Bernard Sinclair-Desgagné,2004 Sinclair Gessagn cole Polytechnique France presents this collection of 33 previously published papers with the intention of demonstrating key contributions for corporate management of environmental resources and risks Originally appearing in business policy and economics journals between 1973 and 2003 the papers describe aspects of corporate     **Water, Wastewater, and Stormwater Infrastructure Management** Neil S.

Grigg,2010-12-12 According to a report released by the Water Infrastructure Network WIN over the next 20 years America s water and wastewater systems will have to invest an additional 20 billion a year to replace aging and failing infrastructure in order to comply with the national environmental and public health priorities in the Clean Water Act and Safe Drink

**Handbook of Environmental Risk Assessment and Management** Peter P. Calow,2009-07-08 At the heart of

environmental protection is risk assessment the likelihood of pollution from accidents the likelihood of problems from normal and abnormal operation of industrial processes the likely impacts associated with new synthetic chemicals and so on. Currently risk assessment has been very much in the news the risks from BSE and E coli and the public perception of risks from nuclear waste etc. This new publication explains how scientific methodologies are used to assess risk from human activities and the resultant effects on people and the environment. Understanding such risks supplies crucial information to frame legislation, manage major habitats, businesses and industries and create development programmes. Unique in combining the science of risk assessment with the development of management strategies. Covers science and social science, politics, economics, psychology aspects. Very timely risk assessment lies at the heart of decision making in various topical environmental questions. BSE, Brent Spar, nuclear waste.

**Sustainable Measures** Martin Bennett, Peter James, Leon Klinkers, 2017-09-08. Environmental and social performance measurement and reporting by business has become a high profile issue during the 1990s. It is increasingly being requested by stakeholders and required by governments. Companies too are finding that they need better environmental and social performance data for effective internal management. And there are a growing number of standardisation initiatives such as the ISO 14031 guidelines on environmental performance evaluation or the CERES Global Reporting Initiative GRI template for sustainability reporting that are aimed at making it easier for more companies to take action and for stakeholders to compare their progress. Sustainable Measures collects together most of the key work and individuals concerned with the topic from around the world. Contributions include environmental and social reporting by John Elkington and colleagues at SustainAbility, the GRI discussion draft by Roger Adams and Martin Houldin on the FEE study of environmental reporting, Janet Ranganathan of the World Resources Institute on sustainability measures and Martin Bennett and Peter James on ISO 14031 and the future of environmental performance evaluation. There are also chapters examining current practice in Austria, Denmark, India, Indonesia, Japan, the Netherlands and South Africa, developments in electronic reporting as well as case studies of Baxter, Kunert, Niagara Mohawk, Unox, The Body Shop and the UK water industry and an analysis of leading social reports. The book is essential reading for all academics, campaigners, policy makers and practitioners with an interest in issues such as the standardization and comparability of environmental and social performance measures. Measuring and reporting on sustainable business, Eco points and other means of evaluating product impacts, The implementation of measurement and reporting, Best practice in corporate environmental and social reporting, New means of communicating environmental data, Environmental performance evaluation in developing countries.
