*The executive's dek book; a practical manual of correct usage* ,1944      **The Book of the Courtier** conte Baldassarre Castiglione,1903      **Ignition!** John Drury Clark,2018-05-23 A classic work in the history of science Readers will want to get their hands on this influential classic available for the first time in decades This newly reissued debut book in the Rutgers University Press Classics imprint is the story of the search for a rocket propellant which could be trusted to take man into space This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature with no guarantee of success or safety Acclaimed scientist and sci fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity The resulting volume is as much a memoir as a work of history sharing a behind the scenes view of an enterprise which eventually took men to the moon missiles to the planets and satellites to outer space      Experimental and Quasi-Experimental Designs for Research Donald T. Campbell,Julian C. Stanley,2015-09-03 We shall examine the validity of 16 experimental designs against 12 common threats to valid inference By experiment we refer to that portion of research in which variables are manipulated and their effects upon other variables observed It is well to distinguish the particular role of this chapter It is not a chapter on experimental design in the Fisher 1925 1935 tradition in which an experimenter having complete mastery can schedule treatments and measurements for optimal statistical efficiency with complexity of design emerging only from that goal of efficiency Insofar as the designs discussed in the present chapter become complex it is because of the intransigency of the environment because that is of the experimenter s lack of complete control
