Emergent Identities Rob Cover, 2018-09-13. Examining the emergence of new sexual and gender identities in the context of an ever-changing digital landscape, *Emergent Identities* considers how traditional binary understandings of sexuality and gender are being challenged and overridden by a taxonomy of non-binary, fluid classifications and descriptors. In this comprehensive account of the ongoing shift in our understandings of gender and sexuality, Cover explores how and why traditional masculine, feminine, and hetero/homo dichotomies are quickly being replaced with identity labels such as heteroflexible, bigender, non-binary, asexual, sapiosexual, demisexual, ciswoman, and transcurious. Drawing on real-world data, Cover considers how new ways of perceiving relationships, attraction, and desire are contesting authorized institutional knowledge on gender and sexuality. The book explores the role that digital communication practices have played in these developments and considers the implications of these new approaches for identity, individuality, creativity, media, healthcare, and social belonging. A timely response to recent developments in the field of gender identity, this will be a fascinating read for students of Psychology, Gender Studies, Media and Cultural Studies, and related areas, as well as professionals in this field.
