Bad Old Days Alan J. Levine, 2011-12-31 For many especially those on the political left the 1950s are the bad old days The widely accepted list of what was allegedly wrong with that decade includes the Cold War McCarthyism racial segregation self satisfied prosperity and empty materialism The failings are coupled with ignoring poverty and other social problems complacency conformity the suppression of women and puritanical attitudes toward sex In all the conventional wisdom sees the decade as bland and boring with commonly accepted people paralyzed with fear of war Communism or McCarthyism or all three Alan J Levine shows that the commonly accepted picture of the 1950s is flawed It distorts a critical period of American history That distortion seems to be dictated by an ideological agenda including an emotional obsession with a sentimentalized version of the 1960s that in turn requires maintaining a particular misleading view of the post World War II era that preceded it Levine argues that a critical view of the 1950s is embedded in an unwillingness to realistically evaluate the evolution of American society since the 1960s Many and not only liberals and those further to the left desperately desire to avoid seeing or admitting just how badly many things have gone in the United States since the 1960s *Bad Old Days* shows that the conventional view of the 1950s stands in opposition to the reality of the decade Far from being the dismal prelude to a glorious period of progress the postwar period of the late 1940s and 1950s was an era of unprecedented progress and prosperity This era was then derailed by catastrophic political and economic misjudgments and a drastic shift in the national ethos that contributed nothing or less than nothing to a better world

Voices Prophesying War Ignatius Frederick Clarke, 1992 The literature of future wars is an exciting and popular genre embracing classics such as *The War of the Worlds* and mass market bestsellers such as *The Amtrak Wars* Here sci fi meets the spy thriller the war novel meets the novel of dystopia quality fiction meets the bestseller Orwell's *Nineteen Eighty Four* Erskine Childers' *The Riddle of the Sands* and Ray Bradbury's *Fahrenheit 451* are typical in combining critical and commercial success This new edition of *Voices Prophesying War* shows how the genre developed accounts for its success and describes how it is still changing The first examples of such fiction are as much concerned with politics as with war *The Anonymous Reign of George VI* published in 1763 and set in 1918 describes the triumphant imperialism of an English monarch who still leads his troops into battle on horseback A century later the first recognizable classic of the genre *The Battle of Dorking* played on the theme of unpreparedness for war describing a Prussian invasion of the British Isles Imaginary invasions by the French Germans Americans Russians Soviets and of course Martians followed in huge numbers Throughout the nineteenth century novelists wrote with increasing sophistication on the technology of war often as in the case of Conan Doyle and H G Wells they were in advance of the generals and scientists and their prophesies were fulfilled in

terrible fashion by two world wars Since the Second World War American authors have come to the fore and the nuclear age has produced such classics as Nevil Shute's *On the Beach* The Cold War has also given rise to a great many bestsellers some like General Sir John Hackett's *The Third World War* marking a return to an older theme of predictions of war by professional soldiers This new edition of *Voices Prophesying War* examines recent work in detail and includes a unique checklist of all major future war fiction in English French and German to have appeared since the eighteenth century **Beacham's Encyclopedia of Popular Fiction: Achebe-Gaddis. v. 2.
