McDonald Telescope:

Big and Bright David S. Evans, J. Derral Mulholland, 1986-10-01 By day every year over 40 000 visitors pour in Across the Rio Grande a hundred miles away Mexican mountaineers use the white domes as landmarks By night perched almost 7 000 feet above the sleeping earthbound world astronomers probe the secrets of the night sky This is the University of Texas McDonald Observatory one of the world s largest university operated astronomical installations Big and Bright A History of the McDonald Observatory is the story of a remarkable collaboration between two major universities one a prestigious private school the other a growing southwestern state institution The University of Chicago had astronomers but its Yerkes Observatory was aging and underfunded the University of Texas had money for an observatory but no working astronomer to staff it Out of their mutual need they formed a thirty year compact for a joint venture Unusual in its day the Yerkes McDonald connection presaged the future In this arrangement one can see some of the beginnings of today s consortium big science Now the McDonald Observatory s early history can be put in proper perspective Blessed with a gifted and driving founding director the world s then second largest telescope and an isolation that permitted it to be virtually the only major astronomical observatory that continued operations throughout World War II the staff of McDonald Observatory helped lay the foundations of modern astrophysics during the 1940s For over a decade after the war a lonely mountaintop in West Texas was the mecca that drew nearly all the most important astronomers from all over the world Based on personal reminiscences and archival material as well as published historical sources Big and Bright is one of the few histories of a major observatory unique in its focus on the human side of the story

The History of the Telescope Henry C. King, 2003-01-01 This remarkable history encompasses not only the achievements of the early inventors and astronomers but also the less frequently recounted stories of the instrument makers and of the actual instruments A model of unsurpassed comprehensive scholarship this volume covers many fields including professional and amateur astronomy 196 black and white illustrations

Big and Bright David S. Evans, J. Derral Mulholland, 2013-09-13 By day every year over 40 000 visitors pour in Across the Rio Grande a hundred miles away Mexican mountaineers use the white domes as landmarks By night perched almost 7 000 feet above the sleeping earthbound world astronomers probe the secrets of the night sky This is the University of Texas McDonald Observatory one of the world s largest university operated astronomical installations Big and Bright A History of the McDonald Observatory is the story of a remarkable collaboration between two major universities one a prestigious private school the other a growing southwestern state institution The University of Chicago had astronomers but its Yerkes Observatory was aging and underfunded the University of Texas had money for an observatory but no working astronomer to staff it Out of their mutual need they formed a thirty year compact for a joint venture Unusual in its day the Yerkes McDonald connection presaged the future In this arrangement one can see some of the beginnings of today s consortium big science Now the McDonald Observatory s early

history can be put in proper perspective Blessed with a gifted and driving founding director the world's then second largest telescope and an isolation that permitted it to be virtually the only major astronomical observatory that continued operations throughout World War II the staff of McDonald Observatory helped lay the foundations of modern astrophysics during the 1940s For over a decade after the war a lonely mountaintop in West Texas was the mecca that drew nearly all the most important astronomers from all over the world Based on personal reminiscences and archival material as well as published historical sources *Big and Bright* is one of the few histories of a major observatory unique in its focus on the human side of the story

Observatories of the Southwest Douglas Isbell, Stephen E. Strom, 2016-12-15 With its clear skies and low humidity the southwestern United States is an astronomer's paradise where observatories like Kitt Peak have redefined the art of skywatching The region is unique in its loose federation of like minded research outposts and in the quantity and diversity of its observatories places captured in this unique guidebook Douglas Isbell and Stephen Strom both intimately involved in southwestern astronomy have written a practical guide to the major observatories of the region for those eager to learn what modern telescopes are doing to understand the role each of these often quirky places has played in advancing our understanding of the cosmos and hopefully to visit and see the tools of the astronomer up close For each observatory the authors describe its history highlights of its contributions to astronomy with an emphasis on recent results and information for visitors Also included are wide ranging interviews with astronomers closely associated with each site Observatories covered range from McDonald in Texas to Palomar in California with significant outposts in between Arizona's Kitt Peak National Observatory southwest of Tucson the Lowell Observatory in Flagstaff and the Whipple Observatory outside Amado and New Mexico's Very Large Array near Socorro and Sacramento Peak close to Sunspot In addition to describing these established institutions they also take a look ahead to the most powerful ground based telescope in the world just beginning to operate at full power on Mount Graham in Safford Arizona With more than three dozen illustrations *Observatories of the Southwest* is accessible to amateur astronomers tourists students and teachers anyone fascinated with the contributions that astronomy has made to deepening our understanding of humanity's place in the universe whether exploring the solar system from Lowell Observatory or studying the birth of stars using the army of giant radio telescopes at the Very Large Array This book aims to inspire visits to these sites by illuminating the major scientific questions being pursued every clear night beneath the dark

skies of the Southwest and the amazing machinery that makes these pursuits possible

