He completed Doctorate in education in ManonmaniamSundaranar University at Tirunalveli He has 13 years of teaching experiences in various college of education He has published research articles and presented research paper in national and international and had guided M Ed students in their research He is the author of books in 1 Teaching of history 2 Content and teaching of history 3 Special education 4 Innovation teaching history 5 Values and peace education 6 Teaching of childhood education 7 Teaching of geography 8 Pedagogy of history 9 Childhood and growing up 10 Environmental education

Herzfeld,2002 In Our Image brilliantly illuminates who we are as humans by demonstrating the surprisingly deep parallels between our motivations to replicate ourselves through computer technology and our emerging understanding of ourselves as relational beings created in God s image This book is required reading for anyone Christian or non Christian intrigued by the possibility of artificial intelligence Ecologies of Knowledge Susan Leigh Star,1995-01-01 This collection of articles provides a comprehensive overview of personal and public issues related to social change and how they shape scientific and technical knowledge Computation and Human Experience Philip Agre,1997-07-28 By paying close attention to the metaphors of artificial intelligence and their consequences for the field s patterns of success and failure this text argues for a reorientation of the field away from thought and toward activity It offers a critical reconstruction of AI research **Routledge Library Editions: Artificial Intelligence** Various,2021-06-23 Artificial Intelligence AI a term coined in the 1950s actually dates back as far as 1943 Now very much in the public consciousness AI research has fallen in and out of favour over the years Routledge Library Editions Artificial Intelligence 10 Volumes brings together as one set or individual volumes a small interdisciplinary series of previously out of print titles originally published between 1970 and 1994 Covering ground in computer science literature philosophy psychology

psychotherapy and sociology this set is a fascinating insight into the development of ideas surrounding AI Reporting on artificial intelligence UNESCO,2023-05-27 **Philosophy and Theory of Artificial Intelligence** Vincent C. Müller,2012-08-23 Can we make machines that think and act like humans or other natural intelligent agents The answer to this question depends on how we see ourselves and how we see the machines in question Classical AI and cognitive science had claimed that cognition is computation and can thus be reproduced on other computing machines possibly surpassing the abilities of human intelligence This consensus has now come under threat and the agenda for the philosophy and theory of AI must be set anew re defining the relation between AI and Cognitive Science We can re claim the original vision of general AI from the technical AI disciplines we can reject classical cognitive science and replace it with a new theory e g embodied or we can try to find new ways to approach AI for example from neuroscience or from systems theory To do this we must go back to the basic questions on computing cognition and ethics for AI The 30 papers in this volume provide cutting edge work from leading researchers that define where we stand and where we should go from here The Risk Perception of Artificial Intelligence Hugo Neri,Veridiana Domingos Cordeiro,2020-12-16 In The Risk Perception of Artificial Intelligence Hugo Neri examines how society has come to understand artificial intelligence by studying how cultural productions intellectuals and the media have shaped society s views understandings and fears of artificial intelligence As an abstract term artificial intelligence has been understood both as a discipline and a robot s mind In the twenty and twenty first centuries cultural representations in comics television shows and movies converged with public lectures about the risks of A I by prominent public figures such as Stephen Hawking and Elon Musk Neri analyzes how this cultural and intellectual miscellany shapes the way we perceive artificial intelligence and whether this perception is universal or restricted to the Western world
