Maximum Vigilance:

Maximum Vigilance Steve R. Pieczenik, 1993 Human Factors Psychology P.A. Hancock, 1987-10-01 This book is a collection of contemporary applications of psychological insights into practical human factors issues. The topics are arranged largely according to an information processing energetic approach to human behavior. Consideration is also given to human computer interaction and organizational design.

The Officer's Handbook S N. Koslov, 1977 **Applications and Science in Soft Computing** Ahmad Lotfi, Jonathan M. Garibaldi, 2013-06-29 Soft computing techniques have reached a significant level of recognition and acceptance from both the academic and industrial communities. The papers collected in this volume illustrate the depth of the current theoretical research trends and the breadth of the application areas in which soft computing methods are making contributions. This volume consists of forty six selected papers presented at the Fourth International Conference on Recent Advances in Soft Computing which was held in Nottingham United Kingdom on 12 and 13 December 2002 at Nottingham Trent University. This volume is organized in five parts. The first four parts address mainly the fundamental and theoretical advances in soft computing namely Artificial Neural Networks, Evolutionary Computing, Fuzzy Systems and Hybrid Systems. The fifth part of this volume presents papers that deal with practical issues and industrial applications of soft computing techniques. We would like to express our sincere gratitude to all the authors who submitted contributions for inclusion. We are also indebted to Janusz Kacprzyk for his vices related to this volume. We hope you find the volume an interesting reflection of current theoretical and application based soft computing research.

Applied Myrmecology Robert K Vander Meer, Aragua Cedeno, Klaus Jaffe, 2019-04-23 Ants have always fascinated the nature observer. Reports from ancient Egypt and Mesopotamia indicate that ants interested humans long ago. Myrmecology as a science had its beginning in the last century with great naturalists like Andre Darwin, Emery, Escherich, Fabre, Fields, Forel, Janet, Karawaiew, McCook, Mayr, Smith, Wasmann and Wheeler. They studied ants as an interesting biological phenomenon with little thought of the possible beneficial or detrimental effects ants could have on human activities. See Wheeler 1910 as an example. When Europeans began colonizing the New World, serious ant problems occurred. The first reports of pest ants came from Spanish and Portuguese officials of the fifteenth and sixteenth centuries in Trinidad, The West Indies, Central America and South America. Leaf cutting ants were blamed for making agricultural development almost impossible in many areas. These ants, *Atta* and *Acromyrmex* species, are undoubtedly the first ants identified as pests and may be considered to have initiated interest and research in applied myrmecology. Mariconi 1970.

The Head Trip Jeff Warren, 2009-03-18 A world at once familiar and unimaginably strange exists all around us and within us: it is the vast realm of consciousness. In *The Head Trip*, science journalist Jeff Warren explores twelve distinct natural states of consciousness available to us in a twenty-four hour day, each state offering its own kind of knowledge and insight, its own adventure. The hypnagogic state, when our minds hover between waking and sleeping, can be a rich source of creativity and even compassion. Then there's the Watch

an almost magical waking experience in the middle of the night that has been all but lost to electric light and modern sleep patterns Daydreaming and trance lucid dreaming the Zone and the Pure Conscious Event from sleep laboratory to remote northern cabin neurofeedback clinic to Buddhist retreat Warren visits them all Along the way he talks to neuroscientists chronobiologists anthropologists monks and many others who illuminate his stories with cutting edge science and age old wisdom On this trip all are welcome and no drugs are required all you need to pack are a functioning cerebrum and an open mind Replete with stylish graphics and brightened by comic panels conceived and drawn by the author The Head Trip is an instant classic a brilliant and original description of the shifting experience of consciousness that s also a practical guide to enhancing creativity and mental health This book does not just inform and entertain it shows how every one of us can expand upon the ways we experience being alive

Negotiated Care Margaret Nelson, 2010-03-29 Weaving together numerous richly detailed interviews and surveys with recent feminist literature on the role of caregiving in women s lives and investigations of women s involvement in home based work this book explores the daily lives of family day care providers Margaret K Nelson uncovers the dilemmas providers face in their relationships with parents who bring children to them with the children themselves with the providers family members and with representatives of the state s regulatory system She links these dilemmas to the contradiction between an increasing demand for personalized cheap informal child care services and a public policy that subjects child care providers to public scrutiny while giving them limited material and ideological support Nelson s discussions with day care providers reveal considerable tensions that emerge over issues of control and intimacy The dual motivation of business and family gives rise to problems such as how to maintain enough distance from the parents to set limits on hours while providing personal service in a family setting Family day care providers often enter this occupation as a way to engage in paid work and meet their own child care responsibilities This book looks at how they manage to negotiate a setting that simultaneously involves money trust and caring Family day care represents one of the most prevalent sources of child care for working parents It is an especially common form of care for very young children yet it remains little studied In the popular press stereotypes many of them negative prevail This book substitutes a thorough detailed examination of this child care setting from a perspective that has generally been ignored that of the caregiver While providing useful insights into the role of caregiving in women s lives and the phenomenon of home based

Trust Geoffrey A. Hosking, 2014 Today there is much talk of a crisis of trust a crisis which is almost certainly genuine but usually misunderstood Trust A History offers a new perspective on the ways in which trust and distrust have functioned in past society providing an empirical and historical basis against which the present crisis can be examined and suggesting ways in which the concept of trust can be used as a tool to understand our own and other societies Geoffrey Hosking argues that social trust is mediated through symbolic systems such as religion and money and the institutions associated with them churches and banks Historically these institutions have nourished trust but the resulting trust networks have tended to create quite tough boundaries around themselves across which distrust is projected against outsiders Hosking also shows how nation states have been particularly good at absorbing symbolic systems and generating trust among large numbers of people while also erecting rigid boundaries around themselves despite an increasingly global economy He asserts that in the modern world it has become common to entrust major resources to institutions we know little about and suggests that we need to learn from historical experience and temper this with more traditional forms of trust or become an ever more distrustful society with potentially very destabilising consequences

laid the groundwork for victory through aircraft research and production the development and implementation of command and control structures and research into new technologies the most important of which was radar Hough and Richards also utilize first person accounts of the battle whenever possible rendering the battle scenes with cinematic intensity A compelling introduction to one of the most important battles of World War II The Battle of Britain pays tribute to the men about whom Winston Churchill would remark Never in the field of human conflict was so much owed by so many to so few
