Paton, 2015-12-22 This book begins by tracing the sea change in British politics from the 1970s to the end of the twentieth century The dominance of market ideology the decline of social democracy and the marketization of public policy are related to a widespread acceptance of globalization Contemporary global capitalism is analyzed not least as to its likely effect on countries such as Britain New Labour s Third Way is portrayed as reinforcing the apparent inevitability of globalization In this environment political and economic alternatives tend to be dismissed fatalistically Politics is no longer about real choice The second part of the book as well as sketching an economic alternative investigates how political theory and ethical concepts can help us today to re-establish the search for human freedom and a balanced society Such a vision can appeal to conservatives liberals and socialists alike It argues that a political coalition to further such ends is conceivable if very difficult to organise or maintain Finally the postmodern stance of eschewing ethical and political progress is criticized

War On Wealth, The: Fact And Fiction In British Finance Since 1800 Ranald Michie, 2023-03-21 This book addresses the divide that exists between the reality of finance and the image it projects A functioning financial system is an essential feature of a modern economy providing it with money credit capital and investments Conversely those who provide this essential service are neither respected nor trusted The causes and consequences of this divide is explored using the British experience from 1800 to the present drawing upon a mixture of factual evidence and contemporary fiction Nothing of this scale has been attempted before and this is the product of 50 years of research *A United Kingdom?* John Mohan, 2014-04-23 The human geography of the UK is currently being reshaped by a number of forces such as globalisation transition in the organisations of production the changing character of state intervention and changing relationships with Europe A consideration of the impacts of these forces on economic social and political landscapes is therefore an urgent task At the same time enduring institutional features of the British economy and polity are also having important influences on socio economic processes The result is a complex mosaic of uneven development which belies the notion of simplistic regional contrasts Rather than simply mapping spatial inequality *A United Kingdom* charts the processes underpinning uneven development at a range of scales and for a number of key topics The book draws upon and synthesises the latest contemporary research findings and places emphasis on the interrelated nature of economic social and political geographies It treats the human geographies of the UK in a coherent and integrated way and asks whether contemporary processes of change are tending towards the reduction of socio spatial divisions or their reproduction in new forms
