Matthias Hoch:

Matthias Hoch Matthias Hoch, 2005 Building facades parking decks functional structures Matthias Hoch's photographs are images of contemporary urbanity His photos expose the materials of the modern age in all of their austere sensuality Objects are positioned precisely and with a keen sense of surface quality in the pictorial format and often evoke irritatingly ambiguous and puzzling effects by virtue of the artist's choice of scale and perspective Beginning with the rapidly changing urban landscapes of eastern Germany the photographer has been exploring the formal language of modern European urban development The views he presents seem virtually impossible to localize They document Hoch's critical analytical approach to the space around us yet they also exhibit a remarkable sculptural quality Jaquette **Limited overview** Claudio Hils, 2002 **Made in Leipzig** Sammlung Essl, 2006 **The Genesis of the Symbolic** Arno Schubbach, 2021-11-22 Ernst Cassirer's philosophy of culture has been much discussed in recent years However it remains unclear how it evolved from his older theory of knowledge This study deals with this question on the basis of Cassirer's disposition of a philosophy of the symbolic reconstructed here for the first time This text shows that the symbolic refers to culture as a whole and to its inherent diversity Therefore the symbolic includes the relationship between the general transcendental conditions of culture and its empirical specificities in language and languages art and the arts myth and myths science and disciplines Cassirer does not comprehend this empirical and specific reality of symbolization depending on pre-existing transcendental conditions Instead he proceeds from the empirical diversity of the symbolisations and reflects on their simultaneously general and specific conditions Thus Cassirer embarks on a path that he finds paved in Kant's Critique of Judgement He consequently defines the symbolic as the horizon for a reflective approach based on empirical findings and not as the foundation of a systematic derivation of the diversity of culture in the style of the idealistic tradition **Matthias Hoch, Begrenzte Übersicht, Limited overview** Claudio Hils, 2002 **Lower-Dimensional Systems and Molecular Electronics** Robert M. Metzger, Peter R. Day, George C. Papavassiliou, 2013-11-11 This volume represents the written account of the NATO Advanced Study Institute Lower Dimensional Systems and Molecular Electronics held at Hotel Spetses Spetses Island Greece from 12 June to 23 June 1989 The goal of the Institute was to demonstrate the breadth of chemical and physical knowledge that has been acquired in the last 20 years in inorganic and organic crystals polymers and thin films which exhibit phenomena of reduced dimensionality The interest in these systems started in the late 1960's with lower dimensional inorganic conductors in the early 1970's with quasi one dimensional crystalline organic conductors which by 1979 led to the first organic superconductors and in 1977 to the FITSt conducting polymers The study of monolayer films Langmuir Blodgett films had progressed since the 1930's but reached a great upsurge in the early 1980's The pursuit of non linear optical phenomena became increasingly popular in the early 1980's as the attention turned from inorganic crystals to organic films and polymers And in the last few years the term molecular electronics has gained ever increasing acceptance although it is used in several

contexts We now have organic superconductors with critical temperatures in excess of 10 K conducting polymers that are soluble and processable and used commercially we have films of a few monolayers that have high in plane electrical conductivity and polymers that show great promise in photonics we even have a few devices that function almost at the molecular level

Contemporary Visual Arts, 2001 *The Pennsylvania-German Society: 1914*, 1891 Includes proceedings addresses and annual reports *Artistic Reconfigurations of Rome* Kaspar Thormod, 2019-04-09 In *Artistic Reconfigurations of Rome* Kaspar Thormod examines how visions of Rome manifest themselves in artworks produced by international artists who have stayed at the city's foreign academies Structured as an alternative guide to Rome the book represents an interdisciplinary approach to creating a dynamic visual history that brings into view facets of the city's diverse contemporary character Thormod demonstrates that when artists successfully reconfigure Rome they provide us with visions that being anchored in a present undermine the connotations of permanence and immovability that cling to the Eternal City epithet Looking at the work of these artists the reader is invited to engage critically with the question what is Rome today or perhaps better what can Rome be

Europe in Upheaval Michaela Nicole Raß, Kay Wolfinger, 2022-09-01 This volume on the term Europe is based on a conference that took place in the winter of 2018 at the Carl Friedrich von Siemens Foundation in Munich Europe in its complexity in its character of radical change and its power of fascination is of unbroken topicality At the same time European identity is endangered by current challenges such as populism and the rise of nationalism The contributions to the conference address the question of the extent to which contemporary literature and also current films react to these upheavals and to what extent the talk of a crisis in Europe or European integration is perceptible in the areas of literature and film This book is a translation of the original German 1st edition *Europa im Umbruch* edited by Michaela Nicole Ra and Kay Wolfinger published by Springer Verlag GmbH Germany part of Springer Nature in 2020 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors
