The Social History of Ideas in Quebec, 1760-1896 Yvan Lamonde, 2013-05-01 In The Social History of Ideas in Quebec 1760 1896 Yvan Lamonde traces the province s political and intellectual development from the British Conquest to the election of Prime Minister Wilfrid Laurier From the individuals who formulated them to the networks in which they circulated to their reception Yvan Lamonde focuses on ideas at work and their role in shaping Quebec history The mapping of a complete intellectual circuit allows Lamonde to follow the strains of ideological debates monarchism liberalism republicanism democracy revolution ultramontanism nationalism over more than a century His work is informed by an encyclopaedic reading of the print culture of the period and the book conveys a profound and nuanced knowledge of the social context and cultural channels educational institutions newspapers the book trade in which intellectual debate occurred Lamonde argues that while these ideas concerned politics they went beyond the political they were a fundamental and everyday element of civic society that was expressed in the public sphere through pamphlets the popular press and sermons Lamonde s scrutiny of public opinion in Quebec allows him to place such currents of thought in the colony s international context that of France England Rome the United States and their respective metropolises The Social History of Ideas in Quebec 1760 1896 covers a volatile time in the province s history from the end of the French Regime through the American invasion the War of 1812 and the Rebellions in Lower Canada capturing the cultural ascension of a society and the foundations of Quebec identity

Hydropolitics David Massell, 2011-01-27 The construction in the 1940s of hydroelectric dams and reservoirs Lakes Manouan and Passe Dangereuse were enormous projects that had consequences not only on the environment but also on international affairs Built by the Aluminium Company of Canada Rio Tinto Alcan the project helped meet the American and Allied Forces demand for electrical power and aluminium ingot during the Second World War but also forced Innu Montagnais hunter trappers from their ancestral lands Examining sources as varied as the papers of the Franklin D Roosevelt Presidential Library and interviews with Montagnais elders Quebec Hydropolitics presents a compelling synthesis of business and social history as well as wartime politics David Massell reconstructs the story of a changing landscape through the perspectives of corporate executives government officials and Aborigines to show the effect that war had on Canadian resource extraction and energy policy as well as its indigenous peoples A narrative that flows from the Saguenay watershed to the centres of political power Quebec Hydropolitics is an informative look at the costs and benefits of large scale industrialization

Amassing Power David Perera Massell, Forest History Society, 2000 At the turn of the century American industrialist J B Duke set his sights on one of North America s greatest and most spectacular rivers the Saguenay In Amassing Power David Massell chronicles thirty years of international intrigue as Duke manoeuvred to gain access to develop and sell the tremendous hydro electric potential of a remote river in Quebec The damming of the Saguenay brought industrialisation on a grand scale to rural Quebec in the form of newsprint and aluminum manufacture Tapping into rich and diverse sources in Canada the United States and Europe Massell provides an interdisciplinary cross border study of American capital and Canadian resources He shows us how ever larger amounts of capital yielded increasingly massive and sophisticated applications of hydroelectric technology Grand industrial plans in turn encroached upon provincial water rights and farmers lands which drew the attention of the state He examines the protracted power struggle between public and private interests between American capitalists and the nascent bureaucracy of the province of Quebec and describes the origins and evolution of the events that led to state control over hydraulic resources in the province In doing so he provides vivid portraits of Duke and of Quebec politicians of the period and gives a dramatic account of the protracted battle of wits between Duke s chief engineer William States Lee and Quebec s chief of Hydraulic Service Arthur Amos Amassing Power speaks to the integration of North American economies vividly illustrating the process by which American capital drew Canada s resource rich North into the economic orbit of the United States *Metropolitan Natures* Stephane Castonguay, Michele Dagenais, 2011-07-30

One of the oldest metropolitan areas in North America Montreal has evolved from a remote fur trading post in New France into an international center for services and technology A city and an island located at the confluence of the Ottawa and St Lawrence Rivers it is uniquely situated to serve as an international port while also providing rail access to the Canadian interior The historic capital of the Province of Canada once Canada's foremost metropolis Montreal has a multifaceted cultural heritage drawn from European and North American influences Thanks to its rich past the city offers an ideal setting for the study of an evolving urban environment Metropolitan Natures presents original histories of the diverse environments that constitute Montreal and its region It explores the agricultural and industrial transformation of the metropolitan area the interaction of city and hinterland and the interplay of humans and nature The fourteen chapters cover a wide range of issues from landscape representations during the colonial era to urban encroachments on the Kahnawake Mohawk reservation on the south shore of the island from the 1918-1920 Spanish flu epidemic and its ensuing human environmental modifications to the urban sprawl characteristic of North America during the postwar period Situations that politicize the environment are discussed as well including the economic and class dynamics of flood relief highways built to facilitate recreational access for the middle class power generating facilities that invade pristine rural areas and the elitist environmental hegemony of fox hunting Additional chapters examine human attempts to control the urban environment through street planning waterway construction water supply and sewerage
