Mayors in Action: Five Approaches to Urban Governance John P. Kotter, Paul R. Lawrence, 1974 Mayors in Action John P. Kotter, 1974 **Directly Elected Mayors in Urban Governance** David Sweeting, 2017-03-15

Though mayors directly elected by the residents of a city are so commonplace as to go without comment in the United States and Canada in many other countries including England Germany and Hungary they are a recent development where they have been pitched as an effective democratically accountable governing option But is that actually true Do directly elected mayors deliver better governance than the alternatives This book presents the results of an in depth study of that question and the role of the elected mayor in general drawing on data from a large number of cities from around the world to show the wide range of policy approaches and outcomes that the position can entail

Handbook on Local and Regional Governance Filipe Teles, 2023-01-13 Holistic in approach this Handbook s international range of leading scholars present complementary perspectives both theoretical and empirically pertinent to explore recent developments in the field of local and regional governance *Governing Turbulence, Risk and Opportunities in the Complexity Age* Guglielmo Chiodi, Antonio Bazilio

Floriani Neto, Enrique Caceres Niet, 2018-11-23 The book is composed of several articles that explore complexity in its most varied aspects The solution of contemporary problems whatever they may be requires a multifaceted vision far beyond the reductionist perspective The study of complex systems however does not have the capacity to offer ready answers to the challenges of humanity On the contrary it points to the increase in uncertainty the need to control variables and uncertainty This does not mean therefore that we should simply ignore the social economic and political phenomena that are all around us What this book demonstrates is the importance of knowledge being disseminated and it is imperative that different sciences exchange ideas theories and breakthroughs **Managerial Discretion in Government Decision Making**

Jacqueline Vaughn, Eric Edwin Otenyo, 2007 Managerial Discretion In Government Decision Making Beyond The Street Level Provides A Comprehensive Discussion Of Managerial And Executive Discretion At All Levels Of Government Beginning With A Discussion Of Moving Beyond Street Level Discourse This Book Sets The Stage For Studying Managerial Discretion It Examines Aspects Of Expertise In Discretionary Decision Making At The Federal Level Including Several Case Examples To Account For The Wide Usage Of Executive Orders In Managerial Positions And Examines The Formal Roles Of Managers At State Government Levels While Highlighting The Variations Among State Managers In Their Usage Of Discretion With Examples Of State Managers With Too Much Discretion Next The Book Identifies Key Aspects Of Managerial Discretion In Local Governments Including Information On The Applicability Of Discretion In School Districts And Its Implications In Decision Making Discusses The Myriad Ways In Which Managers In Local Jurisdictions Either Individually Or Collectively Make Decisions Within The Parameters Of State Laws Board Regulations And Or Council Ordinances And Concludes With A Discussion Of How Much Discretion Managers Should Have And Dangers Inherent In Providing Managers With Too Much

Discretion And Reinforces The Discourses On Accountability In Public Organizations City Executives David N. Ammons, Charledean Newell, 1989-01-01 This study explores the work life of mayors city managers and other top executives in city government Based on a survey of 527 city executives and enlivened with numerous anecdotes the book documents time allocation patterns and work routines City Executives makes comparisons with previous studies to show how city executives compare with managers in other types of organizations The authors also note how city managers role has changed over a 20 year period City executives are shown to be like their private sector counterparts For example they function at a relentless pace are frequently interrupted in their work and are generally overburdened However because city workers operate in an environment open to public scrutiny they are left with only a minority of their professional time to attend to matters that they describe as priorities Instead they must constantly respond to intergovernmental demands emergencies and the needs of citizens and legislative officials *Challenge*, 1975 *Governing Middle-sized Cities* James R. Bowers, Wilbur C. Rich, 2000 This collection of 12 case studies illustrates the range of problems facing mid sized cities in the USA and the variety of approaches that mayors have used to cope with them Topics covered include education crime economic development and the political incorporation of minorities Power and Politics in the City Janice Caulfield, John Wanna, 1995 This study of community power in Brisbane analyses the challenges posed by growth and the shifting of the balance of power from the country to the city Consists of a series of case studies focusing on discrete policy issues and key areas and exploring topics such as relations between state and city governments and between public and private sectors and their impact on the Brisbane community Caulfield is a lecturer in public administration at the University of Queensland and Wanna is a senior lecturer in politics and public policy at Griffith University **State and Local Politics** David Berman, 2015-02-18 Politics at the state and local level has never been more interesting than in our devolutionary age This popular text is the most concise readable and current introduction to the field Now in its ninth edition the book keeps its focus on the varied and changing political and economic environments in which state and local governments function and their strengths and weaknesses in key areas of public policy The text is enlivened by boxed sections that relate individual experiences or highlight particular issues and developments Topics covered in this edition include the drive toward devolution in the federal system fiscal constraints political accountability affirmative action majority minority districts and changing approaches to welfare education land use and law enforcement **Critical Social Theory in Public Administration** Richard C Box, 2015-03-26 The essential premise of critical social theory is that contemporary society is neither democratic nor free but that modern global capitalism creates a citizenry satiated with consumer goods unaware of alternative ways of living In the public sector critical theory suggests that governing systems are influenced if not controlled by the wealthy and powerful leaving public professionals to decide whether to serve those interests or the interests of a broader public This book provides a framework for the application of critical social theory in public administration Its goal is to encourage awareness among public

