Social Skills and Mental Health (Psychology Revivals) Peter Trower, Bridget Bryant, Michael Argyle, 2013-12-16 In the 10 years or so prior to original publication in 1978 new theories and discoveries in the social sciences had given a scientific basis and new impetus to the development of social skills training as a form of therapy This book explores the progress made with this idea and gives practical guidance for therapists based on several years experience with the technique The book provides an account of the latest ideas at the time about the analysis of social behaviour non verbal communication social skill rules analysis of situations etc The different techniques for training and modifying social behaviour some old some very new are described and compared with detailed accounts There is a careful critical review of follow up studies of social skills training and other forms of social therapy on in patients out patients and volunteer subjects The second part of the book consists of a manual for assessing deficits and difficulties and for training in ten main areas of social deficiency such as observation listening speaking asserting and planning A rating scale questionnaire and user s booklet of training exercises is included The book should be of interest not only to psychiatric professionals psychiatrists clinical psychologists psychiatric nurses occupational therapists but to many others such as social and community workers teachers prison officers and lay people who may be interested in forming self help groups either on their own or with professional guidance

Legalizing Cannabis Tom Decorte, Simon Lenton, Chris Wilkins, 2020-02-20 Marijuana is the most widely used illegal drug in the world Over the past couple of decades several Western jurisdictions have seen reforms in or changes to the way cannabis use is being controlled departing from traditional approaches of criminal prohibition that have dominated cannabis use control regimes for most of the twentieth century While reform is stalled at the international level the last decade has seen an acceleration of legislative and regulatory reforms at the local and national levels with countries no longer willing to bear the human and financial costs of prohibitive policies Furthermore legalization models have been implemented in US states Canada and Uruguay and are being debated in a number of other countries These models are providing the world with unique pilot programs from which to study and learn This book assembles an international who s who of cannabis scholars who bring together the best available evidence and expertise to address questions such as How should we evaluate the models of cannabis legalization as they have been implemented in several jurisdictions in the past few years Which scenarios for future cannabis legalization have been developed elsewhere

and how similar different are they from the models already implemented What lessons from the successes and failures experienced with the regulation of other psychoactive substances such as alcohol tobacco pharmaceuticals and legal highs can be translated to the effective regulation of cannabis markets Legalizing Cannabis will appeal to anyone interested in public health policies and drug policy reform and offers relevant insights for stakeholders in any other country where academic societal or political evaluations of current cannabis policies and even broader current drug policies are a subject of debate

World Wide Weed Tom Decorte,2016-02-11 For the majority of its history the cultivation of cannabis did not stand out at least compared to the cultivation of other illegal plants Cannabis plantations like coca bush or opium poppy plantations were typically large in size grown by local farmers in a handful of developing producing countries processed and then exported to industrial consuming nations While cocaine and heroin are still produced in a handful of developing countries cannabis cultivation is increasingly universal From Europe to the Americas and Oceania import substitution in cannabis markets has been noticed in almost every developed country around the world with a notable aversion for discrimination Geographical technological cultural and economic factors help to explain why indoor and outdoor domestic cultivation is well established and why the nature and extent of cultivation varies so dramatically across the western developed nations As we start the second decade of the 21st century the new cannabis industry continues to fascinate both casual and academic observers of the drug scene Researchers around the world have become increasingly interested in the phenomenon aiming to describe and potentially explain the rapid switch from importation to domestic production in their own countries In bringing together some of the world s leading experts on cannabis cultivation this book contains sixteen chapters that take an interdisciplinary look at global trends in cannabis cultivation It will serve as an exemplar for wider discussions of key theories and concepts relating to the spread not just of cannabis cultivation but also of illegal markets more generally the actors that operate within these markets and the policies and practices that are employed in response to developments within these markets

Cannabis Physiopathology Epidemiology Detection Gabriel G. Nahas, 2017-07-28 Cannabis Physiopathology and Detection features an outstanding collection of contributions from leading researchers around the world Papers were presented at the Second International Colloquium on Illicit Drugs held at the French National Academy of Medicine in April 1992 The book reviews the latest clinical reports describing the effects of cannabis on the brain imaging techniques memory and psychomotor performance cannabis and schizophrenia effects on reproduction male and female and carcinogenicity Aspects of detection covered in the volume include methods results of different testing groups and legal issues associated with testing and detection Cannabis Physiopathology and Detection will be an important addition to the reference collections of marijuana researchers pathologists government agencies medical school libraries and drug testers **Estrategia nacional de control de drogas** United States. Office of National Drug Control Policy, 1999 *Becoming a Marihuana User* Howard S. Becker, 2015-07-06 OG Kush Sour Diesel Wax shatter and vapes Marijuana has come a long way since its seedy days in the back parking lots of our culture So has Howard S Becker the eminent sociologist jazz musician expert on deviant culture and founding NORML board member When he published *Becoming a Marihuana User* more than sixty years ago hardly anyone paid attention because few people smoked pot Decades of Cheech and Chong films Grateful Dead shows and Cannabis Cups later and it s clear marijuana isn t just an established commodity it s an entire culture And that s just the thing Becker totally called it pot has everything to do with culture It s not a blight on culture but a culture itself in fact you ll see in this book the first use of the term users rather than abusers or addicts Come along on this short little study now a famous timestamp in

weed studies and you will be astonished at how relevant it is to us today Becker doesn't judge but neither does he holler for legalization tell you how to grow it in a hollowed out dresser or anything else like that for which there are plenty of other books you can buy Instead he looks at marijuana with a clear sociological lens as a substance that some people enjoy and that some others have decided none of us should From there he asks so how do people decide to get high and what kind of experience do they have as a result of being part of the marijuana world What he discovers will bother some especially those who proselytize the irrefutably stunning effects of the latest strain chemistry isn't everything the important thing about pot is how we interact with it We learn to be high We learn to like it And from there we teach others passing the pipe in a circle that begins to resemble a bona fide community defined by shared norms values and definitions just like any other community All throughout this book you'll see the intimate moments when this transformation takes place You'll see people doing it for the first time and those with considerable experience You'll see the early signs of the truths that have come to define the marijuana experience that you probably won't get high at first that you have to hold the hit in and that there are other people here who are going to smoke that too

Cannabis Chris Duvall, 2023-08-03 Cannabis una de las primeras plantas domesticadas de la humanidad se ha utilizado con fines espirituales terapéuticos recreativos e incluso punitivos durante miles de años Los seres humanos tienen un excelente conocimiento práctico de los usos del cannabis pero una comprensión limitada de sus consecuencias socioculturales pasadas o presentes debido a su prohibición generalizada Cannabis explora la historia cultural y la geografía del cultivo más ampliamente distribuido de la humanidad que suministra tanto cannabis como marihuana Un estudio accesible y profusamente ilustrado es una lectura esencial dada la rápida evolución de los debates sobre la legalidad y a la luz de los cambios en la criminalización de la marihuana en Uruguay algunos estados de EE UU y otros países del mundo En Cannabis Chris Duvall explora la historia cultural y la geografía del cultivo más ampliamente distribuido de la humanidad y que suministra tanto cannabis como marihuana Este libro se centra en el producto más valioso de la planta en la actualidad la droga psicoactiva marihuana y al mismo tiempo ofrece una visión global de la planta incluyendo regiones poco estudiadas como África y Australia Cannabis es también la historia del cannabis y su uso como fuente de fibra para cuerdas y textiles semillas de cannabis comestibles o aceite industrial para pinturas y combustible El autor no defiende ni la prohibición ni la legalización de la droga pero desafía los lugares comunes desde ambos lados del debate
