Measurements: Right ventricular pressure

Interpretation: ↑ CVP = R ventricular failure or volume overload

↓ CVP = hypovolemia

disorders: atrial contraction

disorders: pleural effusion

disorders: low SV output

disorders: atrial filling

Venous O₂ Saturation

Measurements: O₂ saturation in venous blood (SvO₂) mixed venous O₂ (SvO₂)

Interpretation: ↑ SvO₂ = SvO₂ (80-93%)

= ↑ O₂ supply + ↓ O₂ demand
- more O₂ than needed - ↓ ability to use O₂ - hyperthermia

Normal SvO₂ = SvO₂ (60-80%)

= balanced O₂ supply + demand

↓ SvO₂ = SvO₂ (<60%)

= ↓ Rtg., ↓ SvO₂, ↓ CO, ↑ O₂ demand

Adams,Dominic Bell,Justin McKinlay,2010-01-18 Brain injury is a

worldwide leading cause of mortality and morbidity and requires early and appropriate management to minimize these adverse sequelae. Despite such needs, access to specialist centers is limited, forcing both immediate and secondary care of these patients onto generalist staff. These responsibilities are made more problematical by differences in patient management between and even within specialist centers due in part to an insufficient evidence base for many interventions directed at brain injury. This book is borne out of the above observations and is targeted at emergency and acute medicine, anesthetic and general intensive care staff caring for brain injury of diverse etiology or surgical teams responsible for the inpatient care of minor to moderate head trauma. Although explaining the various facets of specialist care, the book is not intended to compete with texts directed at neurosciences staff but aims to advise on optimal care in general hospitals including criteria for transfer by a combination of narrative on pathophysiology, principles of care, templates for documentation and highly specific algorithms for particular problems. It is intended that the content and structure can form the basis of guidelines and protocols that reflect the needs of individual units and that can be constantly refined. Our ultimate goal is to promote informed, consistent, auditable multidisciplinary care for this cohort of patients and we hope that this text contributes to that process.
