An Inclusive Academy Abigail J. Stewart, Virginia Valian, 2018-07-17 How colleges and universities can live up to their ideals of diversity and why inclusivity and excellence go hand in hand Most colleges and universities embrace the ideals of diversity and inclusion but many fall short especially in the hiring retention and advancement of faculty who would more fully represent our diverse world in particular women and people of color In this book Abigail Stewart and Virginia Valian argue that diversity and excellence go hand in hand and provide guidance for achieving both Stewart and Valian themselves senior academics support their argument with comprehensive data from a range of disciplines They show why merit is often overlooked they offer statistics and examples of individual experiences of exclusion such as being left out of crucial meetings and they outline institutional practices that keep exclusion invisible including reliance on proxies for excellence such as prestige that disadvantage outstanding candidates who are not members of the white male majority Perhaps most important Stewart and Valian provide practical advice for overcoming obstacles to inclusion This advice is based on their experiences at their own universities their consultations with faculty and administrators at many other institutions and data on institutional change Stewart and Valian offer recommendations for changing structures and practices so that people become successful in ways that benefit everyone They describe better ways of searching for job candidates evaluating candidates for hiring tenure and promotion helping faculty succeed and broadening rewards and recognition *Quick Filing Practice -Tm and Key* Noel Stewart, 1989-01-01

Nurse as Educator Susan B. Bastable, 2007-12-12 Nurse as Educator Principles of Teaching and Learning for Nursing Practice prepares nurse educators clinical nurse specialists and nurse practitioners for their ever increasing roles in patient teaching health education health promotion and nursing education Designed to teach nurses about the development motivational and sociocultural differences that affect teaching and learning this text combines theoretical and pragmatic content in a balanced complete style The Third Edition of this best selling text has been updated and revised to include the latest research Nurse as Educator is used extensively in nursing education courses and programs as well as in both institutional and community based settings **Fortune** Henry Robinson Luce, 1998 *Clinical Case Studies for the*

Family Nurse Practitioner Leslie Neal-Boylan, 2011-11-28 Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing diagnosing and managing cases in family and primary care Composed of more than 70 cases ranging from common to unique the book compiles years of experience from experts in the field It is organized chronologically presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format This includes differential diagnosis and a series of critical thinking questions ideal for self assessment or classroom use **STOP, THAT and One Hundred Other Sleep Scales**

Azmeh Shahid, Kate Wilkinson, Shai Marcu, Colin M Shapiro, 2012-01-06 There are at least four reasons why a sleep clinician should be familiar with rating scales that evaluate different facets of sleep First the use of scales facilitates a quick and

accurate assessment of a complex clinical problem In three or four minutes the time to review ten standard scales a clinician can come to a broad understanding of the patient in question For example a selection of scales might indicate that an individual is sleepy but not fatigued lacking alertness with no insomnia presenting with no symptoms of narcolepsy or restless legs but showing clear features of apnea exhibiting depression and a history of significant alcohol problems This information can be used to direct the consultation to those issues perceived as most relevant and can even provide a springboard for explaining the benefits of certain treatment approaches or the potential corollaries of allowing the status quo to continue Second rating scales can provide a clinician with an enhanced vocabulary or language improving his or her understanding of each patient In the case of the sleep specialist a scale can help him to distinguish fatigue from sleepiness in a patient or elucidate the differences between sleepiness and alertness which is not merely the inverse of the former Sleep scales are developed by researchers and clinicians who have spent years in their field carefully honing their preferred methods for assessing certain brain states or characteristic features of a condition Thus scales provide clinicians with a repertoire of questions allowing them to draw upon the extensive experience of their colleagues when attempting to tease apart nuanced problems Third some scales are helpful for tracking a patient's progress A particular patient may not remember how alert he felt on a series of different stimulant medications Scale assessments administered periodically over the course of treatment provide an objective record of the intervention allowing the clinician to examine and possibly reassess her approach to the patient Finally for individuals conducting a double blind crossover trial or a straightforward clinical practice audit those who are interested in research will find that their own clinics become a source of great discovery Scales provide standardized measures that allow colleagues across cities and countries to coordinate their practices They enable the replication of previous studies and facilitate the organization and dissemination of new research in a way that is accessible and rapid As the emphasis placed on evidence based care grows a clinician's ability to assess his or her own practice and its relation to the wider medical community becomes invaluable Scales make this kind of standardization possible just as they enable the research efforts that help to formulate those standards The majority of Rating Scales in Sleep and Sleep Disorders 100 Scales for Clinical Practice is devoted to briefly discussing individual scales When possible an example of the scale is provided so that readers may gain a sense of the instrument's content Groundbreaking and the first of its kind to conceptualize and organize the essential scales used in sleep medicine Rating Scales in Sleep and Sleep Disorders 100 Scales for Clinical Practice is an invaluable resource for all clinicians and researchers interested in sleep disorders

Communities in Action National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Community-Based Solutions to Promote Health Equity in the United States, 2017-03-27 In the United States some populations suffer from far greater disparities in health than others Those disparities are caused not only by fundamental differences in health status across segments of the population but also

because of inequities in factors that impact health status so called determinants of health Only part of an individual s health status depends on his or her behavior and choice community wide problems like poverty unemployment poor education inadequate housing poor public transportation interpersonal violence and decaying neighborhoods also contribute to health inequities as well as the historic and ongoing interplay of structures policies and norms that shape lives When these factors are not optimal in a community it does not mean they are intractable such inequities can be mitigated by social policies that can shape health in powerful ways Communities in Action Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States This report focuses on what communities can do to promote health equity what actions are needed by the many and varied stakeholders that are part of communities or support them as well as the root causes and structural barriers that need to be overcome
