Quick Analysis For Busy Decision Makers:

Tools for Making Acute Risk Decisions CCPS (Center for Chemical Process Safety), 2010-09-14 The complexity of today's risk decisions is well known. Beyond cost and risk, there are many other factors contributing to these decisions including type of risk such as human injury or fatality, the economic impact on the local community, profitability, availability of capital, alternatives for reducing or eliminating the risk, costs of implementing alternatives, codes, standards, regulation, and good industry practice. This book presents a large range of decision aids for risk analysts and decision makers in industry so that vital decisions can be made in a more consistent, logical, and rigorous manner. Though primarily aimed at the process industry, this book can be used by anyone who makes similar decisions in other industries, including those in management science.

The Adaptive Decision Maker John W. Payne, James R. Bettman, Eric J. Johnson, 1993-05-28 The Adaptive Decision Maker argues that people use a variety of strategies to make judgments and choices. The authors introduce a model that shows how decision makers balance effort and accuracy considerations and predicts which strategy a person will use in a given situation. A series of experiments testing the model are presented, and the authors analyze how the model can lead to improved decisions and opportunities for further research.

Basic Methods of Policy Analysis and Planning Carl Patton, David Sawicki, Jennifer Clark, 2015-08-26 Updated in its 3rd edition, Basic Methods of Policy Analysis and Planning presents quickly applied methods for analyzing and resolving planning and policy issues at state, regional, and urban levels. Divided into two parts, Methods, which presents quick methods in nine chapters and is organized around the steps in the policy analysis process, and Cases, which presents seven policy cases ranging in degree of complexity, the text provides readers with the resources they need for effective policy planning and analysis. Quantitative and qualitative methods are systematically combined to address policy dilemmas and urban planning problems. Readers and analysts utilizing this text gain comprehensive skills and background needed to impact public policy.

Insights in Decision Making Robin M. Hogarth, 1990-04-18 How do people make decisions? How can we help people make better decisions? How can we best study the processes of decision making? The growing field of behavioral decision research, which seeks to link observed decision behavior to underlying psychological mechanisms, may provide the answers to these questions. The volume is based on a recent conference held to honor the work and memory of the late Hillel J. Einhorn, a pioneering scholar in behavioral decision research. Composed of contributions by leading researchers, Insights in Decision Making provides a state-of-the-art image of work in this field. The range of topics covered includes conceptual and technical issues that bridge the gap between theory and the practical concern of improving decision-making difficulties in statistical thinking, experimental studies of processes of judgment and choice, and the emergence of new paradigms for studying decision behavior. Providing many avenues for future research, Insights in Decision Making will be essential reading for students of the psychology of decision making and will prove valuable to readers in psychology, economics, statistics, and management.

Decision Making in Aviation Don Harris, 2017-07-05 Decision making pervades every aspect of life people make hundreds of decisions every day The vast majority of these are trivial and without a right or wrong answer In some respects there is also nothing extraordinary about pilot decision making It is only the setting that is different the underlying cognitive processes are just the same However it is the context and the consequences of a poor decision which serve to differentiate aeronautical decision making Decisions on the flight deck are often made with incomplete information and while under time pressure The implications for inadequate performance is much more serious than in many other professions Poor decisions are implicated in over half of all aviation accidents This volume contains key papers published over the last 25 years providing an overview of the major paradigms by which aeronautical decision making has been investigated Furthermore decision making does not occur in isolation It is a joint function of the flight tasks knowledge equipment on the flight deck and other stressors In this volume of collected papers works from

Dale, Mary R. English, 2012-11-26

Environmental decision making is like politics mostly local In fact making decisions about the environment at the subnational level in state regional and local jurisdictions is a lot like politics For resolving environmental issues demands but often resists a balance between deeply held feelings and stark confrontations among opposing views This volume describes tools that should make the decision maker's lot a bit more tolerable The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people's fundamental values What they can help do is to keep the debate focused on the important issues to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnational level a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the

other way **Risk Management and Governance** Terje Aven,Ortwin Renn,2010-09-27 Risk is a popular topic in many sciences in natural medical statistical engineering social economic and legal disciplines Yet no single discipline can grasp the full meaning of risk Investigating risk requires a multidisciplinary approach The authors coming from two very different disciplinary traditions meet this challenge by building bridges between the engineering the statistical and the social science perspectives The book provides a comprehensive accessible and concise guide to risk assessment management and governance A basic pillar for the book is the risk governance framework proposed by the International Risk Governance Council IRGC This framework offers a comprehensive means of integrating risk identification assessment management and communication The authors develop and explain new insights and add substance to the various elements of the framework The theoretical analysis is illustrated by several examples from different areas of applications **Politics of the Administrative Process** Donald F. Kettl,2024-01-08 Politics of the Administrative Process gives students a realistic relevant and well researched view of the field while remaining reader friendly with engaging vignettes and rich current examples With a unique focus on policymaking and politics the Ninth Edition continues its strong emphasis on politics accountability and performance **Intelligent Decision Support in Process Environments** E. Hollnagel,G. Mancini,D. D. Woods,2013-11-11 Proceedings of the NATO Advanced Study Institute on Intelligent Decision Support in Process Environments held in San Miniato Italy September 16 27 1985 **Paid and Unpaid Labour in the Social Economy** Sergio Destefanis,Marco Musella,2009-04-30 The book provides an up to date analytical and empirical treatment of some important interactions between paid and unpaid labour and the social economy The emphasis on the motivations for paid and unpaid labour and on how these factors contribute to efficiently providing social services gives a clear empirical counterpart to the concept of social economy The book begins with a theoretical perspective on the development and characteristics of paid and unpaid labour in social services Several empirical analyses largely using novel data sets are then provided about these phenomena in Italy a country which has drawn broad international attention in this field as well as in other European countries and in the US Topics of particular interest include preferences regarding and satisfaction with paid and unpaid labour ownership structure and risk ownership structure remuneration and incentives for paid labour characteristics of volunteer labour and its relationship with social capital endowment across Italian regions and a comparative analysis of labour in the nonprofit sector across Europe **A Plea for Plausibility** John R. Welch,2023-03-17 This book develops an original theory of decision making based on the concept of plausibility The author advocates plausible reasoning as a general philosophical method and demonstrates how it can be applied to problems in argumentation theory scientific theory choice risk management ethics law economics and epistemology Human decisions are conditioned by formidable uncertainty The standard resource for dealing rationally with uncertainty is the mathematical concept of probability The probability calculus is well known but since the numerical demands for applying it cannot usually be met it is not widely applicable By contrast

the concept of plausibility is widely applicable but it is little known This book relies on a generalized concept of plausibility whose strength is its adaptability The adaptability is due to a novel form of decision theory that takes plausibilities as inputs This form of decision theory remains applicable to decisions informed by sharp probabilities and utilities but it can also be applied to decisions that must be made without them It can aid in the rationally critical enterprise of discriminating good arguments from bad and this can foster philosophical progress A Plea for Plausibility will be of interest to scholars and advanced students working in argumentation theory philosophy of science ethics epistemology economics law and risk management **Realistic Decision Theory** Paul Weirich, 2004-09-16 Paul Weirich generalizes classical decision principles so that they apply to fallible cognitively limited agents facing complex decision problems His systematic approach to removal of decision theory's idealizations yields attainable but precise standards of rationality *Viable Populations for Conservation* Michael E. Soulé, 1987-08-13 This book addresses research in the rapidly developing integration of conservation biology with population biology
