The SAGE Encyclopedia of Action Research David Coghlan, Mary Brydon-Miller, 2014-08-11 Action research is a term used to describe a family of related approaches that integrate theory and action with a goal of addressing important organizational community and social issues together with those who experience them It focuses on the creation of areas for collaborative learning and the design enactment and evaluation of liberating actions through combining action and research reflection and action in an ongoing cycle of cogenerative knowledge While the roots of these methodologies go back to the 1940s there has been a dramatic increase in research output and adoption in university curricula over the past decade This is now an area of high popularity among academics and researchers from various fields especially business and organization studies education health care nursing development studies and social and community work The SAGE Encyclopedia of Action Research brings together the many strands of action research and addresses the interplay between these disciplines by presenting a state of the art overview and comprehensive breakdown of the key tenets and methods of action research as well as detailing the work of key theorists and contributors to action research

Travel and Tourism in the Age of Overtourism Claudio Milano, Marina Novelli, Joseph M. Cheer, 2021-03-29 Over the last decade while many scholars have maintained their interest in the classical debate concerning the impacts of tourism some have attempted new conceptualisations while others have converged towards critical narratives promoted by a number of social movements and have become involved in subsequent discussions on overtourism and tourismphobia The terms overtourism and tourismphobia have their genesis in the rapid unfolding of unsustainable mass tourism practices and the responses that these have generated amongst academics practitioners social movements and grassroots organizations concerned with the detrimental use of urban rural and coastal spaces among others for tourism purposes The renewed interest in the study of the adverse impacts of tourism as implied in the term overtourism is related to a variety of well established causes Travel and Tourism in the Age of Overtourism builds on existing knowledge and makes a theoretical and practical contribution the overtourism debate and the system dynamics underlining it This collection suggests ways to address this from a tourism and planning perspective It offers critical reflections on the contemporary evolution of tourism development and the implication of such processes on people places and spaces The chapters in this book were originally

published as a Special Issue of the journal Tourism Planning Development

Handbook of Methods in Cultural Anthropology H. Russell Bernard, Clarence C. Gravlee, 2014-07-08 Draws on both science and humanism to explore the scope of contemporary anthropological fieldwork in practice This thoroughly revised second edition also features new chapters addressing online ethnography mixed methods and social survey research and network and geospatial analysis

Love and Technology Fabian Broeker, 2023-12-22 Love and Technology An Ethnography of Dating App Users in Berlin explores how dating apps fit into Berlin's unique dating culture and brand of intimacy and form a tangible nucleus around which users navigate dating rituals romantic biographies and digitally mediated intimacies within city space Drawing on the field of digital anthropology this book takes the form of an immersive ethnography resulting from 13 months of fieldwork with young dating app users across Tinder Bumble and OkCupid in Berlin It argues that dating apps offer or impose depending on their context of use a series of affordances These affordances and the technological devices they rely upon exist through the relation between users and their environment both in terms of physical spaces and cultural frameworks The book posits that dating apps are woven into spatial practices and self narrativisation constituting imagined communities for their users as well as a canvas alongside the city of Berlin against which to characterise romantic experiences Scholars interested in digital anthropology ethnography dating and regional Berlin will find that Love and Technology offers a vibrant springboard for thinking through both theoretical and methodological concerns

Sociopolitics of Migrant Death and Repatriation Krista E. Latham, Alyson J. O'Daniel, 2017-10-03 As scholars have by now long contended global neoliberalism and the violence associated with state restructuring provide key frameworks for understanding flows of people across national boundaries and eventually into the treacherous terrains of the United States borderlands The proposed volume builds on this tradition of situating migration and migrant death within broad systems level frameworks of analysis but contends that there is another perhaps somewhat less tidy but no less important sociopolitical story to be told here Through examination of how forensic scientists define navigate and enact their work at the frontiers of US policy and economics this book joins a robust body of literature dedicated to bridging social theory with bioarchaeological applications to modern day problems This volume is based on deeply and critically reflective analyses submitted by individual scholars wherein they navigate and position themselves as social actors embedded within and perhaps partially constituted by relations of power cultural ideologies and the social structures characterizing this moment in history Each contribution addresses a different variation on themes of power relations production of knowledge and reflexivity in practice In sum however the chapters of this book trace relationships between institutions entities and individuals comprising the landscapes of migrant death and repatriation and considers their articulation with sociopolitical dynamics of the neoliberal state

Fedorak,2012-10-24 Anthropology Matters places the study of anthropology concretely in the world by which it is surrounded It takes a question based approach to introducing important anthropological concepts by embedding those concepts in contemporary global issues that will interest students The second edition of this popular text has been updated throughout and includes four new chapters on language revitalization social media and social revolutions human migration and the role of NGOs in international development practice Students can now engage with the most up to date issues while learning to think anthropologically *Systematic Methods for Analyzing Culture* H.J. François Dengah II,Jeffrey G. Snodgrass,Evan R. Polzer,William Cody Nixon,2020-12-29 Systematic Methods for Analyzing Culture is a practical manual that provides step by step instruction for collecting and analyzing cultural data This compact guide explains complex topics in straightforward and practical terms via research examples textual and visual software guides and hands on exercises Through each chapter s introductory examples the manual illustrates how socially learned knowledge provides group members with shared understandings of the world which allow for mutually intelligible interactions The authors then carefully walk readers through the process of eliciting those socially learned shared and thus cultural representations of reality which structure the thinking and practice of individuals inhabiting social groups Specifically the book shows how

researchers can elicit such thought and behavior via methods such as free lists pile sorts cultural consensus and consonance analysis textual analysis and personal network research The book will help both undergraduate and graduate students identify ways to unpack the black box of culture which may be absent or given only cursory attention within their training and respective fields The book's clear and systematic step by step walkthroughs of each method will also encourage more established researchers educators and practitioners from diverse fields and with varying levels of experience to integrate techniques for assessing cultural processes into their research teaching and practice The Art of Fieldwork Harry F. Wolcott, 2005 In this long anticipated second edition of The Art of Fieldwork prominent anthropologist Harry F. Wolcott updates his original groundbreaking text which both challenges and petitions anthropology and its practitioners to draw not only on the traditional precepts of science but also on the richness of artistry in the collection interpretation and expression of fieldwork data Each of the original chapters have been thoughtfully revised to reflect the past nine years of anthropological development Combined with a new final chapter this refreshing text makes an exciting reentry into the ongoing debate of the processes challenges and rewards of fieldwork methodology Researchers in qualitative methods and field methods and fieldworkers across disciplines will find this well crafted approachable book a thought provoking read
