Geological Survey Professional Paper Geological Survey (U.S.),1978 **Ski Trails and Wildlife** Eric Burr,2008 Snow sports are usually the first step to learning about snow country wildlife which is only as safe as knowledgeable people want it to be Unfortunately knowledge is too often lacking and skiing is perceived as detrimental too wildlife Reality is that skiing in all its many forms from ski lift resorts to far flung Scandinavian style ski touring holds the keys to wildlife conservation and restoration No amount of litigation can change this basic fact of life although the Mineral King Case from the Supreme Court of the United States certainly changed the legal landscape for all environmental litigation Mineral King s near miss at becoming another ski lift avalanche disaster area preceded Early Winters another almost ski lift area which shares the honor of being a Supreme Court case and is the last chapter of this book Olympic National Park is the other ski history explored so that the National Parks are given equal emphasis with America s National Forests and Canada s Crown Lands An extensive bibliography also includes many electronically available sources The language is not technical and no prior experience with either skiing or wildlife is presumed The book is primarily written for both skiing and wildlife enthusiasts who may not know much about each other It is intended as a peace offering to hopefully prevent future ski wars and unnecessary trips through the legal system That effort could be better spent restoring wildlife and the life support system of our circumpolar boreal forest **U.S. Geological Survey Professional Paper** ,1984 **Interior West Global Change Workshop** Richard W. Sheets,Donald K. Grayson,2013-09-24 Volcanic Activity and Human Ecology deals with dating chronology stratigraphy volcanic activity and with the impacts of volcanism on animals plants human populations and the environment Some of the chapters explain how such findings must be weighed against other causes that influence human behavior and survival such as factors of social customs climatic change shifting biogeographic patterns disease and the ability to adapt Each of the chapters that assess the possible human response to volcanism does so by searching for multiple explanations of the archaeological record avoiding the simple argument that people were dramatically and inevitably overcome by catastrophic geologic events The book begins with discussions of

volcanism as seen by geologists and pedologists These include s a general overview of volcanoes and volcanism a review of the production dispersal and properties of tephra and of the geologic methods used to study tephra and the nature of volcanic soils and their economic impact Subsequent chapters use the geologic and modern records to examine volcanoes as hazards to people The final series of papers deals with the interrelationships between volcanism and human occupations as seen through the archaeological paleobotanical and paleozoological records

Environmental Law and the Values of Nature Richard J. Finkmoore, 2010 This casebook provides students in introductory environmental law courses with the broad understanding necessary to practice in the field and a firm foundation for subsequent course work in specialized environmental subjects In addition to covering many standard topics such as NEPA and the Clean Water Act this book emphasizes natural resources law including water allocation species conservation and federal public land management Unlike many casebooks it also examines energy issues climate change sustainable development and the environmental movement This distinctive book uses the historical development of environmental and natural resources law as a helpful context within which to understand the modern law in these fields It also incorporates eight engaging case studies showing the application of environmental law in the real world The volume includes significant excerpts from the major environmental statutes so that it is not necessary to assign a statutory supplement Thought provoking readings from for example Lewis and Clark Marsh Muir Udall Wilkinson Sax Lazarus Rodgers Shabecoff Hays E O Wilson Leopold Reisner and Speth enhance student insight One theme of the casebook which promotes enthusiastic class discussion is that the environment possesses a wide range of values or characteristics of worth and that an appreciation of these values illuminates the objectives strengths and limitations of contemporary law
