Difficult Questions Have Easy Answers Atina Hseham,2023-12-06 An inquiry made to obtain any information is known as an interrogation While asking the person tries to get an answer that allows him to satisfy his doubts The interviewers often ask simple questions in a very twisted fashion to confuse the candidates Difficult questions answers reflect the knowledge of the giver as well as his overall personality For example Which is heavier a kilogram of feathers or 1000 grams of lead Solution Both the weights are equal And What happened in Kolkata yesterday from 8 to 9 o'clock Solution An hour had passed These questions have a trick because they are framed in such a way that the answers seem simple but in reality they are not It can be said that the questioners confuse the candidates as they hide their answers using rhetorical resources and various devices In some cases the answer is found in the question itself but in secret Tricky questions are also used for fun or as a mental activity of logical practice Like a truck driver passing down a street in the wrong direction some policemen saw him but they didn't say anything to him why Solution Because the truck driver was on foot He shaves all day but still has a beard who is he Solution Barber Some months have thirty days and others thirty one but how many months have twenty eight Solution Every month has at least twenty eight days Which object becomes wet When it dries Solution Towel How do you draw a square with three lines Solution draw the square first and then draw three lines inside the square Thus an answer to a tricky question can lead to confusion due to the confusion generated question These types of questions are very specific to the areas in which people's knowledge or behavior is evaluated Generally such difficult questions can be perceived as misleading or incorrect because something is being implied that is not in reality However they can also be seen as methods whose precise purpose is to test the candidate and determine whether he or she is fully capable of answering the question that he or she is saying I know In this way about five thousand questions and answers have been given in the present book which is equally useful for all competitive examinations

Ant Encounters Deborah M. Gordon, 2010-03-22 How do ant colonies get anything done when no one is in charge An ant colony operates without a central control or hierarchy and no ant directs another Instead ants decide what to do based on the rate rhythm and pattern of individual encounters and interactions resulting in a dynamic network that coordinates the functions of the colony *Ant Encounters* provides a revealing and accessible look into ant behavior from this complex systems perspective Focusing on the moment to moment behavior of ant colonies Deborah Gordon investigates the role of interaction networks in regulating colony behavior and relations among ant colonies She shows how ant behavior within and between colonies arises from local interactions of individuals and how interaction networks develop as a colony grows older and larger The more rapidly ants react to their encounters the more sensitively the entire colony responds to changing conditions Gordon explores whether such reactive networks help a colony to survive and reproduce how natural selection shapes colony networks and how these structures compare to other analogous complex systems *Ant Encounters* sheds light on the organizational behavior ecology and evolution of these diverse and ubiquitous social insects