William Sheehan, Klaus R. Brasch, 2024-03-05 In 1957 Sputnik launched toward the stars President Kennedy then announced that the United States would send men to the Moon and then return them to Earth These pivotal moments sparked an unequalled bound forward in human innovation and scientific exploration At the heart of this momentous time were the men and women working behind the scenes Scientists historians and astronomers share their memories and contributions from this unparalleled era in essays told in their own words They are the remarkable generation who witnessed and contributed to some of space science's most stunning achievements Here they have recorded their memories their childhood inspirations their challenges failures and triumphs for future generations A unique and authoritative record of a momentous period in human history The Space Age Generation highlights the golden age of space exploration and the people who made it happen Contributors Leo Aerts Alexander Basilevsky Klaus Brasch Clark R Chapman Dale P Cruikshank William K Hartmann William Leatherbarrow Baerbel Koesters Lucchitta Yvonne Pendleton Peter H Schultz William Sheehan Paolo Tanga Charles A Wood

The Future of Small Telescopes in the New Millennium: Science in the shadows of giants Terry D. Oswalt, 2003

Space Technology & Planetary Astronomy Joseph N. Tatarewicz, 1990 the book reminds us of an important lesson in the postwar era of big science that government policy may lead initially to tremendous support for various fields of science and technology Science a triumph of historical analysis Choice This is an excellent record of the beginnings of the NASA planetary astronomy program in the years 1958-70 American Historical Review The historical circumstances that led to this country's great leap into space were unique but it is clear that there are many lessons to be learnt from this enthralling tale and Tatarewicz tells the tale well Annals of Science When NASA went looking for expertise on the moon and planets following Sputnik they found that astronomers had long since turned their telescopes away from our planets and toward the stars Where were the scientists who could help the United States explore the solar system The answer as this important new study shows was that NASA had to create them This story of the precipitous rise and decline of planetary astronomy is an important case study of science in an age of state managed research and development It demonstrates that the lines between science technology politics and society are anything but fixed and impermeable AURA and Its US National Observatories Frank K. Edmondson, 1997-03-06 A new source of funding for astronomy stemmed from the creation of the National Science Foundation NSF in 1950 Astronomers were quick to take advantage of the opportunity to found new observatories The science and politics of the establishment funding construction and operation of the Kitt Peak National Observatory KPNO and the Cerro Tololo Inter American Observatory CTIO by the Association of Universities for research in Astronomy AURA are here seen from the unique perspective of Frank K Edmondson a former member of the AURA board of directors

Peter Broughton,2018-01-18 John Stanley Plaskett was

Canada's pre eminent astronomer in the first half of the twentieth century His legacy lives on in the observatory he founded in Victoria British Columbia and the reputation he built for Canada as a nation making vital contributions to basic science Plaskett's pioneering work with the most massive stars and his definitive determination of the rotation of the Milky Way Galaxy earned him international recognition of the highest order Northern Star explores Plaskett's unorthodox and fascinating life from his rural roots near Woodstock Ontario through his days as a technician at the University of Toronto to his initiation in astronomy at the Dominion Observatory in Ottawa His greatest achievements followed after he persuaded the government of Canada in spite of the strictures of the First World War to finance what was then the world's largest operational telescope Peter Broughton's accessible and engaging prose illuminates Plaskett's numerous achievements and the social political economic and religious milieu surrounding them This richly illustrated volume invites readers to understand the pull that Plaskett's passions personality and motivations exerted on him during his lifetime Congressional Record United States. Congress, 1969 The Congressional Record is the official record of the proceedings and debates of the United States Congress It is published daily when Congress is in session The Congressional Record began publication in 1873 Debates for sessions prior to 1873 are recorded in The Debates and Proceedings in the Congress of the United States 1789 1824 the Register of Debates in Congress 1824 1837 and the Congressional Globe 1833 1873 **McDonald's Restaurants of Illinois, Inc. V. Commissioner of Internal Revenue**, 1982 *Gerard P. Kuiper and the Rise of Modern Planetary Science* Derek W. G. Sears, 2019-03-26 Astronomer Gerard P Kuiper ignored the traditional boundaries of his subject Using telescopes and the laboratory he made the solar system a familiar intriguing place It is not astronomy complained his colleagues and they were right Kuiper had created a new discipline we now call planetary science Kuiper was an acclaimed astronomer of binary stars and white dwarfs when he accidentally discovered that Titan the massive moon of Saturn had an atmosphere This turned our understanding of planetary atmospheres on its head and it set Kuiper on a path of staggering discoveries Pluto was not a planet planets around other stars were common some asteroids were primary while some were just fragments of bigger asteroids some moons were primary and some were captured asteroids or comets the atmosphere of Mars was carbon dioxide and there were two new moons in the sky one orbiting Uranus and one orbiting Neptune He produced a monumental photographic atlas of the Moon at a time when men were landing on our nearest neighbor and he played an important part in that effort He also created some of the world's major observatories in Hawaii and Chile However most remarkable was that the keys to his success sprang from his wartime activities which led him to new techniques This would change everything Sears shows a brilliant but at times unpopular man who attracted as much dislike as acclaim This in depth history includes some of the twentieth century's most intriguing scientists from Harold Urey to Carl Sagan who worked with and sometimes against the father of modern planetary science Now as NASA and other space agencies explore the solar system they take with them many of the ideas and concepts first described by Gerard P Kuiper
