*Divined Intervention* Christopher Wayne Hale, 2020-03-02 Divined Intervention provides an innovative institutionalist account for why religion enables political activism in some settings but not others Christopher W Hale argues that decentralized religious institutions facilitate grassroots collective action and he uses a multimethod approach to test this explanation against several theoretical alternatives Utilizing nationally representative Mexican survey data the book s statistical analyses demonstrate that decentralization by the Catholic Church is positively associated with greater individual political activism across the country Using case studies centered in the Mexican states of Chiapas Yucat n and Morelos the author shows that religious decentralization encourages reciprocal cooperative interactions at a local level This then increases the ability of religion to provide goods and services to its local adherents These processes then prompt the growth of organizational capacities at the grassroots enabling secular political activism Because this theoretical

framework is grounded in human behavior it shows how local institutions politically organize at the grassroots level Divined Intervention also offers an improved understanding of religion s relationship with political activism a topic of ever increasing significance as religion fuels political engagement across the globe The book further synthesizes seemingly disparate approaches to the study of collective action into a cohesive framework Finally there is some debate as to the impact of ethnic diversity on the provision of public goods and this study helps us understand how local institutional configurations can enable collective action across ethnic boundaries Anthropologica ,2004 *Knowledge and Human Liberation* Ananta Kumar Giri,2014-11-01 Human liberation has become an epochal challenge in today s world requiring not only emancipation from oppressive structures but also from the oppressive self It is a multidimensional struggle and aspiration in which knowledge self social and spiritual can play a transformative role *Knowledge and Human Liberation Towards Planetary Realizations* undertakes such a journey of transformation and seeks to rethink knowledge vis vis the familiar themes of human interest critical theory enlightenment ethnography democracy pluralism rationality secularism and cosmopolitanism The volume also features a Foreword by John Clammer United Nations University Tokyo and an Afterword by Fred Dallmayr University of Notre Dame Scales of Justice Nancy Fraser,2013-04-24 Until recently struggles for justice proceeded against the background of a taken for granted frame the bounded territorial state With that Westphalian picture of political space assumed by default the scope of justice was rarely subject to explicit dispute Today the scope of justice is hotly contested as human rights activists and international feminists join critics of structural adjustment and the WTO in targeting injustices that cut across borders Seeking to re map the bounds of justice on a broader scale these movements are challenging the view that justice can only be a domestic relation among fellow citizens As their claims collide with those of nationalists and Westphalian democrats we witness new forms of meta political contestation in which the scale of justice is an object of explicit dispute Under these conditions there is no avoiding an issue that had once seemed to go without saying What is the proper frame for theorizing justice Faced with a plurality of competing scales how do we know which scale of justice is truly just *Scales of Justice* tackles this issue Interrogating struggles over globalization Nancy Fraser reconstructs the theory of justice for a post Westphalian world Revising her widely discussed theory of redistribution and recognition she introduces representation as a third political dimension of justice which permits us to re conceive scale and scope as questions of justice Seeking to re imagine political space for a globalizing world she revisits the concepts of democracy solidarity and the public sphere the projects of critical theory the World Social Forum and second wave feminism and the thought of Habermas Rawls Foucault and Arendt **Sustainable Development Policy and Administration** Gedeon M. **Political Ecology, Food Regimes, and Food Sovereignty** Mark Tilzey, 2017-10-20 This book asks how we are to understand the relationship between capitalism and the environment capitalism and food and capitalism and social resistance These questions come together to form a study of food regimes and the means by which capitalism organises both the environment and people to provision its distinctive system of ever expanding consumption with food Political Ecology Food Regimes and Food Sovereignty explores whether there are environmental limits to capitalism and its economic growth by addressing the ongoing and inter linked crises of food fossil fuels and finance It also considers its political limits as the globally burgeoning precariat peasants and indigenous people resist the further commodification of their livelihoods This book draws from the field of Political Ecology to approach new ways of analysing capitalism the environment and resistance and also to propose new solutions to the current agro ecological economic crisis It will be of particular interest to students and academics of Environmental Sociology Human Geography and Environmental Geography

*René Girard and Creative Reconciliation* Vern Neufeld Redekop, Thomas Ryba, 2014-01-09 The contribution of this book to the field of reconciliation is both theoretical and practical recognizing that good theory guides effective practice and practice is the ground for compelling theory Using a Girardian hermeneutic as a starting point a new conceptual Gestalt emerges in these essays one not fully integrated in a formal way but showing a clear understanding of some of the challenges and possibilities for dealing with the deep divisions enmity hatred and other effects of violence By situating discourse about reconciliation within the context of Girardian thought it becomes clear that like Peter who vowed he would never deny Jesus but ended up doing it three times any of us is susceptible to the siren call of angry resentment and retaliation It is with a profound awareness of the power of violence that the emergence of mimetic discourse around reconciliation takes on particular urgency

Caracoleando Among Worlds Silvia Soto, 2024-11-05 The contemporary literary movement of Maya writers of Chiapas and the Zapatista Army of National Liberation or EZLN insurgency are intricately intertwined Even as each has forged its own path they are bound by a shared commitment to rescuing reclaiming and recentering Maya worldviews This shared vision emerges in Caracoleando Among Worlds which provides an in depth analysis of poetry short stories and one of the first novels written by a Maya Tsotsil writer of Chiapas alongside close readings of the EZLN's six declarations of the Lacandon Jungle Themes echoing ancestral connections informing epistemologies and sustaining cultural and spiritual practices emerge and weave the texts to each other The work brings into the conversation literature that has been translated into English for the first time and places Maya writers of Chiapas in discussion with other Native American and Indigenous scholars This work shows how literature culture and activism intertwine and offers a compelling narrative that transcends boundaries and fosters a deeper understanding of Maya identities and resilience

