TV in the USA Vincent LoBrutto, 2018-01-04 This three volume set is a valuable resource for researching the history of American television An encyclopedic range of information documents how television forever changed the face of media and continues to be a powerful influence on society What are the reasons behind enduring popularity of television genres such as police crime dramas soap operas sitcoms and reality TV What impact has television had on the culture and morality of American life Does television largely emulate and reflect real life and society or vice versa How does television's influence differ from that of other media such as newspapers and magazines radio movies and the Internet These are just a few of the questions explored in the three volume encyclopedia **TV in the USA A History of Icons Idols and Ideas** This expansive set covers television from 1950 to the present day addressing shows of all genres well known programs and short lived series alike broadcast on the traditional and cable networks All three volumes lead off with a keynote essay regarding the technical and historical features of the decade's covered Each entry on a specific show investigates the narrative themes and history of the program provides comprehensive information about when the show started and ended and why and identifies the star players directors producers and other key members of the crew of each television production The set also features essays that explore how a particular program or type of show has influenced or reflected American society and it includes numerous sidebars packed with interesting data related information and additional insights into the subject matter **Max Headroom** Steve Roberts, 1986 The novelization of the film that launched the career of Max Headroom the computer generated talking head who lives in a TV and has received great popularity as a talk show host pop music raconteur and overall weird personality Color photographs throughout **Ergonomics in the Automotive Design Process** Vivek D. Bhise, 2016-04-19 The auto industry is facing tough competition and severe economic constraints Their products need to be designed right the first time with the right combinations of features that not only satisfy the customers but continually please and delight them by providing increased functionality comfort convenience safety and craftsmanship Based on t Flight International, 1978 *Börsenblatt für den deutschen Buchhandel*, 1991-11-15 **Unit Operations of Particulate Solids** Enrique Ortega-Rivas, 2016-04-19 Suitable for practicing engineers and engineers in training this book covers the most important operations involving particulate solids Through clear explanations of theoretical principles and practical laboratory exercises the text provides an understanding of the behavior of powders and pulverized systems It also helps readers develop skills for operating optimizing and innovating particle processing technologies and machinery in order to carry out industrial operations The author explores common bulk solids processing operations including milling agglomeration fluidization mixing and solid fluid separation **Power GaN Devices** Matteo Meneghini, Gaudenzio Meneghesso, Enrico Zanoni, 2016-09-08 This book presents the first comprehensive overview of the properties and fabrication methods of GaN based power transistors with contributions from the most active research groups in the field It describes how gallium nitride

has emerged as an excellent material for the fabrication of power transistors thanks to the high energy gap high breakdown field and saturation velocity of GaN these devices can reach breakdown voltages beyond the kV range and very high switching frequencies thus being suitable for application in power conversion systems Based on GaN switching mode power converters with efficiency in excess of 99 % have been already demonstrated thus clearing the way for massive adoption of GaN transistors in the power conversion market This is expected to have important advantages at both the environmental and economic level since power conversion losses account for 10 % of global electricity consumption The first part of the book describes the properties and advantages of gallium nitride compared to conventional semiconductor materials The second part of the book describes the techniques used for device fabrication and the methods for GaN on Silicon mass production Specific attention is paid to the three most advanced device structures lateral transistors vertical power devices and nanowire based HEMTs Other relevant topics covered by the book are the strategies for normally off operation and the problems related to device reliability The last chapter reviews the switching characteristics of GaN HEMTs based on a systems level approach This book is a unique reference for people working in the materials device and power electronics fields it provides interdisciplinary information on material growth device fabrication reliability issues and circuit level switching investigation

Recent Developments of Soil Mechanics and Geotechnics in Theory and Practice

Theodoros Triantafyllidis, 2019-08-20 This book provides essential insights into recent developments in fundamental geotechnical engineering research Special emphasis is given to a new family of constitutive soil description methods which take into account the recent loading history and the dilatancy effects Particular attention is also paid to the numerical implementation of multi phase material under dynamic loads and to geotechnical installation processes In turn the book addresses implementation problems concerning large deformations in soils during piling operations or densification processes and discusses the limitations of the respective methods Numerical simulations of dynamic consolidation processes are presented in slope stability analysis under seismic excitation Lastly achieving the energy transition from conventional to renewable sources will call for geotechnical expertise Consequently the book explores and analyzes a selection of interesting problems involving the stability and serviceability of supporting structures and provides new solutions approaches for practitioners and scientists in geotechnical engineering The content reflects the outcomes of the Colloquium on Geotechnical Engineering 2019 Geotechnik Kolloquium held in Karlsruhe Germany in September 2019

Uranium Extraction Technology International Atomic Energy Agency, 1993 The purpose of this publication is to update and expand the first edition which was published in 1983 and to report on later advances in uranium ore processing It includes background information about the principles of the unit operations used in uranium ore processing and summarizes the current state of the art Extensive references provide sources for specific technological details

Engineering Surveying W Schofield, Mark Breach, 2007-02-14 Engineering surveying involves determining the position of natural and man made features on or beneath the Earth's surface

and utilizing these features in the planning design and construction of works It is a critical part of any engineering project Without an accurate understanding of the size shape and nature of the site the project risks expensive and time consuming errors or even catastrophic failure This fully updated sixth edition of Engineering Surveying covers all the basic principles and practice of the fundamentals such as vertical control distance angles and position right through to the most modern technologies It includes An introduction to geodesy to facilitate greater understanding of satellite systems A fully updated chapter on GPS GLONASS and GALILEO for satellite positioning in surveying All new chapter on the important subject of rigorous estimation of control coordinates Detailed material on mass data methods of photogrammetry and laser scanning and the role of inertial technology in them With many worked examples and illustrations of tools and techniques it suits students and professionals alike involved in surveying civil structural and mining engineering and related areas such as geography and mapping
