Heading Toward Omega Kenneth Ring, 1984 *Heading Toward Omega* breaks new ground in near death studies by focusing on the meaning of the near death experience for the survivor and for human evolution A near death experience or NDE which an estimated eight million Americans have had occurs when a person is clinically dead but then survives and reports such phenomena as floating out of the body entering a dark tunnel reviewing a life panorama and encountering a brilliant white light Such accounts have been described in best sellers by Raymond A Moody and Elisabeth Kubler Ross and in Kenneth Ring's previous book *Life at Death* they were documented for the first time Dr Ring's intensive three year search for the meaning of the near death experience has been pursued through both scientifically designed questionnaires completed by hundreds of experiencers and wide ranging interviews many with persons who have reported unusually deep NDEs from which he quotes frequently and copiously From this study emerges a provocative pattern of very positive changes in outlook values and behavior following a near death experience often a complete transformation of personality Dr Ring also finds that NDEs are often powerful catalysts for spiritual awakening and psychic development Moreover deep NDEs frequently include strikingly similar visions of our planetary future The depth and consistency of these life transformations as well as the apparent widespread and increasing incidence of the NDE itself lead Dr Ring to a startling conclusion Near death experiences may be part of an evolutionary thrust toward higher consciousness for all humanity Thus they may foreshadow the birth of a new planetary consciousness as we head toward Omega the final goal of human evolution front and back flaps
