Women Voicing Resistance Suzanne McKenzie-Mohr, Michelle N. LaFrance, 2014-03-26 Feminist scholars have demonstrated how dominant discourses and master narratives frequently reflect patriarchal influence, thereby distorting and depoliticizing women's storying of their own lives. In this groundbreaking volume, a number of internationally recognized researchers working across a range of disciplines provide a detailed examination of women's attempts to counter story their lives when prevailing discourses are unhelpful or indeed harmful. As such, it is an exploration of women's agency and resistance which highlights the challenges and complexities of such discursive work. The chapters explore women's resistance across a wide range of experiences, including intimate partner violence, casual sex, depression, premenstrual change, disordered eating, lesbian identity, women's work in male-dominated spaces, rape, and child birth. Each chapter combines theoretical analyses with illuminating first-hand accounts and elaborates practical implications that provide directions for individual and social change. Providing an incisive and comprehensive exploration of discourse, oppression, and resistance that cuts across domains of women's everyday lives, *Women Voicing Resistance* will be of great interest to students, scholars, and practitioners in the fields of psychology, gender studies, women's studies, sociology, and social work.

Gender, Emotion, and the Family Leslie Brody, 2009-07-01 Do women express their feelings more than men? Popular stereotypes say they do, but in this provocative book, Leslie Brody breaks with conventional wisdom. Integrating a wealth of perspectives and research, biological, sociocultural, developmental, her work explores the nature and extent of gender differences in emotional expression, as well as the endlessly complex question of how such differences come about. Nurture, far more than nature, emerges here as the stronger force in fashioning gender differences in emotional expression. Brody shows that whether and how men and women express their feelings varies widely from situation to situation and from culture to culture, and depends on a number of particular characteristics, including age, ethnicity, cultural background, power, and status. Especially pertinent is the

organization of the family in which boys and girls elicit and absorb different emotional strategies Brody also examines the importance of gender roles whether in the family the peer group or the culture at large as men and women use various patterns of emotional expression to adapt to power and status imbalances Lucid and level headed *Gender Emotion and the Family* offers an unusually rich and nuanced picture of the great range of male and female emotional styles and the variety of the human character *Standing on New Ground* Catherine Anne Cavanaugh, Catherine Cavanaugh, Randi Warne, 1993 No description
