Max Neuhaus:

Max Neuhaus Max Neuhaus, 2009 In 1977 Max Neuhaus turned a triangle of pedestrian space between 45th and 46th Streets in Times Square into an island of harmonic sound The rich textures of that sound continue today emanating from beneath the sidewalk grating to anonymously reach an individual's ears as if one has stumbled upon a secret Known as Times Square the celebrated installation was restored in 2002 with support from Dia Art Foundation which further commissioned a site specific piece Time Piece Beacon from Neuhaus in 2006 for its museum in Beacon New York This stunning book the only volume in print dedicated solely to the work of Neuhaus takes these two projects as a point of departure from which to consider the singular impact this artist has had in establishing sound as a medium in contemporary art An interview with Neuhaus is complemented with essays by multidisciplinary scholars who investigate and situate his work within a historical context Distributed for Dia Art Foundation

Experimental Music Since 1970 Jennie Gottschalk, 2016-08-11 What is experimental music today This book offers an up to date survey of this field for anyone with an interest from seasoned practitioners to curious readers This book takes the stance that experimental music is not a limited historical event but is a proliferation of approaches to sound that reveals much about present day experience An experimental work is not identifiable by its sound alone but by the nature of the questions it poses and its openness to the sounding event Experimentation is a way of working It pushes past that which is known to discover what lies beyond it finding new knowledge forms and relationships or accepting a state of uncertainty For each of these composers and sound artists craft is developed and transformed in response to the questions they bring to their work Scientific perceptual or social phenomena become catalysts in the operation of the work These practices are not presented according to a chronology a set of techniques or social groupings Instead they are organized according to the content areas that are their subjects including resonance harmony objects shapes perception language interaction sites and histories Musical materials may be subject among other treatments to systemization observation examination magnification fragmentation translation or destabilization These restless and exploratory modes of engagement have continued to develop over recent decades expanding the scope of both musical practice and listening

Background Noise, Second Edition Brandon LaBelle, 2015-01-29 Follows the development of sound as an artistic medium and illustrates how sound is put to use within modes of composition installation and performance

Sound Art Revisited Alan Licht, 2019-08-22 The first edition of Sound Art Revisited published as Sound Art Beyond Music Between Categories served as a groundbreaking work toward defining this emerging field and this fully updated volume significantly expands the story to include current research since the book's initial release Viewed through a lens of music and art histories rather than philosophical theory it covers dozens of artists and works not found in any other book on the subject Locating sound art's roots across the centuries from spatialized church music to the technological developments of radio sound recording and the telephone the book traces the evolution of

sound installations and sound sculpture the rise of sound art exhibitions and galleries and finally looks at the critical cross pollination that marks some of the most important and challenging art with and about sound being produced today *Sound Works* Calvin Tomkins, Max Neuhaus, Jean-Christoph Ammann, Carter Ratcliff, 1994 Electronic Music Nick Collins, Margaret Schedel, Scott Wilson, 2013-05-09 This accessible Introduction explores both mainstream and experimental manifestations of electronic music From early recording equipment to the most recent multimedia performances the history of electronic music is full of interesting characters fascinating and unusual music and radical technology Covering many different eras genres and media analyses of works appear alongside critical discussion of central ideas and themes making this an essential guide for anyone approaching the subject for the first time Chapters include key topics from synth pop to sound art from electronic dance music to electrical instruments and from the expression of pure sound to audiovisuals Highly illustrated and with a wide selection of examples the book provides many suggestions for further reading and listening to encourage students to begin their own experiments in this exciting field *The Culture of Feedback* Daniel Belgrad, 2019-08-30 When we want advice from others we often casually speak of getting some feedback But how many of us give a thought to what this phrase means The idea of feedback actually dates to World War II when the term was developed to describe the dynamics of self regulating systems which correct their actions by feeding their effects back into themselves By the early 1970s feedback had become the governing trope for a counterculture that was reoriented and reinvigorated by ecological thinking The Culture of Feedback digs deep into a dazzling variety of left of center experiences and attitudes from this misunderstood period bringing us a new look at the wild side of the 1970s Belgrad shows us how ideas from systems theory were taken up by the counterculture and the environmental movement eventually influencing a wide range of beliefs and behaviors particularly related to the question of what is and is not intelligence He tells the story of a generation of Americans who were struck by a newfound interest in and respect for plants animals indigenous populations and the very sounds around them threading his tapestry with cogent insights on environmentalism feminism systems theory and psychedelics The Culture of Feedback repaints the familiar image of the 70s as a time of Me Generation malaise to reveal an era of revolutionary and hopeful social currents driven by desires to radically improve and feed back into the systems that had come before **Music, Society and Imagination in Contemporary France** François Bernard Mâche, 1993 First Published in 1994 Routledge is an imprint of Taylor Francis an informa company **Sonic Flux** Christoph Cox, 2018-11-02 From Edison's invention of the phonograph through contemporary field recording and sound installation artists have become attracted to those domains against which music has always defined itself noise silence and environmental sound Christoph Cox argues that these developments in the sonic arts are not only aesthetically but also philosophically significant revealing sound to be a continuous material flow to which human expressions contribute but which precedes and exceeds those expressions Cox shows how over the course of the twentieth and twenty first centuries philosophers and sonic artists have