Hedican, 2008-07-05 Anthropologists are often reluctant to present their work relating to matters of a broad social context to the wider public even though many have much to say about a range of contemporary issues. In this second edition of a classic work in the field, Edward J. Hedican takes stock of Anthropology's research on current indigenous affairs and offers an up to date assessment of Aboriginal issues in Canada from the perspective of applied Anthropology. In his central thesis, Hedican underlines Anthropology's opportunity to make a significant impact on the way Aboriginal issues are studied, perceived and interpreted in Canada. He contends that anthropologists must quit lingering on the periphery of debates concerning land claims and race relations and become more actively committed to the public good. His study ranges over such challenging topics as advocacy roles in Aboriginal studies, the ethics of applied research, policy issues in community development, the political context of the self government debate and the dilemma of Aboriginal status and identity in Canada. **Applied Anthropology in Canada** is an impassioned call for a revitalized Anthropology, one more directly attuned to the practical problems faced by First Nations peoples. Hedican's focus on Aboriginal issues gives his work a strong contemporary relevance that bridges the gap between scholarly and public spheres. **Living at the Edges of Capitalism** Andrej

Grubic, Denis O'Hearn, 2016-04-19 Since the earliest development of states, groups of people escaped or were exiled. As capitalism developed, people tried to escape capitalist constraints connected with state control. This powerful book gives voice to three communities living at the edges of capitalism: Cossacks on the Don River in Russia, Zapatistas in Chiapas, Mexico, and prisoners in long term isolation since the 1970s. Inspired by their experiences, visiting Cossacks, living with the Zapatistas and developing connections and relationships with prisoners and ex-prisoners, Andrej Grubic and Denis O'Hearn present a uniquely sweeping historical and systematic study of exilic communities engaged in mutual aid. Following the tradition of Peter Kropotkin, Pierre Clastres, James Scott, Fernand Braudel and Immanuel Wallerstein, this study examines the full historical and contemporary possibilities for establishing self-governing communities at the edges of the capitalist world system, considering the historical forces that often militate against those who try to practice mutual aid in the face of state power and capitalist incursion. **Social Anthropology** Edward Hedican, 2012-01-15 This is the first introductory text that focuses on social anthropological research using Canadian examples and perspectives. In this groundbreaking new book, Edward Hedican provides undergraduate students with a solid background on the theoretical and applied aspects of anthropology while exploring the rich history of the discipline in a Canadian context. In ten concise chapters, readers are introduced to the

basic conceptual building blocks of introductory anthropology in a refreshingly succinct and engaging way With a strong focus on Canadian theory this book includes discussion of evolutionism feminist anthropology marriage and the family and political economy

**Theory in Social and Cultural Anthropology** R. Jon McGee, Richard L. Warms, 2013-08-28 Social and cultural anthropology and archaeology are rich subjects with deep connections in the social and physical sciences Over the past 150 years the subject matter and different theoretical perspectives have expanded so greatly that no single individual can command all of it Consequently both advanced students and professionals may be confronted with theoretical positions and names of theorists with whom they are only partially familiar if they have heard of them at all Students in particular are likely to turn to the web to find quick background information on theorists and theories However most web based information is inaccurate and or lacks depth Students and professionals need a source to provide a quick overview of a particular theory and theorist with just the basics the who what where how and why if you will In response SAGE Reference plans to publish the two volume Theory in Social and Cultural Anthropology An Encyclopedia Features Benefits Two volumes containing approximately 335 signed entries provide users with the most authoritative and thorough reference resource available on anthropology theory both in terms of breadth and depth of coverage To ease navigation between and among related entries a Reader's Guide groups entries thematically and each entry is followed by Cross References In the electronic version the Reader's Guide combines with the Cross References and a detailed Index to provide robust search and browse capabilities An appendix with a Chronology of Anthropology Theory allows students to easily chart directions and trends in thought and theory from early times to the present Suggestions for Further Reading at the end of each entry and a Master Bibliography at the end guide readers to sources for more detailed research and discussion

**Spaces of Capital/spaces of Resistance** Chris Hesketh, 2017 Based on fieldwork in Chiapas and Oaxaca Mexico this book examines the production of space within the global political economy Drawing on multiple disciplines Hesketh's discussion of state formation in Mexico takes us beyond the national level to explore the interplay between global regional national and sub national articulations of power

Dawson, 2013-04-04 Mexicans have long dreamt of the First World and in recent times it has landed with a thud Under the guise of globalization Mexico opened its borders reformed its political system and transformed its economy The impacts have been paradoxical In First World Dreams Alexander Dawson explores the contradictions and challenges which Mexico has experienced in embracing the market so wholeheartedly A vibrant civil society is marred by human rights abuses and violent rebellion Market reforms have produced a stable economy economic growth and great fortunes while devastating much of the countryside and crippling domestic producers Mexico is today one of the world's largest exporting nations yet has a perpetually negative trade balance It is in a constant state of becoming a democracy a nation where human rights are respected a modern industrial nation and a more violent fragmented place where the chasms of wealth and poverty threaten to undo the dreams of modernity
