Collaborative Wisdom Greg Park, 2016-05-23 Why do some corporate superstars collapse dramatically while others survive and prosper over many decades Is the fall primarily caused by technical factors such as poor products and pricing financial management or market choices by self aggrandisement or perhaps by poor leadership attributes and capabilities Greg Park argues that ultimately organisational survival and optimal performance over the long term is dependent upon collaborative wisdom Within the dominant coalition of a successful community or corporation there is an inherited pervasive commonly and collectively held dominant logic comprising leadership principles perspectives and priorities based upon universal values which are understood and accepted as satisfying the requirements and aspirations of each stakeholder This collaborative wisdom ensures cohesive and consistent behaviour across and within every function of a complex fast moving organization Its practical application is reflected in the daily operational decisions of leaders within the organisation be they divisional departmental heads or supervisors Without collaborative wisdom organisational collapse is the inevitable result primarily through the disintegration of belief confidence motivation cohesion advocacy and energy within and between key stakeholder groups Collaborative Wisdom examines the nature and criticality of wisdom as a leadership attribute how effective operational leadership is not just about knowledge and experience but more fundamentally about a cognitive mental process which considers and consistently applies fundamental values principles perspectives and

priorities in an analytical and affective manner This ensures effective operational leadership and optimal organisational performance over the long term informed by experience instinct intuition but also by insight judgment and ultimately wisdom

Federal Executive Institute's Center for Executive Leadership Center for Executive Leadership (Federal Executive Institute),2003 The Dynamics of Technology G. Barbiroli,2013-03-14 Technology is taking on an increasingly central and determining role in so ciety and can provide contradictory results wealth on the one hand but also unemployment environmental imbalances and other social problems on the other Manufacturing techniques and production organization are chosen in every country based mainly on the specific needs of the companies while the real needs of each population are often quite different Already in order to prevent all forms of technology from becoming in creasingly invasive towards both the natural supply of resources and the specific though highly differentiated needs of humanity technological paths must be identified and followed which are capable of making the vari ous needs compatible from the standpoint of sustainable development the conservation and increase in value of natural resources and the quality of development This will become increasingly important in the future This goal is undoubtedly ambitious and difficult to achieve however evi dence of the problems caused by generalized uncontrolled use of technolo gy all over the world leads us to believe that intense efforts must be made to achieve this aim If not humankind runs the risk of an irreversible degra dation of the most important aspects of economic development and its quali ty Within this framework those companies that produce goods and services obviously occupy a central active role which they must play with a view both to competitiveness and overall qualification and to contributing to the objectives of sustainable development Strategic Public Management Howard R.
