**Basic Concepts of Criminal Law** George P. Fletcher, 1998-09-03 In the United States today criminal justice can vary from state to state as various states alter the Modern Penal Code to suit their own local preferences and concerns In Eastern Europe the post Communist countries are quickly adopting new criminal codes to reflect their specific national concerns as they gain autonomy from what was once a centralized Soviet policy As commonalities among countries and states disintegrate how are we to view the basic concepts of criminal law as a whole Eminent legal scholar George Fletcher acknowledges that criminal law is becoming increasingly localized with every country and state adopting their own conception of punishable behavior determining their own definitions of offenses Yet by taking a step back from the details and linguistic variations of the criminal codes Fletcher is able to perceive an underlying unity among diverse systems of criminal justice Challenging common assumptions he discovers a unity that emerges not on the surface of statutory rules and case law but in the underlying debates that inform them Basic Concepts of Criminal Law identifies a set of twelve distinctions that shape and guide the controversies that inevitably break out in every system of criminal justice Devoting a chapter to each of these twelve concepts Fletcher maps out what he considers to be the deep structure of all systems of criminal law Understanding these distinctions will not only enable students to appreciate the universal fundamental ideas of criminal law but will enable them to understand the significance of local details and variations This accessible illustration of the unity of diverse systems of criminal justice will provoke and inform students and scholars of law and the philosophy of law as well as lawyers seeking a better understanding of the law they practice

**Refugee Displacement, Disability and Human Rights** Philippa Duell-Piening, 2025-02-25 This book presents a timely and innovative exploration of one of the first human rights articles about data production and processing the Convention on the Rights of Persons with Disabilities article 31 Statistics and data collection The study provides detailed explorations of the legal and practical demands of article 31 how these have been interpreted and the practice of human rights research with marginalised communities It describes the history of the article s drafting in detail uncovering the tensions at its heart today This analysis provides the foundations for an alternative doctrinal
