#### **Thinking as**

**Communicating** Anna Sfard, 2008-01-21 This book is an attempt to change our thinking about thinking Anna Sfard undertakes this task convinced that many long-standing seemingly irresolvable quandaries regarding human development originate in ambiguities of the existing discourses on thinking Standing on the shoulders of Vygotsky and Wittgenstein the

author defines thinking as a form of communication The disappearance of the time honoured thinking communicating dichotomy is epitomised by Sfard s term commognition which combines communication with cognition The commognitive tenet implies that verbal communication with its distinctive property of recursive self reference may be the primary source of humans unique ability to accumulate the complexity of their action from one generation to another The explanatory power of the commognitive framework and the manner in which it contributes to our understanding of human development is illustrated through commognitive analysis of mathematical discourse accompanied by vignettes from mathematics classrooms

**The Deepest Human Life** Scott Samuelson,2015-04-03 Winner of the 2015 Hiatt Prize in the Humanities Sometimes it seems like you need a PhD just to open a book of philosophy We leave philosophical matters to the philosophers in the same way that we leave science to scientists Scott Samuelson thinks this is tragic for our lives as well as for philosophy In The Deepest Human Life he takes philosophy back from the specialists and restores it to its proper place at the center of our humanity rediscovering it as our most profound effort toward understanding as a way of life that anyone can live Exploring the works of some of history s most important thinkers in the context of the everyday struggles of his students he guides us through the most vexing quandaries of our existence and shows just how enriching the examined life can be Samuelson begins at the beginning with Socrates working his most famous assertion that wisdom is knowing that one knows nothing into a method a way of approaching our greatest mysteries From there he springboards into a rich history of philosophy and the ways its journey is encoded in our own quests for meaning He ruminates on Epicurus against the sonic backdrop of crickets and restaurant goers in Iowa City He follows the Stoics into the cell where James Stockdale spent seven years as a prisoner of war He spins with al Ghazali first in doubt then in the ecstasy of the divine And he gets the philosophy education of his life when one of his students who authorized a risky

surgery for her son that inadvertently led to his death asks with tears in her eyes if Kant was right if it really is the motive that matters and not the consequences Through heartbreaking stories humanizing biographies accessible theory and evocative interludes like *On Wine and Bicycles* or *On Zombies and Superheroes* he invests philosophy with the personal and vice versa The result is a book that is at once a primer and a reassurance that the most important questions endure coming to life in each of us

*Of Flies, Mice, and Men* François Jacob, 1998 Tells the story of how the marvelous discoveries of molecular and developmental biology are transforming our understanding of who we are and where we came from Jacob scrutinizes the place of the scientist in society Jacket
