MAYA CIVILIZATION T. Patrick Culbert,1993 Describes the history and culture of the Mayan Indians

Ancient Maya Arthur Demarest,2004-12-09 In this new archaeological study Arthur Demarest brings the lost pre Columbian civilization of the Maya to life In applying a holistic perspective to the most recent evidence from archaeology paleoecology and epigraphy this theoretical interpretation emphasises both the brilliant rain forest adaptations of the ancient Maya and the Native American spirituality that permeated all aspects of their daily life Demarest draws on his own discoveries and the findings of colleagues to reconstruct the complex lifeways and volatile political history of the Classic Maya states of the first to eighth centuries He provides a new explanation of the long standing mystery of the ninth century abandonment of most of the great rain forest cities Finally he draws lessons from the history of the Classic Maya cities for contemporary society and for the ongoing struggles and resurgence of the modern Maya peoples who are now re emerging from six centuries of oppression

Maya Civilization Charles George,Linda George,2010-07-16 At its peak the Maya civilization consisted of two million people populating over forty cities While Europe languished in darkness after the fall of Rome the Maya were advancing irrigation and terracing techniques in agriculture pioneering the use of the zero in mathematics and creating accurate astronomical tables Yet much about this great culture is unknown as scholars struggle to decipher Mayan texts This compelling volume examines the Maya civilization in accessible chapters with supplemental maps timelines and charts to support student research Relevant topics discussed in this edition include the rise of the Mayans the lives of the nobility and commoners during the classical period achievements in science engineering and writing the spirit realm and cosmology and elements of Mayan culture in modernity

Socioeconomic Networks and the Rise of Maya Civilization Sherman W. Horn (III),2020 This study examines the origins of complex society in the Maya Lowlands during the Middle Preclassic period Excavations at Cahal Pech a mid sized Maya settlement in the Belize River Valley revealed complex architectural sequences over a 600 year developmental period which spans the time of the earliest permanent villages in the area and the emergence of institutionalized hierarchy characteristic of later Maya civilization The author uses spatial analysis to investigate artifact distribution patterns related to architectural change and marshals a diverse dataset to support a network framework for understanding developing complexity This expands on studies of long distance exchange to examine how households and communities could gain advantage by participating in interaction networks and how the positioning of some entities in networks could have produced socioeconomic inequalities