administration scholars and practitioners of social conditions that tend to shape and constrain scholarship practice teaching and social change At a time when concern for public interest and a civil society have largely been displaced by the goals of economic efficiency and the New Public Management Critical Social Theory in Public Administration presents a viable alternative that incorporates the latest views of postmodern thinking with the central elements of critical social theory **In defence of councillors** Colin Copus,2015-12-01 By using qualitative research from a number of related projects the book examines the roles functions and responsibilities of councillors and the expectations placed upon them by citizens communities and government Leadership for Nursing and Allied Health Care Professions Veronica Bishop,2009-03-16 It is time to take stock to promote and support our articulate and strategic thinkers and to let them shine This inspiring book is a wake up call to nurses and allied health professionals to develop their leadership skills and to make a real difference to global health and social development Veronica Bishop uses high profile historical case studies to illustrate the concept of leadership and put it into a context that is easily understood The book demystifies the key elements of leadership highlights the difference between leadership and management and identifies the essential components for successful leadership amongst health care professionals The book incorporates A new research based theory of leadership that embraces clinical excellence Educational and practice based concepts to support key leadership skills Case examples of real experiences Exercises for developing your own leadership skills at the end of each chapter Contributions from experts from a wide range of countries and with diverse knowledge bases make a topic that is often presented as highly complex and out of reach readily accessible Leadership for Nursing and Allied Health Care Professions is key reading for all nurses and allied health care professionals aspiring to be leaders Contributors Sue Antrobus Mary Lovegrove Annie Macleod Abigail Masterson Dawn Freshwater Iain Graham Philip Esterhuizen David Stanley Mike Saks Veronica Bishop Tyrone Goh With a foreword by Tony Butterworth Wherever you are in your career this book offers a great deal to inspire and to provoke thought We could all learn from it Nursing Standard This book is timely This highly readable and informative book written by experts in the field will be of interest to all nursing and allied health professionals particularly those aspiring and emerging leaders Professor David R Thompson University of Leicester UK This is a book that all students studying leadership in health care have been waiting for It is inspirational exciting to read with its many different case studies exercises to bring about reflection and should result in a more empowered and enlightened work force Phil Halligan University College Dublin Ireland With the increased focus on clinical leadership this book is a welcome addition to the vast array of leadership books currently available and will appeal to a wide range of practising clinicians looking for an introduction to the subject Mark Sewell Postgraduate Student University of Birmingham University of Manchester UK *The Politics of Dissatisfaction* William E. Lyons,David Lowery,Ruth Hoogland DeHoog,2019-07-23 The Politics of Dissatisfaction Citizens Services and Urban Institutions is destined to be a classic in public administration and public policy it makes major theoretical and empirical

contributions to the literature in both fields It is a rigorous empirical attempt to assess the public choice view of citizenship and local government The research upon which this book is based was founded on conversations between two of its authors W E Lyons and David Lowery during the early 1980s
