Volume 4 Nora Crook, 2020-04-27 This collection covers the lyrical poetry of Mary Shelley as well as her writings for Lardner's Cabinet Cyclopaedia of Biography and some other materials only recently attributed to her [The Radical Ecology of the Shelleys](#) Colin Carman, 2018-11-07 The Radical Ecology of the Shelleys Eros and Environment is the first full length study to explore a radically queer ecology at work in writings by Percy Bysshe Shelley and Mary Wollstonecraft Shelley as their discussions of nature and the natural consistently link ecology and erotic practice Initiated by Timothy Morton in 2010 as a hybrid of two schools of thinking about nature queer ecology combines the alertness of environmentalists to constructions of the natural with efforts of sexuality scholars to denaturalize identity and to expose sexuality as a culture bound construct Conceptions of place are central to this investigation not only because an attachment to place is traditionally thought to be the ontological basis of all environmental consciousness e.g. think globally act locally but because these two Romantic writers underscore the dynamic interaction between a person's natural surroundings and his/her interpersonal attachments The poetical and prose writings of the Shelleys claim our special attention because of their

unusual conception of the oikos the etymological root of ecology to mean both local grounds and the social often domestic places in which people dwell and desire The overarching thesis of this book asserts that proto ecological theories in Romantic era England cannot be understood separately from discourses related to married family life and the texts considered demonstrate the comingling of earthly and erotic enjoyment The issues raised by Eros and Environment are fundamental not only to literary and queer history but to all humanistic studies They render the study of nature from a queer perspective a matter of intense interest to scholars in numerous disciplines ranging from ecocriticism and the natural sciences including climate studies to feminist criticism and sexuality studies

Romantic Childhood, Romantic Heirs Beatrice Turner, 2017-10-17 This book views Romantic literature s discourses of childhood education and reproduction through the

eyes of four early nineteenth century British authors who were uniquely implicated in those discourses Hartley and Sara Coleridge children of Samuel Taylor Coleridge and Mary Wollstonecraft Shelley and William Godwin Jr children of William Godwin shared the predicament of being both real and literary children All the children of authors who helped shape culturally definitive Romantic period ideas about childhood they wrote back to their fathers in order to understand and to resist the ways in which they were produced by paternal texts which foreclose the possibility of the child's own regeneration This study proposes that through this predicament and their responses to it the literature of the period between the Romantic and the Victorian periods comes into focus marked by an anxiety not of influence but of reproduction It suggests that one reason why this period has tended to disappear from view lies in the sense of historical and aesthetic difference and productive failure which this study uncovers
