Maxime Weygand And Civil Military Relations In Modern France:

Maxime Weygand and Civil-military Relations in Modern France Philip Charles Farwell Bankwitz, 1967 This is the first scholarly study of the prewar phase of the French army's development into a disruptive force in national life A chapter from the portentous 20th century story of the soldier in politics it has relevance to contemporary situations in other western societies The book includes an encyclopedic bibliography *Maxime Weygand and Civil-military Relations in Modern France* Harvard University. Department of History, Philip Charles Farwell Bankwitz, 1967 Guns & Roses: Comparative Civil-Military Relations in the Changing Security Environment Steven Ratuva, Radomir Compel, Sergio Aguilar, 2019-01-04

This edited volume provides a critical and comparative discussion of the changing synergy between the military and society in the dramatically transforming global security climate drawing on examples from the Asian Pacific African Middle Eastern European and South American regions The book is interdisciplinary and covers wide ranging issues relating to civil military relations democratization regional security ethnicity peace building and peace keeping civilian oversight internal repression gender regime change and civil society **A Guide to the Study and Use of Military History** John E. Jessup, Robert W. Coakley, 1979 This Guide to the Study and Use of Military History is designed to foster an appreciation of the value of military history and explain its uses and the resources available for its study It is not a work to be read and lightly tossed aside but one the career soldier should read again or use as a reference at those times during his career when necessity or leisure turns him to the contemplation of the military past *Grandeur And Misery* Anthony Adamthwaite, 2014-03-04 A central question in European history is how did a great power pre eminent in 1918 lie defeated by the same enemy less than 20 years later Until recently the explanation has been sought in fundamental weaknesses that could only leave the French of 1940 hamstrung and demoralized Recent studies have challenged that view and now for the first time the revisionist approach is displayed in a single volume both summarizing the research of others and drawing on the author's own work in the archives The book is about as far from dry as dust diplomatic history as it's possible to get Its very readable and the author manages to show with the telling anecdote that even a serious subject has its comic side that for instance the French High Command kept forces stationed in the Alps for seven years because no one in the foreign service had thought to pass on news about a secret treaty between Italy and France in 1902 or that after a particularly stressful meeting Andrew Bonar Law the British prime minister mouth to Poincaré the French president through the closed carriage window of his train and you go to hell all the while smiling and exuding affability Such episodes are not the substance of the book but they oil its progress

Conventional Deterrence John J. Mearsheimer, 1985-08-21 Conventional Deterrence is a book about the origins of war Why do nations faced with the prospect of large-scale conventional war opt for or against an offensive strategy John J. Mearsheimer examines a number of crises that led to major conventional wars to explain why deterrence failed He focuses first on Allied and German decision-making in the years 1939-1940 analyzing why the Allies did not strike first against Germany after declaring war and conversely why the Germans did attack the West Turning to the Middle East he examines the differences in Israeli and Egyptian strategic doctrines prior to the start of the major conventional conflicts in that region Mearsheimer then critically assays the relative strengths and weaknesses of NATO and the Warsaw Pact to determine the prospects for conventional deterrence in any future crisis He is also concerned with examining such relatively technical issues as the impact of precision-guided munitions (PGM) on conventional deterrence and the debate over maneuver versus attrition warfare Mearsheimer pays considerable attention to questions of military strategy and tactics Challenging the claim that conventional deterrence is largely a function of the numerical balance of forces he also takes issue with the school of thought that ascribes deterrence failures to the dominance of offensive weaponry In addition to examining the military consideration

underlying deterrence he also analyzes the interaction between those military factors and the broader political considerations that move a nation to war

France and the Nazi Menace Peter Jackson, 2000-10-26 France and the Nazi Menace examines the French response to the challenge posed by National Socialist Germany in the years 1933-1939. It focuses on the relationship between the intelligence on German intentions and capabilities and the evolution of French national policy from the rise of Hitler in 1933 to the outbreak of the Second World War in 1939. Based on extensive archival research, it considers the nature of the intelligence process and the place of intelligence within the French policy-making establishment during the inter-war period. The central argument in the book is that the German threat was far from the only challenge facing French national leaders in an era of economic depression and profound ideological discord. Only after the national humiliation at the Munich Conference did the threat from Nazi Germany take precedence over France's internal problems in the making of policy.