explored this sonic flux Through the philosophical analysis of works by John Cage Maryanne Amacher Max Neuhaus Christian Marclay and many others Sonic Flux contributes to the development of a materialist metaphysics and poses a challenge to the prevailing positions in cultural theory proposing a realist and materialist aesthetics able to account not only for sonic art but for artistic production in general Global Percussion Innovations Louise Devenish,2018-09-03 First emerging in North America and Europe in the late 1920s contemporary percussion practices have transitioned from the fringes of contemporary music to the forefront over the past 90 years In the 1960s contemporary percussion practices reached Australian shores and a new generation of artists added their voices to this narrative The role of Australian activity is not yet embedded in the wider narrative of international contemporary percussion nor is the significance of developments in contemporary percussion practices fully realised in the context of Australian music history In this monograph political social and cultural influences on this art form will be examined for the first time in a historical survey of contemporary percussion music in Australia over a 50 year period from 1960 to 2010 The rise of the percussion ensemble in the twentieth century to a standard chamber music ensemble is now recognised as one of the major advances in western art music practice internationally A focus will be placed on ensemble activity via definitive documentation and analysis of ensembles that are amongst the most pioneering and longest established of Australian contemporary music organisations including the Australian Percussion Ensemble Synergy Percussion Adelaide Percussions Nova Ensemble Tetrafade Percussion Taikoz Clocked Out and Speak Percussion amongst others Closing with a discussion of influences and identity this historical narrative will expand our understanding of the impact of Australian contributions to the international contemporary music scene while simultaneously examining how developments in contemporary percussion have contributed to Australia s cultural identity

Constructing Urban Space with Sounds and Music Ricciarda Belgiojoso,2016-05-23 While we are used to looking around us we are less used to listening to what happens around us And yet the noises we produce reveal our way of life and learning to master them is a necessity This book aims at drawing the reader s attention to the sound of the urban environment The topic is by its very nature complex as it involves sounds and noises urban space and social activities Using an interdisciplinary approach it examines a heterogeneous selection of experimentations from the domains of music art and architecture Significant case studies of pieces of music public art works and scientific research in the field of urban planning are analyzed investigating the methods that have been adopted and the aural processes that have been generated It then uses the findings to reconstruct the underlying theories and practices and to show what might be drawn from these procedures applied to urban planning The overall objective is to learn to build and enrich space with sound arguing that there is a need to reconsider architecture and urban planning beyond building and to look to the world of the arts and other disciplines In doing so the book guides the reader toward a sensorial architecture and more generally toward consciously creating environmental architecture which is sustainable and connects with art and which diffuses a culture of sound

