McDonnell Douglas Dc9 Great Airliners Ser:

Douglas Twinjets Thomas Becher, 2002 The Douglas twinjet family the DC 9 MD 80 MD 90 and Boeing 717 is beaten only by the Boeing 737 to the title of most popular airliner In this book the author describes the background design development and use of these popular and easily recognizable aircraft from their origins in the 1960s to the 21st century

McDonnell Douglas DC-9 Terry Waddington, 1998 An absorbing review of McDonnell Douglas local service jetliner the DC 9 [Illustrated History of McDonnell Douglas Aircraft](#) Bill Gunston, 1999-12-15 What a history What a company With close technical analysis from Bill Gunston and artist Mike Badrocke's meticulous cutaway drawings presented to the best effect on fold out pages this volume tells the complete story of one of the few truly great aircraft builders **Flying Blind** Peter Robison, 2021-11-30 NEW YORK TIMES BESTSELLER A suspenseful behind the scenes look at the dysfunction that contributed to one of the worst tragedies in modern aviation the 2018 and 2019 crashes of the Boeing 737 MAX An authoritative gripping and finely detailed narrative that charts the decline of one of the great American companies New York Times Book Review from the award winning reporter for Bloomberg Boeing is a century old titan of industry It played a major role in the early days of commercial flight World War II bombing missions and moon landings The planemaker remains a cornerstone of the U S economy as well as a linchpin in the awesome routine of modern air travel But in 2018 and 2019 two crashes of the Boeing 737 MAX 8 killed 346 people The crashes exposed a shocking pattern of malfeasance leading to the biggest crisis in the company's history and one of the costliest corporate scandals ever How did things go so horribly wrong at Boeing Flying Blind is the definitive exposé of the disasters that transfixed the world Drawing from exclusive interviews with current and former employees of Boeing and the FAA industry executives and analysts and family members of the victims it reveals how a broken corporate culture paved the way for catastrophe It shows how in the race to beat the competition and reward top executives Boeing skimped on testing pressured employees to meet unrealistic deadlines and convinced regulators to put planes into service without properly equipping them or their pilots for flight It examines how the company once a treasured American innovator became obsessed with the bottom line putting shareholders over customers employees and communities By Bloomberg investigative journalist Peter Robison who covered Boeing as a beat reporter during the company's fateful merger with McDonnell Douglas in the late 90s this is the story of a business gone wildly off course At once riveting and disturbing it shows how an iconic company fell prey to a win at all costs mentality threatening an industry and endangering countless lives [De Havilland Comet](#) Colin Higgs, 2017-11 The world got a little smaller in July 1949 when the first jet powered airliner took to the skies barely four years after the end of the Second World War Not only was the de Havilland Comet 1 a lot faster than previous airliners it could fly higher and further It was packed with new technology but perhaps most importantly for those early passengers it was a quiet luxurious and even pleasant experience something that could never be said for the noisy piston engine aircraft that came before The Comet's leadership in jet travel

for the future was assured until aircraft began crashing The first ones were put down to pilot error but two disastrous events in 1954 grounded the fleet and Britain's advantage over the rest of the world was lost Boeing caught up with its ubiquitous 707 and the Comet was destined to become but a memory However rising from the ashes came a new Comet one that was bigger and more powerful than before and designed for completely different roles Where the first Comets had provided an expensive and plush way to travel for the rich few the new Comet 4s carried more passengers to a multitude of destinations inevitably becoming key carriers for the early package holidaymakers At the same time they became vital strategic transports for the RAF as the British Empire receded This book tells the full story of the world's first jet powered airliner from its remarkable beginnings through its early flight trials program to its entry into service The type's military career is also covered as is its construction also included in this volume are details of the numerous variants produced and those still surviving as exhibits today There are also twenty four superb artworks by world renowned aviation illustrator Juanita Franz
