Queen Victorias Gene:

Queen Victoria's Gene D M Potts, W T W Potts, 2011-10-21 Queen Victoria's son Prince Leopold died from haemophilia but no member of the royal family before his generation had suffered from the condition Medically there are only two possibilities either one of Victoria's parents had a 1 in 50 000 random mutation or Victoria was the illegitimate child of a haemophiliac man However the haemophilia gene arose it had a profound effect on history Two of Victoria's daughters were silent carriers who passed the disease to the Spanish and Russian royal families The disease played a role in the origin of the Spanish Civil War and the tsarina's concern over her only son's haemophilia led to the entry of Rasputin into the royal household contributing directly to the Russian revolution The Last Princess Matthew Dennison, 2019-12-12 Beatrice Mary Victoria Feodore later Princess Henry of Battenberg was the last born in 1866 of Victoria and Albert's children and she would outlive all of her siblings to die as recently as 1944 Her childhood coincided with her mother's extended period of mourning for her prematurely deceased husband a circumstance which may have contributed to Victoria's determination to keep her youngest daughter as close to her as possible She would eventually marry Prince Henry of Battenberg in 1885 but only after overcoming her mother's opposition to their union Beatrice remained Queen Victoria's favourite among her five daughters and became her mother's constant companion and later her literary executor spending the years that followed Victoria's death in 1901 editing her mother's journals and voluminous correspondence Matthew Dennison's elegantly written biography restores Beatrice to her rightful place as a key figure in the history of the Victorian age and paints a touching and revealing portrait of the life and family of Britain's second longest reigning monarch Royal Maladies Alan R. Rushton, M. D., Ph. D., 2009-05-08 An intensive historical study of the hereditary diseases hemophilia and porphyria in the personal and political lives of the European royal families Part I Nineteenth century medical knowledge of hemophilia as a hereditary bleeding disorder will be considered Hemophilia appeared in a son born to Queen Victoria in 1853 Hemophilia was transmitted through Victoria's unaffected daughters to the ruling houses in Germany Russia and Spain The political consequences of a chronically ill male heir to the throne fostered the demise of the royal families in these countries The royal physicians were well aware of the hereditary nature of hemophilia and failed to advise the British royal family on this matter that had significant political consequences for the modern world Part II The Madness of King George III resulted from variegated porphyria an inherited disorder of heme metabolism The disorder was evident in The immediate family of George III Ancestors from at least the 13th century Descendants into the 20th century The malady was inherited by other ruling houses in continental Europe and affected political life there for over six centuries Genetic analysis will consider how such an anomaly could have been inherited through so many successive generations Preliminary DNA evidence will be considered to document variegated porphyria in living relatives of the British royal family Alternate history if these disorders had not plagued the royal families will be considered in conclusion **Victoria: The Queen** Julia Baird, 2017-10-03 The true story

Faces of Muhammad John Tolan, 2025-03-04 Heretic and impostor or reformer and statesman The contradictory Western visions of Muhammad In European culture Muhammad has been vilified as a heretic an impostor and a pagan idol But these aren't the only images of the Prophet of Islam that emerge from Western history Commentators have also portrayed Muhammad as a visionary reformer and an inspirational leader statesman and lawgiver In Faces of Muhammad John Tolan provides a comprehensive history of these changing complex and contradictory visions Starting from the earliest calls to the faithful to join the Crusades against the Saracens he traces the evolution of Western conceptions of Muhammad through the Reformation the Enlightenment and the nineteenth and twentieth centuries and up to the present day Faces of Muhammad reveals a lengthy tradition of positive portrayals of Muhammad that many will find surprising To Reformation polemicists the spread of Islam attested to the corruption of the

established Church and prompted them to depict Muhammad as a champion of reform In revolutionary England writers on both sides of the conflict drew parallels between Muhammad and Oliver Cromwell asking whether the prophet was a rebel against legitimate authority or the bringer of a new and just order Voltaire first saw Muhammad as an archetypal religious fanatic but later claimed him as an enemy of superstition To Napoleon he was simply a role model a brilliant general orator and leader The book shows that Muhammad wears so many faces in the West because he has always acted as a mirror for its writers their portrayals revealing more about their own concerns than the historical realities of the founder of Islam