Background Noise Brandon LaBelle, 2006-01-01 The rise of a prominent auditory culture reveals the degree to which sound art is lending definition to the 21st Century And yet sound art still lacks related literature to compliment and expand the realm of practice *Background Noise* sets out an historical overview while at the same time shaping that history according to what sound art reveals the dynamics of art to operate spatially through media of reproduction and broadcast and in relation to the intensities of communication and its contextual framework **Listen Up!** Anne Thurmann-Jajes, Regine Beyer, 2025-05-23 *Listen Up* is the first publication worldwide to take an in depth look at the development of Radio Art in the United States as a distinct sound art practice Analytical essays by leading media art historians and practitioners discuss the ways in which a new field took shape in the context of changing broadcast environments and sociopolitical realities from the 1960s through the 1990s The essays provide engaging reading for scholars radio producers and artists as well as radio enthusiasts and lay audiences Also included are manifestos and other texts written by Terry Allen Jacki Apple John Cage Don Joyce Negativland Max Neuhaus Pauline Oliveros Helen Thorington and others The material vividly reflects the zeitgeist of the period and proposes trajectories for new research into fascinating yet still largely unexplored territories **Source** Larry Austin, Douglas Kahn, Nilendra Gurusinghe, 2011-06-08 This work is a seminal source for materials on the heyday of experimental music and arts The book documents crucial changes in performance practice and live electronics computer music notation and event scores theatre and installations and much more *Sounding the Limits of Life* Stefan Helmreich, 2015-10-27 What is life What is water What is sound In *Sounding the Limits of Life* anthropologist Stefan Helmreich investigates how contemporary scientists biologists oceanographers and audio engineers are redefining these crucial concepts Life water and sound are phenomena at once empirical and abstract material and formal scientific and social In the age of synthetic biology rising sea levels and new technologies of listening these phenomena stretch toward their conceptual snapping points breaching the boundaries between the natural cultural and virtual Through examinations of the computational life sciences marine biology astrobiology acoustics and more Helmreich follows scientists to the limits of these categories Along the way he offers critical accounts of such other than human entities as digital life forms microbes coral reefs whales seawater extraterrestrials tsunamis seashells and bionic cochlea He develops a new notion of sounding as investigating fathoming listening to describe the form of inquiry appropriate for tracking meanings and practices of the biological aquatic and sonic in a time of global change and climate crisis *Sounding the Limits of Life* shows that life water and sound no longer mean what they once did and that what count as their essential natures are under dynamic revision *Immaterial Architecture* Jonathan Hill, 2006-04-18 This fascinating argument from Jonathan Hill presents the case for the significance and importance of the immaterial in architecture Architecture is generally perceived as the solid physical matter that it unarguably creates but what of the spaces it creates This issue drives Hill's explorative look at the immaterial aspects of architecture The book discusses the pressures on architecture and the architectural profession to be respectively solid

matter and solid practice and considers concepts that align architecture with the immaterial such as the superiority of ideas over matter command of drawing and design of spaces and surfaces Focusing on immaterial architecture as the perceived absence of matter Hill devises new means to explore the creativity of both the user and the architect advocating an architecture that fuses the immaterial and the material and considers its consequences challenging preconceptions about architecture its practice purpose matter and use This is a useful and innovative read that encourages architects and students to think beyond established theory and practice

Aspects Edward A. Vazquez, 2018-01-02 Stretching lengths of yarn across interior spaces American artist Fred Sandback 1943 2003 created expansive works that underscore the physical presence of the viewer This book the first major study of Sandback explores the full range of his art which not only disrupts traditional conceptions of material presence but also stages an ethics of interaction between object and observer Drawing on Sandback's substantial archive Edward A Vazquez demonstrates that the artist's work with all its physical slowness and attentiveness to place as well as its relationship to minimal and conceptual art of the 1960s creates a link between viewers and space that is best understood as sculptural even as it almost surpasses physical form At the same time the economy of Sandback's site determined practice draws viewers focus to their connection to space and others sharing it As Vazquez shows Sandback's art aims for nothing less than a total recalibration of the senses as the spectator is caught on neither one side nor the other of an object or space but powerfully within it
