Max Planck Gesellschaft Zur Forderu 1955:

Portraits of Pioneers in Psychology Donald A. Dewsbury, Ludy T. Benjamin, Jr., Michael Wertheimer, 2014-06-03 This sixth book in the Portraits of Pioneers in Psychology Series preserves the diversity that has characterized earlier volumes as it brings to life psychologists who have made substantial contributions to the field of the history of psychology. These chapters illustrate the pioneering endeavors of such significant figures and are written in a lively engaging style by authors who themselves have achieved a reputation as excellent scholars in the history of psychology. Several of the chapters are based on the author's personal acquaintance with a pioneer and new previously unavailable information about these luminaries is presented in this volume. Each of these volumes provides glimpses into the personal and scholarly lives of 20 giants in the history of psychology. Prominent scholars provide chapters on a pioneer who made important contributions in their own area of expertise. A special section in each volume provides portraits of the editors and authors containing interesting information about the relationship between the pioneers and the psychologists who describe them. Utilizing an informal personal, sometimes humorous style of writing, the books will appeal to students and instructors interested in the history of psychology. Each of the six volumes in this series contains different profiles, thereby bringing more than 120 of the pioneers in psychology more vividly to life.

Man and Mouse William D. M. Paton, 1993 This is a new edition of Sir William Paton's acclaimed defense of the use of animals in research. *Man and Mouse* is the only book to explain fully the role of animal experiments in medical and veterinary research. The updated text includes new material on toxicity tests, the link between innovation in the field of drugs and the scale of animal experimentation, the history of the escalating violence of the Animal Liberation Front and other groups, and an extended discussion of the ethical problems surrounding animal experimentation. **Incunabula**

Printed in the Low Countries Gerard van Thienen, John Goldfinch, 1999 *Incunabula of the Low Countries* ILC is a census of fifteenth-century books printed in the area of the present-day Netherlands and Belgium. It lists 2,229 editions in more than 14,300 copies preserved in hundreds of libraries, museums, and archives all over the world but mainly in Europe and the USA. The entries for this census have been derived from the *Incunabula Short Title Catalogue* (ISTC), the database of incunabula compiled at the British Library. They combine research on Low Countries incunabula carried out by Gerard van Thienen, curator at the Koninklijke Bibliotheek in The Hague, with data assembled by ISTC from other sources. ISTC entries were further edited, indexed, and prepared for publication by John Goldfinch at the British Library. Campbell's *Annales* of 1874, the first bibliography of incunabula printed in the Low Countries, with 1,794 entries, was followed by a number of supplements of increasing complexity, the most extensive being published by M. E. Kronenberg in 1956. All the former additions and emendations, together with additions not otherwise listed before, are now brought together and included in one sequence in ILC.
