Exercises in Graph Theory O. Melnikov, V. Sarvanov, R.I. Tyshkevich, V. Yemelichev, Igor E. Zverovich, 2013-04-18 This book supplements the textbook of the authors *Lectures on Graph Theory* 6 by more than thousand exercises of varying complexity. The books match each other in their contents, notations, and terminology. The authors hope that both students and lecturers will find this book helpful for mastering and verifying the understanding of the peculiarities of graphs. The exercises are grouped into eleven chapters and numerous sections according to the topics of graph theory: paths, cycles, components, subgraphs, reconstructibility, operations on graphs, graphs and matrices, trees, independence, matchings, coverings, connectivity, matroids, planarity, Eulerian and Hamiltonian graphs, degree sequences, colorings, digraphs, hypergraphs. Each section starts with main definitions and brief theoretical discussions. They constitute a minimal background, just a reminder for solving the exercises, the presented facts, and a more extended exposition may be found in *Proofs* of the mentioned textbook of the authors as well as in many other books in graph theory. Most exercises are supplied with answers and hints. In many cases, complete solutions are given. At the end of the book, you may find the index of terms and the glossary of notations. The Bibliography list refers only to the books used by the authors during the preparation of the exercisebook. Clearly, it mentions only a fraction of available books in graph theory. The invention of the authors was also driven by numerous journal

*Head Eye and Face Personal Protective Equipment New Trends Practice and Applications* is a complementary and thoughtful  
 but selected compilation of the most relevant information concerning protective helmets as well as eye and face protection  
 The compilation of these two protection types is the result of the common use of both protective helmets and eye and face  
 protectors This requires their full compatibility both in terms of ensuring optimum safety and comfort of use The authors  
 have chosen the material according to the needs of people directly responsible for safety at work and users of those  
 protectors The main aim of the work is to popularise knowledge in the field of construction research methods selection and  
 use of protective helmets and eye and face protectors In terms of use the authors emphasise the necessity of independent  
 control i e checking the technical condition of the equipment used by the end users The presented monograph includes the  
 current state of knowledge in this scope extended by the results and summaries of the authors own research All  
 requirements and research methods are given based on European EN international ISO standards and standards operating in  
 different geographical areas The monograph also encompasses new trends in the design of protective helmets and eye and