France 1940 Philip Nord, 2015-03-01 In this revisionist account of France's crushing defeat in 1940, a world authority on French history argues that the nation's downfall has long been misunderstood. Philip Nord assesses France's diplomatic and military preparations for war with Germany, its conduct of the war once the fighting began, and the political consequences of defeat on the battlefield. He also tracks attitudes among French leaders once defeat seemed a likelihood, identifying who among them took advantage of the nation's misfortunes to sabotage democratic institutions and plot an authoritarian way forward. Nord finds that the longstanding view that France's collapse was due to military unpreparedness and a decadent national character is unsupported by fact. Instead, he reveals that the Third Republic was no worse prepared and its military failings no less dramatic than those of the United States and other Allies in the early years of the war. What was unique in France was the betrayal by military and political elites who abandoned the Republic and supported the reprehensible Vichy takeover. Why then have historians and politicians ever since interpreted the defeat as a judgment on the nation as a whole? Why has the focus been on the failings of the Third Republic and not on elite betrayal? The author examines these questions in a fascinating conclusion.

The Lights that Failed Zara S. Steiner, 2005 In *The Lights that Failed*, Steiner challenges the assumption that the Treaty of Versailles led to the opening of a second European war and provides an analysis of the attempts to reconstruct Europe during the 1920s.

Grand Strategies in War and Peace Paul M. Kennedy, 1991-01-01 Examines how the US, the Soviet Union, and various European powers have developed their grand strategies, how they have integrated their political, economic, and military goals in order to preserve their long-term interests in times of war and peace.

France and the Coming of the Second World War, 1936-1939 Anthony Adamthwaite, 2021-12-16 First published in 1977, *France and the Coming of the Second World War* investigates the policies that led to the collapse of French power. The book argues that this collapse was the result of social, political, and economic troubles that buffeted French leaders. It uses a wealth of documents to explore common debates such as Britain's culpability for France's inability to prevent Germany's

reoccupation of the Rhineland It also puts forward the threat of Italy and the Mediterranean as France's main preoccupation rather than Germany and central Europe France and the Coming of the Second World War uses an extensive range of archival material and includes the private papers of Daladier Bonnet and a number of other prominent figures It will appeal to those with an interest in the history of the Second World War political history and social history *The Rise and Fall of the Great Powers* Paul Kennedy, 2010-10-27 About national and international power in the modern or Post Renaissance period Explains how the various powers have risen and fallen over the 5 centuries since the formation of the new monarchies in W Europe **FDR's 12 Apostles** Hal Vaughan, 2006-10-01 Nineteen months before the attack on Pearl Harbor FDR sent twelve vice consuls to Algeria Morocco and Tunisia on a secret mission Their objective To prepare the groundwork for what eventually became Operation TORCH the Allied invasion of North Africa that repelled the Nazis and also enabled the liberation of Italy This spy network included an ex Cartier jewel salesman and wine merchant a madcap Harvard anthropologist a Parisian playboy who ran with Hemingway ex French Foreign Legionnaires and Paris bankers and a WWI hero Based on recently declassified foreign records as well as the memoirs of Ridgeway Brewster Knight one of the twelve apostles this fast paced historical account gives the first behind the scenes look at FDR's top secret plan To the Maginot Line Judith M. HUGHES, Judith M Hughes, 2009-06-30 The decision to fortify northeastern France has usually been considered a tragic mistake an example of bad planning and missed opportunities Not so says Judith M Hughes who provides a convincing view of how France's military and political leaders tried to safeguard their nation and why they failed As critic Michael Hurst writes in The American Historical Review The trends of French interwar history are deftly carried through onto these pages with an unobtrusive lucidity and persuasiveness
