Jesús Peláez, Juan Mateos, 2018-08-21 This text brings together in one volume two previous books that laid the groundwork for the construction of the entries in *Diccionario Griego Español del Nuevo Testamento* Greek Spanish Dictionary of the New Testament namely *Metodo de Análisis semántico aplicado al griego del Nuevo Testamento* Method of Semantic Analysis applied to the Greek of the New Testament and *Metodología del Diccionario Griego Español del Nuevo Testamento* Methodology of the Greek Spanish Dictionary of the New Testament by Juan Mateos and Jesús Peláez In the introduction and first part of the text the concepts of dictionary and meaning are defined and a critical analysis of the dictionaries of F Zorell W Bauer Bauer Aland and Louw Nida is conducted Their methodologies are examined with the purpose of then presenting a method of semantic analysis and the steps for establishing the semantic formula of the various classes of lexemes which functions as the basis for determining lexical and contextual meaning In the second part the necessary steps for composing the dictionary's entries are proposed The text concludes with an analysis of related lexemes in order to demonstrate the accuracy of the suggested method For the first time a carefully developed method of semantic analysis and the corresponding methodology are presented before the construction of the dictionary's entries      Description, Sign, Self, Desire

Tasso Borbé, 2015-09-25 No detailed description available for *Semiotics Unfolding*      *Reading Images and Seeing Words*, 2021-11-01 The simultaneously tautological and oxymoronic nature of word image relations has become a subject of massive debate in the post modern period This is not only because of the increasing predominance of word image messages within our modern media saturated culture but also because intellectual disciplines are becoming increasingly sensitized to the essentially hybrid nature of the way we construct meaning in the world The essays in this volume offer an exemplary insight into both aspects of this phenomenon Focussing on both traditional and modern media theatre fiction poetry graphic art cinema the essays of *Reading Images and Seeing Words* are deeply concerned to show how it is according to signifying codes rhetoric poetics metaphor that meaning and knowledge are produced Not the least value of this collection is the insight it gives into the multiple models of word image interaction and the rich ambiguity of the tautological and oxymoronic relations they embody      **Subjectivity and Identity**

Peter V. Zima, 2015-06-18 *Subjectivity and Identity* is a philosophical and interdisciplinary study that critically evaluates critically the most important philosophical sociological psychological and literary debates on subjectivity and the subject Starting from a history of the concept of the subject from modernity to postmodernity from Descartes and Kant to Adorno and Lyotard Peter V Zima distinguishes between individual collective mythical and other subjects Most texts on subjectivity and the subject present the topic from the point of view of a single discipline philosophy sociology psychology or theory of literature In *Subjectivity and Identity* Zima links philosophical approaches to those of sociology psychology and literary criticism The link between philosophy and sociology is social philosophy e g Althusser Marcuse Habermas the link between philosophy and literary criticism is aesthetics e g Adorno

Lyotard Vattimo Philosophy and psychology can be related thanks to the psychological implications of several philosophical concepts of subjectivity Hobbes Stirner Sartre

**A Rhetoric of the Unreal** Christine Brooke-Rose, 1981-10-15 This 1981 book is a study of wide range of fiction from short stories to tales of horror from fairy tales and romances to science fiction to which the rather loose term fantastic has been applied Cutting across this wide field Professor Brooke Rose examines in a clear and precise way the essential differences between these types of narrative against the background of realistic fiction In doing so she employs many of the methods of modern literary theory from Russian formalism to structuralism while at the same time bringing to these approaches a sharp critical intuition and sound common sense of her own The range of texts considered is broad from Poe and James to Tolkien from Flann O'Brien to the American postmodernism This book should prove a source of stimulation to all teachers and students of modern literary theory and genre as well as those interested in fantastic literature

**What Is Narratology?** Tom Kindt, Hans-Harald Müller, 2008-08-22 What Is Narratology sees itself as contributing to the intensive international discussion and controversy on the structure and function of narrative theory The 14 papers in the volume advance proposals for determining the object of narratology modelling its concepts and characterising its status within cultural studies

*The Study of the New Testament* Antonio Piñero, Jesus Peláez, 2019-11-26 The most thorough grounding available in the various disciplines of NT study this is an invaluable tool for students scholars and other serious readers of the earliest Christian writings With a full survey of scholarship on each topic in 600 packed pages the volume gives a reliable in depth presentation of the history of interpretation the NT canon text criticism the language of the NT the historical and literary context methods and approaches

*Possible Worlds, Artificial Intelligence, and Narrative Theory* Marie-Laure Ryan, 1991 In this important contribution to narrative theory Marie Laure Ryan applies insights from artificial intelligence and the theory of possible worlds to the study of narrative and fiction For Ryan the theory of possible worlds provides a more nuanced way of discussing the commonplace notion of a fictional world while artificial intelligence contributes to narratology and the theory of fiction directly via its researches into the cognitive processes of texts and automatic story generation Although Ryan applies exotic theories to the study of narrative and to fiction her book maintains a solid basis in literary theory and makes the formal models developed by AI researchers accessible to the student of literature By combining the philosophical background of possible world theory with models inspired by AI the book fulfills a pressing need in narratology for new paradigms and an interdisciplinary perspective
