**Woody Plants of the Big Bend and Trans-Pecos** Louis A. Harveson,2016-02-04 Winner 2018 Carroll Abbott Memorial Award sponsored by the Native Plant Society of Texas The Trans Pecos region of Texas is home to a variety of big game species including desert mule deer pronghorn desert bighorn sheep white tailed deer elk feral hog and javelina several species of exotics such as aoudad axis deer and blackbuck antelope and domestic livestock that includes cattle horses goats sheep and bison Prepared by a team of range specialists at the Borderlands Research Institute in Alpine Texas this field guide will allow the area s ranch managers private landowners resource professionals students and other outdoor enthusiasts to identify the key woody plants that serve as valuable forage for these animals Encompassing 18 West Texas counties with application in like habitats in the western Hill Country and southern Rolling Plains as well as in northern Mexico and eastern New Mexico the book provides a thorough introduction to the natural features of the region and descriptions nutrition values and management prescriptions for 84 species of browse plants In addition to informing readers about the diet of the region s large animals this fully illustrated user friendly reference also intends to inspire the continued good stewardship of the land they inhabit      **American Buffalo** Steven Rinella,2008-12-02 From the host of the Travel Channel s The Wild Within A hunt for the American buffalo an adventurous fascinating examination of an animal that has haunted the American imagination In 2005 Steven Rinella won a lottery permit to hunt for a wild buffalo or American bison in the Alaskan wilderness Despite the odds there s only a 2 percent chance of drawing the permit and fewer than 20 percent of those hunters are successful Rinella managed to kill a buffalo on a snow covered mountainside and then raft the meat back to civilization while being trailed by grizzly bears and suffering from hypothermia Throughout these adventures Rinella found himself contemplating his own place among the 14 000 years worth of buffalo hunters in North America as well as the buffalo s place in the American experience At the time of the Revolutionary War North America was home to approximately 40 million buffalo the largest herd of big mammals on the planet but by the mid 1890s only a few hundred remained Now that the buffalo is on the verge of a dramatic ecological recovery across the West Americans are faced with the challenge of how and if we can dare to share our land with a beast that is the embodiment of the American wilderness American Buffalo is a narrative tale of Rinella s hunt But beyond that it is the story of the many ways in which the buffalo has shaped our national identity Rinella takes us across the continent in search of the buffalo s past present and future to the Bering Land Bridge where scientists search for buffalo bones amid artifacts of the New World s earliest human inhabitants to buffalo jumps where Native Americans once ran buffalo over cliffs by the thousands to the Detroit Carbon works a bone charcoal plant that made fortunes in the late 1800s by turning millions of tons of buffalo bones into bone meal black dye and fine china and even to an abattoir turned fashion

mecca in Manhattan's Meatpacking District where a depressed buffalo named Black Diamond met his fate after serving as the model for the American nickel. Rinella's erudition and exuberance combined with his gift for storytelling make him the perfect guide for a book that combines outdoor adventure with a quirky blend of facts and observations about history, biology, and the natural world. Both a captivating narrative and a book of environmental and historical significance, *American Buffalo* tells us as much about ourselves as Americans as it does about the creature who perhaps best of all embodies the American ethos.

***Last Stand*** Todd Wilkinson, Ted Turner, 2013-03-21 Entrepreneur and media mogul Ted Turner has commanded global attention for his dramatic personality, his founding of CNN, his marriage to Jane Fonda, and his company's merger with Time Warner. But his green resume has gone largely ignored, even while his role as a pioneering eco-capitalist means more to Turner than any other aspect of his legacy. He currently owns more than two million acres of private land, more than any other individual in America, and his bison herd exceeds 50,000 head, the largest in history. He donated 1 billion to help save the UN and has recorded dozens of other firsts with regard to wildlife conservation, fighting nukes, and assisting the poor. He calls global warming the most dire threat facing humanity and says that the tycoons of the future will be minted in the development of green, alternative, renewable energy. *Last Stand* goes behind the scenes into Turner's private life, exploring the man's accomplishments and his motivations, showing the world a fascinating and flawed, fully three-dimensional character. From barnstorming the country with T. Boone Pickens on behalf of green energy to a pivotal night when he considered suicide, Turner is not the man the public believes him to be. Through Turner's eyes, the reader is asked to consider another way of thinking about the environment, our obligations to help others in need, and the grave challenges threatening the survival of civilization.

***The Light in High Places*** Joe Hutto, 2014-06-03 Hutto is living in a tent at twelve thousand feet where blizzards occur in July and where human wants become irrelevant and human needs can become a matter of life and death to study the Rocky Mountain bighorn sheep. The population of these rare alpine sheep is in decline. The lambs are dying in unprecedented numbers. Hutto's job is to find out why. For months at a time, he follows the bighorn herds, meets mountain lions, and bears weather, injury, and storms, and beautifully observes the incredible splendor of the Rocky Mountains. Hutto has a deep connection to Wyoming, having managed a large cattle ranch in his past. He weaves Wyoming's history of the cowboy, mountain ecology, and the lives of the bighorn sheep into a beautiful, flowing narrative. Ultimately, he discovers that the lambs are dying of cystic fibrosis due to selenium deficiency, which is caused by acid rain, a grim ecological disaster caused by human pollution. Here is a new twist on a cautionary tale and a new voice eloquently expressing the urgency that we mend our ways.

***Adventure Bowhunter*** Tom Miranda, 2012-11-06 Join adventure bowhunter Tom Miranda as he travels throughout North America in pursuit of the archery Super Slam, all 29 of the continent's big game animals.
