Bajo el lema Universalidad y particularismo en las Américas reflexionó sobre la dialéctica entre la universalidad y los particularismos en la producción de conocimiento. Un diálogo en el que la necesidad de conocer los particularismos de los fenómenos sociales políticos artísticos y culturales obliga a formular nuevas hipótesis que enriquecen y replantean las grandes teorías generales de las ciencias y las humanidades. Cities as Anticipatory

Systems Salomón González-Arellano,Bruno Gandlgruber,2025-02-17 The theory of anticipation suggests that systems both biological and social can adapt and update based on predictive models Cities which can be seen as complex systems that are associated with innovation are undergoing changes in response to current socio ecological transitions Therefore cities can be viewed as anticipatory systems that may signal future transformations that arise in response to the challenges posed by these ongoing socio ecological transitions This book combines futures studies and anticipation theories with urban studies and theories of urban transition Chapters address theoretical and empirical aspects of both fields and present case studies from a wide array of international perspectives These diverse examples demonstrate how cities implement arrangements and

strategies to allow their actors of all kinds to anticipate change As such contributions in this edited volume explore possible scenarios and proposals for strengthening anticipatory competences in urban areas and examine the potential consequences of these innovations in the cities of the future Anales de la Facultad de Derecho y Ciencias Sociales Universidad de Buenos Aires.
