## **Maya Cosmos:**

*Maya Cosmos* David A. Freidel, Linda Schele, Joy Parker, 1993 Explores archaeological discoveries revealing how the Maya have survived centuries of religious oppression      Maya Political Science Prudence M. Rice, 2013-08-28 How did the ancient Maya rule their world Despite more than a century of archaeological investigation and glyphic decipherment the nature of Maya political organization and political geography has remained an open question Many debates have raged over models of centralization versus decentralization superordinate and subordinate status with far flung analogies to emerging states in Europe Asia and Africa But Prudence Rice asserts that neither the model of two giant superpowers nor that which postulates scores of small weakly independent polities fits the accumulating body of material and cultural evidence In this groundbreaking book Rice builds a new model of Classic lowland Maya AD 179 948 political organization and political geography Using the method of direct historical analogy she integrates ethnohistoric and ethnographic knowledge of the Colonial period and modern Maya with archaeological epigraphic and iconographic data from the ancient Maya On this basis of cultural continuity she constructs a convincing case that the fundamental ordering principles of Classic Maya geopolitical organization were the calendar specifically a 256 year cycle of time known as the *may* and the concept of quadripartition or the division of the cosmos into four cardinal directions Rice also examines this new model of geopolitical organization in the Preclassic and Postclassic periods and demonstrates that it offers fresh insights into the nature of rulership ballgame ritual and warfare among the Classic lowland Maya      Anthropomorphizing the Cosmos Prudence M. Rice, 2019-04-14 *Anthropomorphizing the Cosmos* explores the sociocultural significance of more than three hundred Middle Preclassic Maya figurines uncovered at the site of Nixtun Ch'ich on Lake Peten Itz in northern Guatemala In this careful holistic and detailed analysis of the Peten lakes figurines hand modeled terracotta anthropomorphic fragments animal figures and musical instruments such as whistles and ocarinas Prudence M Rice engages with a broad swath of theory and comparative data on Maya ritual practice Presenting original data *Anthropomorphizing the Cosmos* offers insight into the synchronous appearance of fired clay figurines with the emergence of societal complexity in and beyond Mesoamerica Rice situates these Preclassic Maya figurines in the broader context of Mesoamerican human figural representation identifies possible connections between anthropomorphic figurine heads and the origins of calendrics and other writing in Mesoamerica and examines the role of anthropomorphic figurines and zoomorphic musical instruments in Preclassic Maya ritual The volume shows how community rituals involving the figurines helped to mitigate the uncertainties of societal transitions including the beginnings of settled agricultural life the emergence of social differentiation and inequalities and the centralization of political power and decision making in the Peten lowlands Literature on Maya ritual cosmology and specialized artifacts has traditionally focused on the Classic period with little research centering on the very beginnings of Maya sociopolitical organization and ideological beliefs in the Middle Preclassic *Anthropomorphizing the Cosmos* is a welcome contribution to

the understanding of the earliest Maya and will be significant to Mayanists and Mesoamericanists as well as nonspecialists with interest in these early figurines      **Maya Cosmos** David A. Freidel, 2001      The Cosmos of the Yucatec Maya Merideth Paxton, 2001 Traces implications of a previously unrecognized image of the solar year in the Madrid Codex to find new meanings in the Dresden Codex and the Maya calendar system and a regional settlement organization in Yucatan      **Heart of Creation** Andrea Joyce Stone, 2002 This accessible state of the art review of Mayan hieroglyphics and cosmology also serves as a tribute to one of the field's most noted pioneers The core of this book focuses on the current study of Mayan hieroglyphics as inspired by the recently deceased Mayanist Linda Schele As author or coauthor of more than 200 books or articles on the Maya Schele served as the chief disseminator of knowledge to the general public about this ancient Mesoamerican culture similar to the way in which Margaret Mead introduced anthropology and the people of Borneo to the English speaking world Twenty five contributors offer scholarly writings on subjects ranging from the ritual function of public space at the Olmec site and the gardens of the Great Goddess at Teotihuacan to the understanding of Jupiter in Maya astronomy and the meaning of the water throne of Quirigua Zoomorph P The workshops on Maya history and writing that Schele conducted in Guatemala and Mexico for the highland people modern descendants of the Mayan civilization are thoroughly addressed as is the phenomenon termed Maya mania the explosive growth of interest in Maya epigraphy iconography astronomy and cosmology that Schele stimulated An appendix provides a bibliography of Schele's publications and a collection of Scheleana written memories of the Rabbit Woman by some of her colleagues and students Of interest to professionals as well as generalists this collection will stand as a marker of the state of Mayan studies at the turn of the 21st century and as a tribute to the remarkable personality who guided a large part of that archaeological research for more than two decades      Maya Cosmos David Freidel, 1995-02-27 A Masterful blend of archaeology anthropology astronomy and lively personal reportage Maya Cosmos tells a constellation of stories from the historical to the mythological and evokes the awesome power of one of the richest civilizations ever to grace the earth      **Star Gods of the Maya** Susan Milbrath, 1999-01-01 Observations of the sun moon planets and stars played a central role in ancient Maya lifeways as they do today among contemporary Maya who maintain the traditional ways This pathfinding book reconstructs ancient Maya astronomy and cosmology through the astronomical information encoded in Precolumbian Maya art and confirmed by the current practices of living Maya peoples Susan Milbrath opens the book with a discussion of modern Maya beliefs about astronomy along with essential information on naked eye observation She devotes subsequent chapters to Precolumbian astronomical imagery which she traces back through time starting from the Colonial and Postclassic eras She delves into many aspects of the Maya astronomical images including the major astronomical gods and their associated glyphs astronomical almanacs in the Maya codices painted books and changes in the imagery of the heavens over time This investigation yields new data and a new synthesis of information about the specific astronomical events and cycles recorded
